

Making Modern World: Modernising War, 1756-1914

Introduction:

Military History: a subject that has suffered from a dominant orthodoxy – weapons, battles and campaigns, leaders, techniques, morale and sometimes logistics.

Criticism: too narrow a focus; suspicion that the subject isn't truly academic or is the preserve of weapons-fetishists, the right wing. Seemed to be an anachronistic approach to history (purely politics and 'great men').

New Military History: an attempt to include the social history of servicemen, women in war, civilians (eg in garrisons, or as refugees and victims), culture, and economics.

Criticism: 'history of war with all the fighting taken out': the key aspect of war is the fighting – it's where the decisions are made and often where the conflict is resolved

New debates:

'Modern war'? Modernity is a relative concept. It's not clear what was modern, or when, as it was always changing. Furthermore, apparently archaic armies, under the right circumstances, could still defeat so-called 'modern' armies.

Paradigmatic concepts (favoured by military personnel) – but history of war doesn't fit the model. American armed services refer to their 'full-spectrum dominance' (air waves, land, sea and air forces, intelligence), but that doesn't prevent casualties to insurgency in Iraq and Afghanistan.

Western-centric: non-Western forms of war neglected because of rise of the West in 18th-20th centuries. Comparatively little study of wars in Africa and Asia in 20th century compared with campaigns involving Western powers (e.g. Indonesia in WWII, Africa in the Cold War years)

Now (2006), Niall Ferguson posits that there was not a series of wars in the 20 century but a single hundred years' war – This is unconvincing, roots of the First World War lay in the 19 century, so why not say war was a continuum for 150, 200, or even 300 years. Clearly there were episodes of peace even when causes of conflict were still existent (Britain 1919-39).

Modalities of war: are terrorists and guerrillas any different? If war is not declared, is it still a war? Are civil wars examined as critically, or by the same criteria, as conventional wars between states? Growing awareness that unlimited force does not guarantee success in asymmetrical warfare.

Changing Fronts in Warfare

Technology

Increasing sophistication, standardization, mass production (cheap, abundant, replaceable parts)... increasing lethality in the hands of fewer and fewer men (musket - 100 metres, potential to kill one every minute; cruise missile – 100s of miles, could detonate a nuclear device and kill 000s.)

But – wrongly attributed with 'determining' the outcome of wars. It is simply not true that the side with the most sophisticated weapons won the battles/war – colonial wars in 19th century, Vietnam War and Afghanistan-Soviet struggle in 20th century.

The Making Of The Modern World Documents:

The Making of the Modern World Anson Rabinbach,1994 **A World History of Art** Hugh Honour,John Fleming,2005 Over two decades this art historical tour de force has consistently proved the classic introduction to humanity's artistic heritage From our paleolithic past to our digitised present every continent and culture is covered in an articulate and well balanced discussion In this Seventh Edition the text has been revised to embrace developments in archaeology and art historical research while the renowned contemporary art historian Michael Archer has greatly expanded the discussion of the past twenty years providing a new perspective on the latest developments The insight elegance and fluency that the authors bring to their text are complemented by 1458 superb illustrations half of which are now in colour These images together with the numerous maps and architectural plans have been chosen to represent the most significant chronological regional and individual styles of artistic expression

Trade and Nation Emily Erikson,2021-06-29 In the seventeenth century English economic theorists lost interest in the moral status of exchange and became increasingly concerned with the roots of national prosperity This shift marked the origins of classical political economy and provided the foundation for the contemporary discipline of economics The seventeenth century revolution in economic thought fundamentally reshaped the way economic processes have been interpreted and understood In Trade and Nation Emily Erikson brings together historical comparative and computational methods to explain the institutional forces that brought about this transformation Erikson pinpoints how the rise of the company form in confluence with the political marginalization of English merchants created an opening for public argumentation over economic matters Independent merchants who were excluded from state institutions and vast areas of trade confronted the power and influence of crown endorsed chartered companies Their distance from the halls of government drove them to take their case to the public sphere The number of merchant authored economic texts rose as members of this class sought to show that their preferred policies would contribute to the benefit of the state and commonwealth In doing so they created and disseminated a new moral framework of growth prosperity and wealth for evaluating economic behavior By using computational methods to document these processes Trade and Nation provides both compelling evidence and a prototype for how methodological innovations can help to provide new insights into large scale social processes
