Social Science And Policymaking A Search For Relevance In The Twentieth Century:

Social Science and Policy-Making David Lee Featherman, Maris Arvids Vinovskis, 2009-12-21 How the social sciences in America were developed as a means of social reform **Scholars, Policymakers, and International Affairs** Abraham F. Lowenthal, Mariano E. Bertucci, 2014-11-24 *Scholars Policymakers and International Affairs* shows how to build mutually beneficial connections between the worlds of ideas and action analysis and policy Drawing on contributions from top international scholars with policy experience as well as senior policymakers Abraham F Lowenthal and Mariano E Bertucci make the case that scholars can both strengthen their research and contribute to improved policies while protecting academia from the risks of active participation in the policy process Many scholars believe that policymakers are more interested in processes and outcomes than in understanding causality Many policymakers believe that scholars are absorbed in abstract and self referential debates and that they are primarily focused on crafting theories rather than developing solutions to pressing policy issues The book's contributors discuss how these obstacles can be overcome Case studies illustrate how scholars have helped reduce income inequality promote democratic governance and enhance inter American cooperation These success stories are balanced by studies on why academic analysts have had little positive impact on counternarcotics and citizen security policies The conclusion identifies best practices and provides concrete recommendations Book jacket A Handbook for Social Science Field Research Ellen Perecman, Sara R. Curran, 2006-01-24 *A Handbook for Social Science Field Research* Essays as well as a perfect lightweight handbook for all researchers and professionals interested in having a comprehensive collection of bibliographic information for social science research

Evidence-Based Policymaking Karen Bogenschneider, Thomas Corbett, 2011-01-11 This book is for those who believe that good government should be based on hard evidence and that research and policy ought to go hand in hand Unfortunately no such bond exists Rather there is a substantial gap some say chasm between the production of knowledge and its utilization Despite much contrary evidence the authors propose there is a way of doing public policy in a more reflective manner and that a hunger for evidence and objectivity does exist The book is pragmatic drawing on advice from some of the best and brightest informants from both the research and policy communities In their own voices researchers provide incisive analysis about how to bridge the research policy divide and policymakers provide insights about why they use research what kind is most useful where they seek it and how they screen its quality The book breaks through stereotypes about what policymakers are like and provides an insiders view of how the policy process really works Readers will learn what knowledge skills approaches and attitudes are needed to take research findings from the laboratory to lawmaking bodies and how to evaluate one's success in doing so The book's balance between theory and practice will appeal to students in graduate and upper level undergraduate courses in family studies and family policy educational policy law political science public administration public health social work and sociology This book will also be of interest to researchers

who want to bring their ideas into policy debate and to those who work with policymakers to advance an evidence based policy agenda

Power, Knowledge, and Politics John A. Hird, 2005-03-29 If knowledge is power then John Hird has opened the doors for anyone interested in public policymaking and policy analysis on the state level A beginning question might be does politics put gasoline or sugar in the tank More specifically in a highly partisan political environment is nonpartisan expertise useful to policymaking Do policy analysts play a meaningful role in decision making Does policy expertise promote democratic decision making Does it vest power in an unelected and unaccountable elite or does it become co opted by political actors and circumstances Is it used to make

substantive changes or just for window dressing In a unique comparative focus on state policy Power Knowledge and Politics dissects the nature of the policy institutions that policymakers establish and analyzes the connection between policy research and how it is actually used in decision making Hird probes the effects of politics and political institutions parties state political culture and dynamics legislative and gubernatorial staffing partisan think tanks interest groups on the nature and conduct of nonpartisan policy analysis Through a comparative examination of institutions and testing theories of the use of policy analysis Hird draws conclusions that are more useful than those derived from single cases Hird examines nonpartisan policy research organizations established by and operating in U S state legislatures one of the most intense of political environments to determine whether and how nonpartisan policy research can survive in that harsh climate By first detailing how nonpartisan policy analysis organizations came to be and what they do and then determining what state legislators want from them he presents a rigorous statistical analysis of those agencies in all 50 states and from a survey of 800 state legislators This thoroughly comprehensive look at policymaking at the state level concludes that nonpartisan policy analysis institutions can play an important role as long as they remain scrupulously nonpartisan
