A History of Western Educational Ideas Professor Peter Gordon, Professor Denis Lawton, 2019-11-26 It is important that all those concerned with education parents teachers administrators and policymakers should have a reasonable understanding of the present system and how it has developed sometimes over a period of many years This work traces the development of Western educational ideas from the Greek society of Socrates Plato and Aristotle to the ideas and ideologies behind some of the controversial issues in education today This book discusses the continuous development of educational thought over three millennia The focus upon the history of ideas in this volume is partly an attempt to move history of education away from an approach based on great men to technological economic and political influences on ideas and beliefs It reviews many issues ranging from the purposes of education from the earliest times to the challenge of postmodernism in the present century The authors provide an accessible and thought provoking guide to the educational ideas that underlie practice

The Anatomy of the Case Study Gary Thomas, Kevin Myers, 2015-05-20 This sharp stimulating title provides a structure for thinking about analysing and designing case study It explores the historical theoretical and practical bones of modern case study research offering to social scientists a framework for understanding and working with this form of inquiry Using detailed analysis of examples taken from across the social sciences Thomas and Myers set out and then work through an intricate typology of case study design to answer questions such as How is a case study constructed What are the required inherent components of case study Can a coherent structure be applied to this form of inquiry The book grounds complex theoretical insights in real world research and includes an extended example that has been annotated line by line to take the reader through each step of understanding and conducting research using case study

The English Higher Grade Schools Meriel Vlaeminck, 2013-09-05 The English higher grade schools formed a key part of an expanding 19th century

education system but they threatened the vested interests of a powerful Establishment bent on reaffirming the status quo. The author analyzes the 1902 Education Act as a retrogressive move by which much was lost. *Experiences of Special Education* Derrick Armstrong, 2003. This is a refreshing book which examines the stories of those people who have received SEN provision. Funded by the ESRC it explores the wider issues of Special Education and defines its future role. Caring for the Socially Marginalised in Interwar Europe, 1919-1939 Michele Mioni, Stefano Petrungaro, 2024-11-07. This book investigates the mixed economy of welfare that assisted socially marginalised people in interwar Europe namely the state, local authorities and a combination of voluntary and informal actors. While literature has traditionally emphasised the key role of the state, the cooperation between public authorities and private actors has always been a staple of social policy in Europe throughout history. The interwar years prominently featured these entanglements between the increased public sphere of action and the voluntary sector. Focusing on three thematic areas: warfare and its effects, boundaries of aid and institutional segregation, and gender and religion, the authors present case studies from various European countries between 1919 and 1939. All contributions explore the variegated world that composed the so-called mixed economy of welfare. By shifting the emphasis to the collaborations and frictions between social marginals, non-state actors and public authorities on a local, national and transnational level, the book challenges too simplistic distinctions between public and private initiatives and reveals the cultural, political and practical common traits that featured in European care for marginals across a variety of geographical variations and socio-political contexts. Chapter 5: Rescuing Endangered Girls: The Yugoslav Experience in a Comparative View is available open access under a Creative Commons Attribution 4.0 International License via Springerlink. EBOOK: Inclusion: The Dynamic of School Development David Skidmore, 2004-05-16. Inclusion has been adopted as a policy goal in many countries. It is one of the buzzwords in education and a topic of much theoretical debate, often without allowing for real life in today's schools. Bridging the gap between theoretical discussions and the real attitudes and experiences of teachers, this book features case studies of inclusion initiatives in English secondary schools. It illustrates the complex nature of the school development process, describes teachers' attitudes towards inclusion, challenges the idea that there needs to be consensus among school staff for inclusion to work. *Inclusion: The Dynamic of School Development* also examines the dominant influence of the discourse of deviance on the history of education policy in the West during the twentieth century. The book concludes by articulating an alternative vision of the relationship between education and society for education policy, pedagogy and the curriculum. *Education and the Labour Government* Geoffrey Walford, 2013-09-13. This book presents a valuable and authoritative evaluation of the real impact Labour's two terms have had on the British education system. On the 1st May 1997, the British electorate witnessed a watershed moment. After an eighteen-year Conservative rule, a New Labour government took office. When asked what his top three priorities were for the first term, Tony Blair stated that they would be education, education, education. This book questions the extent to which the policy has met the

rhetoric examining Labour's education policy practice and achievements during Blair's two terms in office This selection of writings by highly respected academics in this field charts and evaluates the effects of policy changes on the various sectors of the educational system and on the major indicators of inequality This book was previously published as a special issue of the Oxford Review of Education **Rethinking the Education Improvement Agenda** Kevin J. Flint, Nick Peim, 2012-02-02 Offering a philosophical perspective to the educational improvement agenda this engaging text provides a new language for research into educational improvement bringing leading edge philosophy to current practice Drawing on philosophical work including that of Derrida Foucault and Heidegger the authors deconstruct the ethic of improvement before exploring key dimensions of education its institutions and technologies Each chapter draws on international case studies provides engaging questions and makes suggestions for further reading to support the reader Topics covered include The Ethic of Improvement Teacher Education Leadership and Management Lifelong Learning The Rhetoric of Numbers The Governance of Childhood The State of Education Research An essential text for all looking at how we think and talk about education and improvement

Young People and Offending Martin Stephenson, 2006-11 This book seeks to explore the full extent of the implications of the relationship between education and youth crime in terms of social policy and public opinion It will be essential reading for youth justice practitioners as well as students taking courses on youth crime and youth justice or on youth justice or probation training courses
