BOYER, Paul S Boyer, 2009-06-30 For over a century dark visions of moral collapse and social disintegration in American cities spurred an anxious middle class to search for ways to restore order In this important book Paul Boyer explores the links between the urban reforms of the Progressive era and the long efforts of prior generations to tame the cities He integrates the ideologies of urban crusades with an examination of the careers and the mentalities of a group of vigorous activists including Lyman Beecher the pioneers of the tract societies and Sunday schools Charles Loring Brace of

the Children's Aid Society Josephine Shaw Lowell of the Charity Organization movement the father of American playgrounds Joseph Lee and the eloquent city planner Daniel Hudson Burnham Boyer describes the early attempts of Jacksonian evangelicals to recreate in the city the social equivalent of the morally homogeneous village he also discusses later strategies that tried to exert a moral influence on urban immigrant families by voluntarist effort including for instance the Charity Organizations friendly visitors By the 1890s there had developed two sharply divergent trends in thinking about urban planning and social control the bleak assessment that led to coercive strategies and the hopeful evaluation that emphasized the importance of environmental betterment as a means of urban moral control *The Urban South* Lawrence H.

Larsen, 2014-07-15 In this panoramic survey of urbanization in the American South from its beginnings in the colonial period through the Sunbelt era of today Lawrence Larsen examines both the ways in which southern urbanization has paralleled that of other regions and the distinctive marks of southernness in the historical process Larsen is the first historian to show that southern cities developed in layers spreading ever westward in response to the expanding transportation needs of the Cotton Kingdom Yet in other respects southern cities developed in much the same way as cities elsewhere in America despite the constraints of regional racial and agrarian factors And southern urbanites far from resisting change quickly seized upon technological innovations most recently air conditioning to improve the quality of urban life Treating urbanization as an independent variable without an ideological foundation Larsen demonstrates that focusing on the introduction of certain city services such as sewerage and professional fire departments enables the historian to determine points of urban progress Larsen's landmark study provides a new perspective not only on a much ignored aspect of the history of the South but also on the relationship of the distinctive cities of the Old South to the new concept of the Sunbelt city Carrying his story down to the present he concludes that southern cities have gained parity with others throughout America This important work will be of value to all students of the South as well as to urban historians
