Selection Qi Yu,Athman Bouguettaya,2009-09-02 Foundations for Efficient Web Service Selection describes the foundational framework for efficient Web service selection It lays out a theoretical underpinning for the design of models and algorithms for searching and optimizing access to Web services Excerpts from Prof Fabio Casati s foreword This excellent book looks at the search problem from a broader perspective Instead of narrowing down on a specific aspect or subproblem of service search it dissects and analyzes the fundamental problems in search and presents concrete applicable solutions as well as the theoretical foundations behind them One aspect I found particularly significant in the book is the mind shift it generates from thinking about service modeling for the sake of supporting deployment or invocation to modeling for supporting search This design for search approach is exactly what we do when we design databases because search is what we worry about in that case and there is no reason why this shouldn t be the case for services if we want services to be searchable with a similar effectiveness **Database and Expert Systems Applications** Pablo García Bringas,Abdelkader Hameurlain,Gerald
