The Laws of Trading Agustin Lebron, 2019-06-18 Every decision is a trade Learn to think about the ones you should do and the ones you shouldn't Trading books generally break down into two categories the ones which claim to teach you how to make money trading and the memoir style books recounting scandals and bad behavior But the former don't have profitable trades to teach if they did they'd keep those trades to themselves And the latter are frequently entertaining but they don't leave you with much you can apply in your own life The Laws of Trading is different All of our relationships and decisions involve trading at some level This is a book about decision making through the lens of a professional prop trader For years behavioral and cognitive scientists have shown us how human decision making is flawed and biased But how do you learn to avoid these problems in day to day decisions where

Other People's Money John Kay, 2015-09-22 The finance sector of Western economies is too large and attracts too many of the smartest college graduates Financialization over the past three decades has created a structure that lacks resilience and supports absurd volumes of trading The finance sector devotes too little attention to the search for new investment opportunities and the stewardship of existing ones and far too much to secondary market dealing in existing assets Regulation has contributed more to the problems than the solutions Why What is finance for John Kay with wide practical and academic experience in the world of finance understands the operation of the financial sector better than most He believes in good banks and effective asset managers but good banks and effective asset managers are not what he sees In a dazzling and revelatory tour of the financial world as it has emerged from the wreckage of the 2008 crisis Kay does not flinch in his criticism we do need some of the things that Citigroup and Goldman Sachs do but we do not need Citigroup and Goldman to do them And many of the things done by Citigroup and Goldman do not need to be done at all The finance

sector needs to be reminded of its primary purpose to manage other people's money for the benefit of businesses and households. It is an aberration when some of the finest mathematical and scientific minds are tasked with devising algorithms for the sole purpose of exploiting the weakness of other algorithms for computerized trading in securities. To travel further down that road leads to ruin. A Financial Times Book of the Year 2015. An Economist Best Book of the Year 2015. A Bloomberg Best Book of the Year 2015.
