Humanism, English Literature, and the Translation of Greek, 1430-1560 John Colley, 2025-04-10 Humanism English Literature and the Translation of Greek 1430 1560 is the first study to trace the influence of the Quattrocento rebirth of Greek scholarship on fifteenth and sixteenth century English literature It begins with the first signs of humanist Greek in England in and around Duke Humfrey s circle at a time when no English writer could claim significant Greek literacy It ends on the cusp of Elizabethan literary culture when English writers much more frequently translated Ancient Greek into both Latin and the vernacular This period witnessed a surge in the translation of Greek It also witnessed changing beliefs about how and why Greek should be translated at all especially under the growing pressures of the Reformation Building on scholarship in the fields of classical reception translation studies and intellectual history the volume argues that attending to the period s ideas about Greek translation fundamentally alters our perception of Tudor humanism and the classical tradition more widely In linking biblical and patristic translation with the translation of works by pagan authors the book shows that Renaissance humanism was less secular and more wide ranging in its goals and interest than the standard scholarly narrative has claimed By showing continuities between late medieval and early modern literature it further revises arguments for the novelty of the sixteenth century humanists The book ultimately argues that fifteenth and sixteenth century English writers experienced a contradictory relationship to Greek Desire for the language and what it stood for was tempered by the realities of its mediated transmission Desire for Greek was also undercut by the sectarian divisions that the language came to reflect and magnify

String, 2017-07-05 Exploring the intersection between art and political ideology this innovative study of art in Henrician England sheds new light on the ways in which Henry VIII and his advisers exploited visual images in order to communicate ideas to his subjects The works analyzed include water triumphs coronation pageants and funeral processions printed title pages of vernacular Bibles coins portrait miniatures and murals as well as panel paintings With her analysis of these categories of objects and using communication theory as a starting point String presents a new model of communication
