The Making of a Criminal ,1969      **The Making of a Criminal: a Comparative Study of Two Delinquency Areas**  
Patricia Elton Mayo,1969      Theoretical Criminology from Modernity to Post-Modernism Wayne Morrison,2014-12-18 This book incorporates many of the exciting debates in the social sciences and philosophy of knowledge concerning the issues of modernity and post modernism It sets out a new project for criminology a criminology of modernity and offers a sustained critique of theorizing without a concern for social totalities This book is designed to place criminological theory at the cutting edge of contemporary debates Wayne Morrison reviews the history and present state of criminology and identifies a range of social problems and large scale social processes which must be addressed if the subject is to attain intellectual commitment This book marks a new development in criminological texts and will serve a valuable function not only for students and academics but for all those interested in the project of understanding crime in contemporary conditions      **Street Gangs Throughout the World** Herbert C. Covey,2010 This updated and expanded new edition continues the theme of the first edition of emphasizing the substantial growth of street gangs throughout the world Although a substantial amount of research on street gangs has been conducted in recent decades much of it has focused on the United States This book summarizes much of the research being conducted in many other countries where the street gang phenomenon is currently developing which includes poverty the retreat of the state increasing income inequality urbanization population growth exploitation marginalization underground economie      **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),1970 First multi year cumulation covers six years 1965 70      **Michael Young, Social Science, and the British Left, 1945-1970** Lise Butler,2020 This book examines the relationship between social science and public policy in left wing politics It focuses on the time period between the end of the Second World War and the end of the first Wilson government through the figure of the policy maker sociologist and social innovator Michael Young      **A Bibliography of British History, 1914-1989** Keith Robbins,American Historical Association,Royal Historical Society (Great Britain),1996 Containing over 25 000 entries this unique volume will be absolutely indispensable for all those with an interest in Britain in the twentieth century Accessibly arranged by theme with helpful introductions to each chapter a huge range of topics is covered There is a comprehensive index      *Current Catalog* National Library of Medicine (U.S.),1970 Includes subject section name section and 1968 1970 technical reports      *Reimagining Therapy through Social Contextual Analyses* Bernard Guerin,2022-07-29 This book attempts to shake up the current complacency around therapy and mental health behaviours by putting therapy fully into context using Social Contextual Analysis showing how changes to our social discursive and societal environments rather than changes to an individual s mind will reduce suffering from the mental health behaviours Guerin challenges many assumptions about both current therapy and psychology and offers alternative approaches synthesized from sociology social anthropology sociolinguistics and elsewhere The book provides a way of addressing the mental health

behaviours including actions talking thinking and emotions by taking people s external life situations into account and not relying on an imagined internal source Guerin describes the broad contexts for current Western therapies referring to social discursive cultural societal and economic contexts and suggests that we need to research the components of therapies and stop treating therapies as units He reframes different types of therapy away from their abstract jargons offering an alternative approach grounded in our real social worlds aligning with new thinking that challenges the traditional methods of therapy and also providing a better framework for rethinking psychology itself The book ultimately suggests more emphasis should be put on mental health behaviours as arising from social issues including the modern contexts of extreme capitalism excessive bureaucracy weakened discursive communities and changing forms of social relationships Practical guidelines are provided for building the reimaged therapies into clinics and institutions where labelling and pathologizing the mental health behaviours will no longer be needed By putting mental health behaviours and therapy into a naturalistic or ecological social sciences framework this book will be practical and fascinating reading for professional therapists counsellors social workers and mental health nurses as well as academics interested in psychology and the social sciences more generally
