The Making Of Terrorism:

The Making of Terrorism Michel Wieviorka, 1993-12-15 In this innovative study Michel Wieviorka applies interventionist sociology to a comparative analysis of Italian Peruvian Basque and Middle Eastern terrorist groups Through staged confrontations between terrorists and their targets and extensive interviews with both parties he throws new light on the terrorists and their relationships both to the movements they represent and the social institutions they attempt to destroy Wieviorka demonstrates that the truly terrorist actor has become alienated both from the collective movement and society The actor turns to the blind violence when he finds himself cut off from the very ideology which legitimates his actions Pure terrorism Wieviorka concludes is more than simply a break between those who use it and those it targets it is also a relationship between the individual and the collective he represents which has been rendered unrealistic or artificial Thus terrorist violence should be understood not as the desperate act of a faltering movement but as a substitute for a movement which has fallen away from the ideology in which it was forged For the revelations it offers on the roots and motivations of terrorism for its innovative methods and for its useful comparative analysis of terrorist groups in recent history The Making of Terrorism will be an important resource across many disciplines for anyone interested in terrorism or political violence

The Making of Terrorism in Pakistan Eamon Murphy, 2012-12-12 This volume examines the social and political and economic factors that have contributed to the rise of terrorism in Pakistan employing an historical and critical terrorism studies perspective Violence, Imagination, and Resistance Katrin Roots, 2023-05-25 Much of the discussion of social transformation and resistance in socio legal studies centres around the question of whether and how the law can be used to achieve practical change However the editors of this volume argue that it will never be possible to enact change through the law because it is inseparable from violence be it metaphysical social or political They posit that a just world free from oppressive power relations requires us to imagine communities where the state and its law cease to exist Contributors address the underexplored questions of what alternatives to law could look like how communities could organize their everyday lives and how they could address social and interpersonal conflicts outside of an apparatus of violence These essays contribute to the ongoing interrogation of settler colonialism racism and structural violence in Canada by demonstrating how to expose the violence the law produces how to deconstruct law s power and finally how to identify modes of resistance that have transformative potential

The Oxford Handbook of Terrorism Erica Chenoweth, Richard English, Andreas Gofas, Stathis N. Kalyvas, 2019-03-14 The Oxford Handbook of Terrorism systematically integrates the substantial body of scholarship on terrorism and counterterrorism before and after 9 11 In doing so it introduces scholars and practitioners to state of the art approaches methods and issues in studying and teaching these vital phenomena This Handbook goes further than most existing collections by giving structure and direction to the fast growing but somewhat disjointed field of terrorism studies The volume locates terrorism within the wider spectrum of political violence instead of engaging in the widespread

tendency towards treating terrorism as an exceptional act Moreover the volume makes a case for studying terrorism within its socio historical context Finally the volume addresses the critique that the study of terrorism suffers from lack of theory by reviewing and extending the theoretical insights contributed by several fields including political science political economy history sociology anthropology criminology law geography and psychology In doing so the volume showcases the analytical advancements and reflects on the challenges that remain since the emergence of the field in the early 1970s

Constructions of Terrorism Michael Stohl, Dr. Richard Burchill, Scott Howard Englund, 2017-08-01 Discussions about the meaning of terrorism are enduring in everyday language government policy news reporting and international politics And disagreements about both the definition and the class of violent events that constitute terrorism contribute to the difficulty of formulating effective responses aimed at the prevention and management of the threat of terrorism and the development of counterterrorism policies *Constructions of Terrorism* collects works from the leading scholars on terrorism from an array of disciplines including communication political science sociology global studies and public policy to establish appropriate research frameworks for understanding how we construct our understanding of terrorism

A Practical Guide to Winning the War on Terrorism Adam Garfinkle, 2013-09-01 The military side of the war on terrorism says Adam Garfinkle is a necessary but not sufficient aspect of the solution Weapons of mass destruction are activated by ideas of mass destruction and these ideas arise from complex historical and social factors *A Practical Guide to Winning the War on Terrorism* offers concrete steps for undermining the very notion that terrorism is a legitimate method of political struggle and for changing the conditions that lead people to embrace it

Terrorism in the United States, 1998

Clinton, New Terrorism and the Origins of the War on Terror Chin-Kuei Tsui, 2016-07-15 A frequent assumption of the American led war on terror and its accompanying discourse originated largely with the George W Bush Administration and that there was a counterterrorism policy revolution in the U S political arena Challenging these assumptions through a genealogical analysis of U S terrorism and counterterrorism discourses this book demonstrates a distinct continuity and lack of change of U S counterterrorism policy from Ronald Reagan to Bill Clinton and through to George W Bush The book focuses on President Clinton s discursive construction of new terrorism or catastrophic terrorism and the counterterrorism practices implemented by the Clinton Administration while simultaneously comparing it with President Reagan s and President George W Bush s approaches to counterterrorism It shows how the war on terror can be traced to earlier periods and that the so called Bush revolution was largely built upon the existing framework established by President Reagan and President Clinton Prior to the 2001 terrorist attacks Clinton had expanded Reagan s first war on terrorism discourse and constructed the new terrorism discourse characterised by the notions of borderless threats home grown terrorism WMD terrorism cyberterrorism and rogue states Clinton s new terrorism discourse provided a useful framework for George W Bush to discursively respond to the terrorist attacks on September 11th 2001 Aiming to uncover the myth of President George W Bush s foreign policy revolution and

contribute to a deeper historical understanding of the U S led war on terror it will be of great use to postgraduates and scholars of US foreign policy security studies and terrorism studies

Strategic Interaction Between Islamist Terror Groups Nina Ismael, 2020-11-10 This book applies game theory to the phenomenon of terrorism and investigates how the competition for support can influence the attack behavior of terror organizations In addition it examines the economics of terrorism The so called outbidding theory which has become increasingly popular within the field of terrorism research argues that terror groups vying for resources will engage in more and more violence to demonstrate their capabilities and commitment to their cause This book challenges the outbidding concept by providing a game theoretical analysis which shows that a contest between two terror groups can be interpreted as a race for support This interpretation may help explain why major attacks occur at all not as a result of outbidding but as a result of losing the race In addition the author shows that rivalry between terror groups does not necessarily lead to more attacks but can result in less terrorism due to an increased probability of attack failure induced by the race Lastly the model is applied to the rivalry between al Qaeda and Daesh elaborated on with empirical evidence Given its scope the book is a must read for researches and scholars working in the fields of economics politics the social sciences and military history as well as military and political decision makers and authorities working in the field of risk management , **Who is**

Afraid of the State? Gordon S. Skogan, 2007-05-07 Expert contributors confront both the maritime security challenges and responses identifying the nature of the maritime security problem and critically evaluating the various responses with an eye to improving the management of prevailing and emerging security threats 9/11 and the Design of Counterterrorism Institutions Michael

Karlsson, 2016-03-16 How did the North European states react to the terrorist attacks in the United States on September 11 2001 Michael Karlsson argues that 9 11 led to a considerable pressure to strengthen rules and practices for counterterrorism and security but that this pressure was mediated by several other conditions The reforms were also affected by among other things how the threat of global terrorism was perceived pressure from international institutions such as the UN EU and NATO the domestic political context and pre existing rules and practices His analysis uses the new institutionalism framework tested through case studies of Denmark Sweden Finland Estonia Latvia and Lithuania The book offers a unique lens on the study of counterterrorism from a new theoretical and regional perspective
