Know Your World: A Geographer's Guide To The Anthropocene Age John J. Moran, 2017-01-25 Darwin named Geography as Queen of the sciences His observations of geographical connections had revealed the phenomenon of Life in a remarkably structured Earth world as interlocked dynamic systems This Systems View of Life is reviving at a time when we are facing a crisis of collapse in world systems and the prospect of a breaking world as a result of reckless human activities driven by amoral values We are all geographers embarked on a voyage in search of the optimum location with the promise of support and betterment of our future living conditions But for most of the world's people this is an experience of Life fraught with hardship and deprivation Compelled to take stock of our deteriorating environment as well as to question the values we hold the message is that we have the collective restorative power of geographical knowledge which can be applied to achieve a better world

New Scientist, 1969 *Bibliography and Index of Geology*, 1988 *The Gates of Destiny* John C. Compton, 2022-08-19 This book contains a series of commentaries research notes and illustrations selected from the author's amazing research work It shows how the notational values for trigram transposition which change the ancient symbolic language of the I Ching into a simple numerical language were originally derived from the combined symbolic mathematics of the ancient Ho T'u The Dragon Horse diagram and the Lo Shu The Tortoise diagram This document provides additional conclusive evidence that the originators of the I Ching employed a mathematical system developed during the Ch'in and Han dynasties which encompassed a formalistic natural philosophy that sought to embrace the entire world in a system of number symbolism In addition the research work contained herein sets out to prove by using mathematical operand gates methodology that the destiny fate of an individual being is dependent upon their own genetic DNA
