Kapstein, Charles Ramble, 2022-01-31 The Tibetan Gesar epic considered the world s longest poem has been the object of countless retellings translations and academic studies in the two centuries since it was first introduced to European readers In *The Many Faces of Ling Gesar* its many aspects historical cultural and literary are surveyed for the first time in a single volume in English addressed to both general readers and specialists The original scholarship presented here by international experts in Tibetan Studies honours the contributions of Rolf A Stein 1911 1999 whose studies of the Tibetan epic are the enduring standard in this field With a foreword by Jean-Noël Robert Collège de France Contributors are Anne-Marie Blondeau Chopa Dondrup Estelle Dryland Solomon George FitzHerbert Gregory Forgues Frances Garrett Frantz Grenet Lama Jabb Matthew W King Norbu Wangdan Geoffrey Samuel Siddiq Wahid Wang Guoming Yang Enhong *The Many Faces of Religion and Society* M. Darrol Bryant, Rita H. Mataragnon, 1985 *Many Faces, One Church* Peter C. Phan, Diana L. Hayes, 2005 *Many Faces One Church* Cultural Diversity and the American Catholic Experience both captures and facilitates a seismic shift in the who what where when why and how of Catholic theology today Along with a diverse group of theologians who represent the many faces of the church editors Peter C Phan and Diana Hayes recast the story of the church in America by including immigrant groups either forgotten or ignored and in light of these new and not so new voices retooling the theological framework of Catholicism itself That the American Catholic Church is an immigrant church is not news What is news however is how diverse the immigrant church really is and how much work there is to be done to include their voices in theological discourse and training Beyond the German and Irish immigrants what of other European immigrant groups such as the Italians Poles Lithuanians Czechs Slovaks and Eastern rite Catholics Where are the stories of the older presence of native Mexican Native American and African American Catholics in this country And more recently of Asian American Catholics especially the Chinese the Japanese and the Filipinos of the nineteenth and early

twentieth century And more recently still Catholic immigrants have come from El Salvador Guatemala Vietnam Cambodia Korea India and the Pacific Islands What impact are these immigrants having on American society and religious groups Many Faces One Church is a profound attempt to address these key questions and their implications for the Catholic way of being church worshipping and practicing theology The result of three years of conferences sponsored by Elms College exploring the new faces of the American Catholic Church this thoughtful collection highlights opportunities and challenges lying ahead as the American Church tries to respond to the continuing presence of new immigrants in its midst Many Faces One Church is a beginning of a long but exciting journey in which the strangers welc

Humanities ,1999 The Many Faces of Socioeconomic Change John Toye,2017-08-25 Development is not a purely economic phenomenon it also has a strong sociological element The Many Faces of Socioeconomic Change explores how economic socio cultural and political aspects of human progress have been studied since the time of Adam Smith Surveying narratives of how development occurs from early evolutionary models to recent types of development theory it outlines the main long term changes in how socioeconomic development has been envisaged through time The Many Faces of Socioeconomic Change presents the argument that socioeconomic development emerged with the creation of grand evolutionary sequences of social progress that were the products of Enlightenment and mid Victorian thinkers By the middle of the twentieth century when interest in accelerating development gave the topic a new impetus its scope narrowed to a set of economically based strategies After 1960 however faith in such strategies began to wane in the face of indifferent results and a general faltering of confidence in economists boasts of scientific expertise In the twenty first century development research is being pursued using research methods that generate disconnected results As a result it seems unlikely that any grand narrative will be created in the future and that Neo liberalism will be the last of this particular kind of socioeconomic theory With a broad scope of content and clear exposition of academic thinking this book guides the reader through the way in which the policy adopted as a consequence of modern theories has been less effective because of the neglect or a misunderstanding of the social context within which they operate

Ethics and Human Values in Medical Sciences Niru Hazarika,2016-01-01 The book is an attempt to understand the state of ethics and human values in the medical services with the perspective of Indian culture and traditions The process of dehumanization of the old well established Indian society based on human culture must be prevented and we expect a good beginning will be made by the medical professionals of the country very soon through realization of the deep rooted harm caused by it to the nation Efforts must be made for emergence of genuine commitment to the service to humanity The moral foundation of any public service organization in a democracy requires that administrators and public officials to show a genuine care for their fellow citizens

The book is trying to underline ethical aspects of major religions of India Gandhi's ideas social culture in ancient India contribution of India towards development of medical science and technology to highlight the state of human culture in the medical sciences *The Many Faces of the Divine* Hermann Ha ring, Johann Baptist Metz, 1995

The Idea of Human Rights Michael J. Perry, 2000 Inspired by a 1988 trip to El Salvador Michael J Perry's new book is a personal and scholarly exploration of the idea of human rights Perry is one of our nation's leading authorities on the relation of morality including religious morality to politics and law He seeks in this book to disentangle the complex idea of human rights by way of four probing and interrelated essays The initial essay which is animated by Perry's skepticism about the capacity of any secular morality to offer a coherent account of the idea of human rights suggests that the first part of the idea of human rights the premise that every human being is sacred or inviolable is inescapably religious Responding to recent criticism of rights talk Perry explicates in his second essay the meaning and value of talk about human rights In his third essay Perry asks a fundamental question about human rights Are they universal In addressing this question he disaggregates and criticizes several different varieties of moral relativism and then considers the implications of these different relativist positions for claims about human rights Perry turns to another fundamental question about human rights in his final essay Are they absolute He concludes that even if no human rights understood as moral rights are absolute or unconditional some human rights understood as international legal rights are and indeed should be absolute In the introduction Perry writes Of all the influential indeed formative moral ideas to take center stage in the twentieth century like democracy and socialism the idea of human rights which again in one form or another is an old idea is for many the most difficult It is the most difficult in the sense that it is for many the hardest of the great moral ideas to integrate the hardest to square with the reigning intellectual assumptions of the age especially what Bernard Williams has called Nietzsche's thought There is not only no God but no metaphysical order of any kind For those who accept Nietzsche's thought can the idea of human rights possibly be more than a kind of aesthetic preference In a culture in which it was widely believed that there is no God or metaphysical order of any kind on what basis if any could the idea of human rights long survive The Idea of Human Rights Four Inquiries will appeal to students of many disciplines including but not limited to law philosophy religion and politics

Nature and Technology in the World Religions P. Koslowski, 2013-06-29 Technology and the control of nature have arisen from the endeavor to reduce the neediness of human life Since this reduction is also the goal of religions there is a necessary proximity between religion and technology The relationship of humans to nature and technology is an object of religious doctrine and ethics in all of the world's religions The interpretations and the norms of the treatment of nature in economy and technology but also the veneration of nature in nature mysticism and its elevation in cult and sacrament are forms of expression of the relationship to nature in religions The development of the modern control of nature through technology appears to be connected to the biblical commission to rule over nature Buddhism and Hinduism however also interpret technology and

human control of nature Technological power raises the question of how the normativeness of the created order intended by religion s concept of creation relates to the human freedom to reshape creation What answers do religions give to the question of the humane form of technology and the limits to technological power and human control of nature Leading scholars of Judaism Christianity Islam Hinduism and Buddhism have created with this volume a first hand source of information which enables the reader to gain a better understanding of these five world religions and their teachings on nature and technology

Accommodation and Acceptance Ambrose Mong,2015-12-31 As Hans Kung said No peace among the nations without peace among the religions No peace among the religions without dialogue between the religions No dialogue between the religions without investigation of the foundations of the religions Accommodation and Acceptance is a crucial work in both promoting interreligious dialogue and exploring the turbulent history of Christian faith and identity in Asia down the years From the reaction to missions often inextricably linked with the practice of colonialism to the rise of religious pluralism Ambrose Mong examines the relationships between the leading faiths of Asia up to the present day Whether practicing pluralism or exclusivism the history of Christianity in Asia is long and fascinating AmbroseMong delves into the biography of intercultural pioneers like Matteo Ricci and Timothy Richard to understand better the theology as well as the pragmatism behind cultural accommodation and the necessary mutability of an eternal church

Religion and Democracy Carsten Ankar,2021-11-29 This fully updated new edition empirically assesses the relationship between religion and democracy looking at global regional and individual countries perspectives Using a wide range of quantitative data the author tests the validity of Huntington s claim that democracy and religion are tightly

connected and that western Christianity is the only religion capable of supporting democratic institutions He evaluates both the broader assumptions that the introduction and the stability of a democratic form of government is dependent on the dominating religion in the country at the macro level and the suggestion that at the individual level religious adherence is related to pro democratic values Examining religions including Christianity Islam Buddhism Hinduism Chinese folk religion and Judaism this book demonstrates that geographical and political contexts are more important than religious affiliation for explaining levels of and attitudes towards democracy As well as offering a broad empirical picture of the relationship between religion and democracy this new edition delves deeper into the religion state nexus focusing particularly on events that have taken place during the last decade The author explores how religion is used instrumentally by political leaders in different parts of the world He also discusses the extent to which religious minorities are under increasing pressure in secularized environments prospects for democracy in the MENA region a decade after the Arab Spring the growing influence of evangelical Christianity in Latin America and how increasing levels of religious conflict in Asia and the Pacific as well as in Sub Saharan Africa pose a threat to the emergence and survival of democracy This book will be of great interest to students academics and researchers within the field of comparative politics as well as journalists and various theological associations
