Distributed Computing in Sensor Systems V. K. Prasanna Kumar, 2005-06-16 This volume contains the papers presented at the 1st IEEE International Conference on Distributed

Computing in Sensor Systems DCOSS 2005 which took place in Marina del Rey California from June 30 to July 1 2005

Progress in Pattern Recognition, Image Analysis and Applications Luis Rueda,Domingo Mery,Josef Kittler,2007-11-13 This book constitutes the refereed proceedings of the 12th Iberoamerican Congress on Pattern Recognition CIARP 2007 held in Valparaiso Chile November 13 16 2007 The 97 revised full papers presented together with four keynote articles were carefully reviewed and selected from 200 submissions The papers cover ongoing research and mathematical methods for pattern recognition image analysis and applications in areas such as computer vision robotics industry and health

Mitochondrial Bioenergetics Carlos M. Palmeira,Paulo J. Oliveira,2024-11-15 This updated volume provides a concise set of protocols on the conceptual principles and practical considerations pertinent to research in mitochondrial function Driven by the impact of drug and environmental chemical induced disturbances on mitochondrial function hereditary deficiencies and the age related decline in bioenergetic performance this book explores the latest approaches developed in this field by presenting practical principles and assays for quantitative assessments of various parameters reflecting aspects of mitochondrial bioenergetics Written for the highly successful Methods in Molecular Biology series chapters include introductions to their respective topics lists of the necessary materials and reagents step by step and readily reproducible laboratory protocols and tips on troubleshooting and avoiding known pitfalls Authoritative and up to date Mitochondrial Bioenergetics Methods and Protocols Third Edition serves as an ideal guide for scientists endeavoring to enhance the quality of mitochondrial research

Proceedings of the 13th International Conference on Ubiquitous Information Management and Communication (IMCOM) 2019 Sukhan Lee,Roslan Ismail,Hyunseung Choo,2019-05-22 Over past few years technologies have experienced boundaries getting blurred and concept of convergence to gain prominence Harnessing from this two main tracks for information processing management and communication are held covering both research and application works of information management intelligent information processing interaction management networking telecommunications and social interaction This book creates unique opportunity for research convergence among truly diverse technology domains of computer science Leveraging from this diversity of topics researchers get to generate novel research ideas by seeking application of their research in a different technology domain This volume represents the collection of papers presented at the 13th International Conference on Ubiquitous Information Management and Communication IMCOM 2019 held on 4 6 January 2019 in Phuket Thailand Out of 228 papers submitted from all around the world 88 papers were accepted for presentations The 88 contributions to this volume are organized into 5 chapters Chapter 1 Network Evolution Chapter 2 Intelligent and Secure Network Chapter 3 Image and Video Processing Chapter 4 Information Technology and Society and Chapter 5 Data Mining and Learning Our editors wish readers to find this volume informative and enjoyable

Computer Arithmetic Earl E Swartzlander,2015-03-17 This is the new edition of the classic book Computer Arithmetic in three volumes published originally in 1990 by IEEE Computer Society Press As in the original the

book contains many classic papers treating advanced concepts in computer arithmetic which is very suitable as stand alone textbooks or complementary materials to textbooks on computer arithmetic for graduate students and research professionals interested in the field Told in the words of the initial developers this book conveys the excitement of the creators and the implementations provide insight into the details necessary to realize real chips This second volume presents topics on error tolerant arithmetic digit on line arithmetic number systems and now in this new edition a topic on implementations of arithmetic operations all wrapped with an updated overview and a new introduction for each chapter This volume is part of a 3 volume set Computer Arithmetic Volume I Computer Arithmetic Volume II Computer Arithmetic Volume III The full set is available for sale in a print only version Contents Error Tolerant Arithmetic On Line Arithmetic VLSI Adder Implementations VLSI Multiplier Implementations Floating Point VLSI Chips Number Representation Implementations Readership Graduate students and research professionals interested in computer arithmetic Key Features It reprints the classic papers It covers advanced arithmetic operations It does this in the words of the original creators Keywords Computer Arithmetic Fault Tolerant Arithmetic On Line Arithmetic Adder Implementations Multiplier Implementations Floating Point Chips Number Representation Implementations

Semi-Lagrangian Advection Methods and Their Applications in Geoscience Steven J. Fletcher, 2019-11-18 Semi Lagrangian Advection Methods and Their Applications in Geoscience provides a much needed resource on semi Lagrangian theory methods and applications Covering a variety of applications the book brings together developments of the semi Lagrangian in one place and offers a comparison of semi Lagrangian methods with Eulerian based approaches It also includes a chapter dedicated to difficulties of dealing with the adjoint of semi Lagrangian methods and illustrates the behavior of different schemes for different applications This allows for a better understanding of which schemes are most efficient stable consistent and likely to introduce the minimum model error into a given problem Beneficial for students learning about numerical approximations to advection researchers applying these techniques to geoscientific modeling and practitioners looking for the best approach for modeling Semi Lagrangian Advection Methods and Their Applications in Geoscience fills a crucial gap in numerical modeling and data assimilation in geoscience Provides a single resource for understanding semi Lagrangian methods and what is involved in its application Includes exercises and codes to supplement learning and create opportunities for practice Includes coverage of adjoints examining the advantages and disadvantages of different approaches in multiple coordinate systems and different discretizations Includes links to numerical datasets and animations to further enhance understanding

Geomechanics and Water Engineering in Environmental Management R.N. Chowdhury, 2017-11-22 Divided into four parts this work presents integrated studies and regional and case studies and covers environmental constraints and effects and the behaviour of earth masses

Distributed Computing and Internet Technology Goutam Chakraborty, 2005-12-09 The opening ceremony and pre conference tutorials on various related topics were held on December 21 The technical program started on

December 22 and continued for three days The program was arranged in single track so as to enable participants to attend sessions of different tracks Papers from the DM IT SE and SS tracks were divided into two sessions whereas DC track sessions were held on the first two days of the conference The program also included two plenary talks The first talk was delivered by S S Iyengar from Louisiana State University USA The second talk was delivered by He Jifeng from the International Institute for Software Technology IIST Macau Prof Iyengar's talk on The Distributed Sensor Networks An Emerging Technology was focused on new ideas about the use of distributed systems for emerging technology while Prof Jifeng's talk on Linking Theories of Concurrency by Retraction dealt with semantics of concurrency All the conference committee members contributed towards the success of ICDCIT 2005 And it was a pleasant experience for me to work with them The one name that sticks out is R K Ghosh Steering Committee Chair He really steered the group with his past experience as Program Chair of ICDCIT 2004 Slope Stability Analysis and Stabilization Y. M. Cheng, C. K. Lau, 2008-06-03 A number of methods currently exist for the analysis and design of slopes This book provides a critical review of these and offers several more appropriate approaches for overcoming numerical convergence and the location of critical failure surfaces in two dimensional and three dimensional cases New concepts in three dimensional stability analysis finite element analysis and the extension of slope stability problems to lateral earth pressure problems are also addressed It gives helpful practical advice and design resources in the form of recommendations for good analysis and design practice design charts and tables for the engineer Limitations are detailed of both limit equilibrium and the finite element method in the assessment of the stability of a slope and guidance is provided for assessing the fundamental assumptions and limitations of stability analysis methods and computer modelling The book provides ample examples to illustrate how this range of problems should be dealt with The final chapter touches on design and its implementation on site The emphasis is on the transfer of the design to its physical implementation on site in a holistic way taking full account of the latest developments in construction technology Engineering and construction problems tend to be pigeonholed into different classes of problem such as slope stability bearing capacity and earth pressure behind retaining structures This is quite unnecessary This book offers a unified approach which is conceptually practically and philosophically more satisfying *Tryptophan, Serotonin, and Melatonin* Gerald Huether, Walter Kochen, Thomas J. Simat, Hans Steinhart, 2012-12-06 This volume contains the proceedings of the Ninth Meeting of the International Study Group for Tryptophan Research ISTRY held at the University of Hamburg Germany from October 10 to 14 1998 At this meeting the recent developments in the field of tryptophan research were presented by leading researchers from all over the world in 81 oral and 48 poster contributions Research on tryptophan and its derivatives provides an inexhaustible subject At the conference we tried to compose a multifaceted picture of the recent investigations through contributions from the major disciplines involved Thus we tried to strike a balance between basic research topics and clinical nutritional or industrial applications We offered workshops on tryptophan in sleep and mood

melatonin IDO activation and the eosinophilia myalgia syndrome EMS as a platform for intensive discussion for the participants In these proceedings many contributions are multidisciplinary and have practical or theoretical implications for different research fields Hence we have organized this volume in nine main chapters according to basic disciplines and subjects We are aware that this classification is artificial but we hope that it is the best compromise for contributors and readers *Federal Register*, 2000-10-25 *User's Guide* William P. Dawkins, 1994 **Medical Image Computing and Computer-Assisted Intervention - MICCAI 2000** Scott L. Delp, Anthony M. DiGoia, Branislav Jaramaz, 2004-02-12 This book constitutes the refereed proceedings of the Third International Conference on Medical Image Computing and Computer Assisted Intervention MICCAI 2000 held in Pittsburgh PA USA in October 2000 The 136 papers presented were carefully reviewed and selected from a total of 194 submissions The book offers topical sections on neuroimaging and neuroscience segmentation oncology medical image analysis and visualization registration surgical planning and simulation endoscopy and laparoscopy cardiac image analysis vascular image analysis visualization surgical navigation medical robotics plastic and craniofacial surgery and orthopaedics FPGA-BASED Hardware Accelerators Ioulia Skliarova, Valery Sklyarov, 2019-05-30 This book suggests and describes a number of fast parallel circuits for data vector processing using FPGA based hardware accelerators Three primary areas are covered searching sorting and counting in combinational and iterative networks These include the application of traditional structures that rely on comparators swappers as well as alternative networks with a variety of core elements such as adders logical gates and look up tables The iterative technique discussed in the book enables the sequential reuse of relatively large combinational blocks that execute many parallel operations with small propagation delays For each type of network discussed the main focus is on the step by step development of the architectures proposed from initial concepts to synthesizable hardware description language specifications Each type of network is taken through several stages including modeling the desired functionality in software the retrieval and automatic conversion of key functions leading to specifications for optimized hardware modules The resulting specifications are then synthesized implemented and tested in FPGAs using commercial design environments and prototyping boards The methods proposed can be used in a range of data processing applications including traditional sorting the extraction of maximum and minimum subsets from large data sets communication time data processing finding frequently occurring items in a set and Hamming weight distance counters comparators The book is intended to be a valuable support material for university and industrial engineering courses that involve FPGA based circuit and system design
