Chinese Propaganda Posters: From Revolution to Modernization Stefan Landsberger, 2020-11-26 Brightly coloured prints portraying model behaviour or a better future have been a ubiquitous element of Chinese political culture from Imperial times until present As economic reform swept the People's Republic in the 1980s visual propaganda ceased to depict the tanned and muscular labourers in a proletarian utopia so typical of preceding decades Instead Western icons of progress and development were employed high speed bullet trains spacecraft high rise buildings gridlocked free ways and projections of general affluence Socialist Realism was phased out by design and mixed media techniques that were influenced by Western advertising This lavishly illustrated study traces the development of the style and content of the Chinese propaganda poster in the decade of reform from its traditional origins to its use as a tool for political and economic purposes

Competing Frameworks Anatoli Rapoport, 2018-11-01 For citizenship education in the 21st century globalization increasingly presents a new challenge and a new opportunity Since the time when nationalism played a critical role in unifying new nations nationality and citizenship have been virtually synonymous terms As a result the constructed symbiosis of citizenship and national identity has influenced state supported citizenship education in the most profound way School curricula particularly in public schools produced and reinforced the dominant version of citizenship which is national citizenship Schools were expected to prepare future loyal citizens who would identify themselves with the nation Due to the changing nature and scope of human interactions the traditional model of citizenship education however appears increasingly outdated and deficient to address many contemporary challenges Thus schools have become a locus of a potential conflict of two citizenship discourses the discourse of national citizenship that for a long time has served as the ultimate purpose of public education and the discourse of global citizenship that is forcefully and continuously seeking for a proper place in school curricula despite the lack of curricular heritage The need for an education for citizenship that has a global scope and is guided by critical and emancipatory approaches becomes more evident At the same time the pressure to globalize and internationalize curriculum actively challenges such concepts as patriotism national identity loyalty to the state or national uniqueness of government and democratic development that have been fundamental for citizenship and civic education for decades In this book a group of international scholars present their research about the dynamic development interplay and interconnectedness of two major discourses in citizenship education namely national and global Case studies and ethnographies from China Cyprus Egypt Hong Kong and Singapore Lebanon Liberia the Netherlands Russia and the United States display a multifaceted but yet comprehensive picture of educators attempts to promote social justice global awareness and multiple loyalties The volume will appeal to several constituencies it will be interesting to teachers and teacher educators whose focus of

instruction is citizenship education social studies education and global education it will also be interesting to scholars who conduct research in citizenship and global education

**The Use and Abuse of History** Marc Ferro, 2004-06-01 Use and Abuse of History has become a key text of current historiography this is a book that poses fundamental and disturbing questions about the use and abuse of history Engaging and challenging this book confronts the reader with the many histories that exist and have existed around the world from the Zulu kingdoms to Communist China This title has now been extensively revised by Marc Ferro a well respected historian and presents the different narratives that constitute the histories of countries as diverse as India Iran Trinidad and the United States makes for fascinating reading in their own right What makes this book so valuable though is what these narratives tell us about the societies which create them how much is history distorted in order to condition the minds of those who are taught it Use and Abuse of History appeals to anyone with a general interest in history

**The Chinese Defense Establishment** Paul H. B. Godwin, 2019-06-18 Complex issues of national security and defense modernization continue to be a major preoccupation of the PRC leadership In the 1970s especially during the second half of that crucial decade critical decisions were made that led to Beijing's alignment with the West against the USSR and a revitalization of its armed forces This book looks at China's defense establishment

*Air University Quarterly Review*, 1981

**Marx and Education in Late Capitalism** R. F. Price, 1986-01-01 The major premise of this book is that efforts to construct a Marxist analysis of education centered on schools and schooling are misdirected Instead the author contends that explorations of education must more importantly focus on the valuable learning experiences that occur outside the classroom Using Marx's own writings as a guide to interpreting past and present events the author explores how education should be conceptualized in order to liberate working people He identifies those aspects of education linked with the specifically capitalist nature of our societies and those that give hope of the cooperative responsible society that Marx anticipated

**Contemporary Perspectives in Comparative Education** Robin Burns, Anthony Welch, 2018-05-08 Originally published in 1992 This work provides insight into comparative and international education work in Australia and New Zealand where an emerging local style may be developing into a full blown national approach The 14 essays address issues such as education in third world Asia sexism and culture and power There is recurring focus on ethics in research education development the role of international agencies inequality legitimacy and the link between comparative education and education practice This a great reflection on the field as a whole with contributions mostly from one area of the world but with a complete international spread of consideration

**The Chinese Language** John DeFrancis, 1986-03-01 DeFrancis's book is first rate It entertains It teaches It demystifies It counteracts popular ignorance as well as sophisticated cocktail party ignorance Who could ask for anything more There is no other book like it It is one of a kind a first and I would not only buy it but I would recommend it to friends and colleagues many of whom are visiting China now and are adding two week expert ignorance to the two kinds that existed before This is a book for everyone Joshua A Fishman research professor of

social sciences Yeshiva University New York Professor De Francis has produced a work of great effectiveness that should appeal to a wide ranging audience It is at once instructive and entertaining While being delighted by the flair of his novel approach the reader will also be led to ponder on some of the most fundamental problems concerning the relations between written languages and spoken languages Specifically he will be served a variety of information on the languages of East Asia not as dry pedantic facts but as appealing tidbits that whet the intellectual appetite The expert will find much to reflect on in this book for Professor DeFrancis takes nothing for granted William S Y Wang professor of linguistics University of California at Berkeley      **Catalog of Copyright Entries. **Comrades** Susan L. Shirk,2023-04-28 *Competitive Comrades* Career Incentives and Student Strategies in China provides a nuanced analysis of the complexities within China's educational institutions and examines the evolution of student behavior in response to political pressures and career incentives Focusing on the period between 1960 and 1966 the book delves into the high stakes world of Chinese high schools where the distribution of opportunities especially under Mao's virtuocratic policies produced a unique blend of ambition and moral posturing The book argues that Maoist policies which sought to fuse political virtue with academic performance created an intense atmosphere of competition that encouraged students to balance their academic and political ambitions with social strategies that would ensure their success Unlike meritocracies or traditional hierarchies this virtuocratic system intensified the stakes of student relationships and loyalty while paradoxically fostering political cynicism and alienation from the state a contradiction at the heart of the Maoist vision of revolutionary successors Through detailed interviews with former students *Competitive Comrades* reveals how students navigated these pressures showing that rather than fostering cooperation and ideological alignment Mao's policies often drove students toward strategic adaptations aimed at self preservation and advancement This exploration of the social and behavioral implications of virtuocracy provides critical insights into post revolutionary Chinese society and presents a comparative framework relevant to other regimes governed by similar principles of moral based selection Ideal for scholars of Chinese history political sociology and education studies *Competitive Comrades* sheds light on the unintended consequences of revolutionary moral ambitions on youth culture and social cohesion in Communist China This title is part of UC Press's *Voices Revived* program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 *Voices Revived* makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1982      *Childhood by Design* Megan Brandow-Faller,2018-04-19 Informed by the analytical practices of the interdisciplinary material turn and social historical studies of childhood *Childhood By Design* Toys and the Material Culture of Childhood offers new approaches to the material world of childhood and design culture for children This volume situates toys and design culture for children within broader narratives on history art design and the decorative arts where toy design has traditionally been viewed as an

aberration from more serious pursuits The essays included treat toys not merely as unproblematic reflections of socio cultural constructions of childhood but consider how design culture actively shaped commodified and materialized shifting discursive constellations surrounding childhood and children Focusing on the new array of material objects designed in response to the modern invention of childhood what we might refer to as objects for a childhood by design Childhood by Design explores dynamic tensions between theory and practice discursive constructions and lived experience as embodied in the material culture of childhood Contributions from and between a variety of disciplinary perspectives including history art history material cultural studies decorative arts design history and childhood studies are represented critically linking historical discourses of childhood with close study of material objects and design culture Chronologically the volume spans the 18th century which witnessed the invention of the toy as an educational plaything and a proliferation of new material artifacts designed expressly for children s use through the 19th century expansion of factory based methods of toy production facilitating accuracy in miniaturization and a new vocabulary of design objects coinciding with the recognition of childhood innocence and physical separation within the household towards the intersection of early 20th century child centered pedagogy and modernist approaches to nursery and furniture design through the changing consumption and sales practices of the postwar period marketing directly to children through television film and other digital media and into the present where the line between the material culture of childhood and adulthood is increasingly blurred Creating the New Man Yinghong Cheng, 2008-12-31 The idea of eliminating undesirable traits from human temperament to create a new man has been part of moral and political thinking worldwide for millennia During the Enlightenment European philosophers sought to construct an ideological framework for reshaping human nature But it was only among the communist regimes of the twentieth century that such ideas were actually put into practice on a nationwide scale In this book Yinghong Cheng examines three culturally diverse sociopolitical experiments the Soviet Union under Lenin and Stalin China under Mao and Cuba under Castro in an attempt to better understand the origins and development of the new man The book s fundamental concerns are how these communist revolutions strove to create a new morally and psychologically superior human being and how this task paralleled efforts to create a superior society To these ends it addresses a number of questions What are the intellectual roots of the new man concept How was this idealistic and utopian goal linked to specific political and economic programs How do the policies of these particular regimes based as they are on universal communist ideology reflect national and cultural traditions Cheng begins by exploring the origins of the idea of human perfectibility during the Enlightenment His discussion moves to other European intellectual movements and then to the creation of the Soviet Man the first communist new man in world history Subsequent chapters examine China s experiment with human nature starting with the nationalistic debate about a new national character at the turn of the twentieth century and Cuban perceptions of the new man and his role in propelling the revolution from a nationalist to a socialist and finally a communist movement The last

chapter considers the global influence of the Soviet Chinese and Cuban experiments Creating the New Man contributes greatly to our understanding of how three very different countries and their leaders carried out problematic and controversial visions and programs It will be of special interest to students and scholars of world history and intellectual social and revolutionary history and also development studies and philosophy      *Cooperation and Prosocial Behaviour*  
Robert A. Hinde, Jo Groebel, 1991-11-21 This book discusses the nature of cooperation altruism and prosocial behaviour and the factors that make their occurrence more likely
