New Trends in Nonlinear Dynamics and Control, and their Applications Wei Kang, Mingqing

Xiao, Carlos Borges, 2003-09-16 A selection of papers exploring a wide spectrum of new trends in nonlinear dynamics and control such as bifurcation control state estimation and reconstruction analysis of behavior and stabilities dynamics of nonlinear neural network models and numerical algorithms The papers focus on new ideas and the latest developments in both theoretical and applied research topics of nonlinear control Because many of the authors are leading researchers in their own fields the papers presented in this volume reflect the state of the art in the areas of nonlinear dynamics and control Many of the papers in this volume were first presented at the highly successful Symposium on New Trends in Nonlinear Dynamics and Control and Their Applications held October 18 19 2002 in Monterey California Feedback Control of MEMS to Atoms Jason J. Gorman, Benjamin Shapiro, 2011-12-17 Control from MEMS to Atoms illustrates the use of control and control systems as an essential part of functioning integrated systems The book is organized according to the dimensional scale of the problem starting with micro scale systems and ending with atomic scale systems Similar to macro scale machines and processes control systems can play a major role in improving the performance of micro and nano scale systems and in enabling new capabilities that would otherwise not be possible However the majority of problems at these scales present many new challenges that go beyond the current state of the art in control engineering This is a result of the multidisciplinary nature of micro nanotechnology which requires the merging of control engineering with physics biology and chemistry
