Explorations in the Socio Bio Social Chain **Emotions** Monica Greco,Paul Stenner,2013-10-31 Are emotions becoming
more conspicuous in contemporary life Are the social sciences undergoing an an affective turn This Reader gathers
influential and contemporary work in the study of emotion and affective life from across the range of the social sciences
Drawing on both theoretical and empirical research the collection offers a sense of the diversity of perspectives that have
emerged over the last thirty years from a variety of intellectual traditions Its wide span and trans disciplinary character is
designed to capture the increasing significance of the study of affect and emotion for the social sciences and to give a sense
of how this is played out in the context of specific areas of interest The volume is divided into four main parts universals and
particulars of affect embodying affect political economies of affect affect power and justice Each main part comprises three
sections dedicated to substantive themes including emotions history and civilization emotions and culture emotions selfhood
and identity emotions and the media emotions and politics emotions space and place with a final section dedicated to themes
of compassion hate and terror Each of the twelve sections begins with an editorial introduction that contextualizes the
readings and highlights points of comparison across the volume Cross national in content the collection provides an
introduction to the key debates concepts and modes of approach that have been developed by social scientist for the study of

Gender, Emotion, and the Family Leslie Brody, 2009-07-01 Do women express their feelings more than men Popular stereotypes say they do but in this provocative book Leslie Brody breaks with conventional wisdom Integrating a wealth of perspectives and research biological sociocultural developmental her work explores the nature and extent of gender differences in emotional expression as well as the endlessly complex question of how such differences come about Nurture far more than nature emerges here as the stronger force in fashioning gender differences in emotional expression Brody shows that whether and how men and women express their feelings varies widely from situation to situation and from culture to culture and depends on a number of particular characteristics including age ethnicity cultural background power and status Especially pertinent is the organization of the family in which boys and girls elicit and absorb different emotional strategies Brody also examines the importance of gender roles whether in the family the peer group or the culture at large as men and women use various patterns of emotional expression to adapt to power and status imbalances Lucid and level headed Gender Emotion and the Family offers an unusually rich and nuanced picture of the great range of male and female emotional styles and the variety of the human character

The First Political Order Valerie M. Hudson, Donna Lee Bowen, Perpetua Lynne Nielsen, 2020-03-17 Global history records an astonishing variety of forms of social organization Yet almost universally males subordinate females How does the relationship between men and women shape the wider political order The First Political Order is a groundbreaking demonstration that the persistent and systematic subordination of women underlies all other institutions with wide ranging implications for global security and development Incorporating research findings spanning a variety of social science disciplines and comprehensive empirical data detailing the status of women around the globe the book shows that female subordination functions almost as a curse upon nations A society's choice to subjugate women has significant negative consequences worse governance worse conflict worse stability worse economic performance worse food security worse health worse demographic problems worse environmental protection and worse social progress Yet despite the pervasive power of social and political structures that subordinate women history and the data reveal possibilities for progress The First Political Order shows that when steps are taken to reduce the hold of inequitable laws customs and practices outcomes for all improve It offers a new paradigm for understanding insecurity instability autocracy and violence explaining what the international community can do now to promote more equitable relations between men and women and thereby security and peace With comprehensive empirical evidence of the wide ranging harm of subjugating women it is an important book for security scholars social scientists policy makers historians and advocates for women worldwide

Health, Coping, and Well-being Bram P. Buunk, Frederick X. Gibbons, A. Buunk, 2013-05-13 Over the past decades the field of health psychology has witnessed a tremendous growth and social psychologists have contributed substantially to the

theoretical foundation of this field Their research has focused on a wide variety of health relevant topics such as how individuals decide to respond to threats to their health and well being how and why they change their behavior to avoid such threats and especially how they adjust to or cope with the risk of threatening disease and with the diseases themselves As diverse as this literature may be however there does appear to be a common theme throughout much of it the observation that comparison of oneself and one's health status and coping efforts with others is an integral part of the coping process Consequently social comparison theory is increasingly becoming recognized as a fruitful framework for illuminating health related issues A still expanding literature is exploring the role of social comparisons with respect to coping with a wide range of health problems including cancer physical decline among the aged rheumatoid arthritis AIDS stress at work and occupational burnout and eating disorders Social comparison theory has augmented knowledge about the ways in which people cope with stressful events and thus has contributed significantly to it At a more basic level research in this applied context has made significant contributions to the development of social comparison theory itself The present volume presents an overview of the various ways in which social comparison theory has been applied to issues related to health coping and well being and also points out how these applications have contributed to our insight into the way humans employ social comparison information Given the attention paid to theoretical and applied issues this volume will appeal to a wide audience including social and health psychologists as well as therapists physicians clinicians medical sociologists nurses and those involved in the growing field of nursing research

Genes on the Couch Paul Gilbert, Kent G. Bailey, 2014-07-10

Philosophers and therapists have long theorised about how psychological mechanisms for love jealousy anxiety depression and many other human characteristics may have evolved over millions of years In the dawn of the new insights on evolution provided by Darwin's theories of natural selection Freud Jung and Klein sought to identify and understand human motives emotions and information processing as functions deeply rooted in our evolved history Despite this promising start and major developments in modern evolutionary psychology anthropology and sociobiology the last fifty years has seen little in the way of therapies derived from an evolutionary understanding of human psychology The contributors to this timely book illuminate how an evolution focused approach to psychopathology can offer new insights for different schools of therapy and provide a rationale for therapeutic integration Genes on the Couch brings together respected clinicians who have integrated evolutionary insights into their case conceptualisations and therapeutic interventions Various psychotherapy schools are represented and each author provides illustrative examples of the interventions used Specific topics addressed include the nature of evolved mental mechanisms regulation dysregulation of internal processes attachment and kinship in therapy the importance of internalising warmth as a therapeutic goal kin selection and incest avoidance co operation and deception in social relations difficulties in working with certain male clients gender differences in therapy and the roles of shame and guilt in treatment Providing up to date summaries of recent thinking in this increasingly important but diverse area Genes on the

Couch will be of interest to psychotherapists psychiatrists and a wide range of mental health professionals

Bullying in the Workplace John Lipinski, Laura M. Crothers, 2013-08-15 Bullying in the workplace is a phenomenon that has recently intrigued researchers studying management and organizational issues leading to such questions as why it occurs and what causes such harassment This volume written by experts in a wide range of fields including Industrial and Organizational psychology Counseling Management Law Education and Health presents research on relational and social aggression issues which can result in lost productivity employee turnover and costly lawsuits Understanding this phenomenon is important to managers and employee morale

Subordination and Defeat Leon Sloman, Paul Gilbert, 2000-03-01 Most people now accept that human beings are the product of millions of years of mammalian evolution and more recently primate evolution This landmark book explores the implications of our evolutionary history for theories and therapies of depression In particular the focus is on how social conflict has shaped various behavioral and psychophysiological systems Special attention is given to the evolved mechanisms for dealing with social defeat and subordination in both animals and humans By linking human depression to the activation of ancient psychobiological programs for dealing with social conflict one is able to understand the function of depression within groups family systems and between individuals and begin to distinguish depressions that may have adaptive functions from those that are the result of maladaptive feedback systems Although many acknowledge the need for an integrated biopsychosocial theory of psychopathology there continue to be great divisions among social psychological and biological approaches Sloman and Gilbert have brought together leading scientists and clinicians representing different disciplines and schools to present a provocative new evolutionary model of depression This model illuminates old problems in new ways links a common disabling condition to evolved mental mechanisms and points to potential new approaches to prevention and intervention The book will be of compelling interest to all those who study or treat mood disorders

Mystical Society Philip Wexler, 2018-03-05 In *Mystical Society* Philip Wexler a well known critical theorist with a background in social psychology and a special interest in spirituality examines the revitalization of spirituality manifesting itself in society and in education Describing what he calls cultural changes toward the sacred he documents a cultural shift brought about by technological and societal changes toward a new mysticism Wexler explores the meaning for this new spirituality for our daily lives for social theory and for education From the pervasiveness of a spiritual vernacular to the integration of spiritual practices into our highly individualized and technologized lives Wexler lays out the evidence for a growing movement and then draws parallels to periods of mystical revitalization from the past In the course of this discussion he draws on the work of Marx Weber and Durkheim as well as from contemporary social theory

The Encultured Brain Daniel H. Lende, Greg Downey, 2012-08-24 Basic concepts and case studies from an emerging field that investigates human capacities and pathologies at the intersection of brain and culture The brain and the nervous system are our most cultural organs Our nervous system is especially immature at birth our brain disproportionately small in relation to

its adult size and open to cultural sculpting at multiple levels Recognizing this the new field of neuroanthropology places the brain at the center of discussions about human nature and culture Anthropology offers brain science more robust accounts of enculturation to explain observable difference in brain function neuroscience offers anthropology evidence of neuroplasticity's role in social and cultural dynamics This book provides a foundational text for neuroanthropology offering basic concepts and case studies at the intersection of brain and culture After an overview of the field and background information on recent research in biology a series of case studies demonstrate neuroanthropology in practice Contributors first focus on capabilities and skills including memory in medical practice skill acquisition in martial arts and the role of humor in coping with breast cancer treatment and recovery then report on problems and pathologies that range from post traumatic stress disorder among veterans to smoking as a part of college social life Contributors Mauro C Balieiro Kathryn Bouskill Rachel S Brezis Benjamin Campbell Greg Downey Jos Ernesto dos Santos William W Dressler Erin P Finley Agust n Fuentes M Cameron Hay Daniel H Lende Katherine C MacKinnon Katja Pettinen Peter G Stromberg

Paradoxes of Gender Judith Lorber, 1994-01-01 In this pathbreaking book a well known feminist and sociologist who is also the Founding Editor of Gender why transvestites transsexuals and hermaphrodites do not affect the conceptualization of two genders and two sexes in Western societies why most of our cultural images of women are the way men see them and not the way women see themselves why all women in modern society are expected to have children and be the primary caretaker why domestic work is almost always the sole responsibility of wives even when they earn more than half the family income why there are so few women in positions of authority when women can be found in substantial numbers in many occupations and professions why women have not benefited from major social revolutions Lorber argues that the whole point of the gender system today is to maintain structured gender inequality to produce a subordinate class women that can be exploited as workers sexual partners childbearers and emotional nurturers Calling into question the inevitability and necessity of gender she envisions a society structured for equality where no gender racial ethnic or social class group is allowed to monopolize economic educational and cultural resources or the positions of power

The ^AOxford Handbook of Evolutionary Psychology and Behavioral Endocrinology Lisa L. M. Welling, Todd K. Shackelford, 2019-03-19 The Oxford Handbook of Evolutionary Psychology and Behavioral Endocrinology offers a comprehensive and compelling review of research on various topics within behavioral endocrinology from an evolutionary perspective on human psychology

The Violences of Men Jeff Hearn, 1998-07-28 Addressing the problem of men's violence to known women this book considers the scale of and critically reviews the theoretical frameworks used to explain this violence From the perspective of critical studies on men Jeff Hearn discusses issues challenges and possible research methods for those researching violence He draws on extensive research to analyze the various ways in which men describe deny justify and excuse their violence and considers the complex interaction between doing violence and talking about violence The book concludes with a summary of the key issues for theory politics

policy and practice **Delusions of Gender: How Our Minds, Society, and Neurosexism Create Difference** Cordelia Fine, 2011-08-08 Sex discrimination is supposedly a distant memory Yet popular books magazines and even scientific articles defend inequalities by citing immutable biological differences between the male and female brain Why are there so few women in science and engineering so few men in the laundry room Well they say it's our brains **Male Violence** John Archer, 2022-11-30 First published in 1994 Male Violence examines male violence as the major source of human suffering from a wide range of perspectives This book contains accessible contributions from a wide range of psychologists who have studied the many faces of male violence in childhood and adulthood on the street and in the home towards men women and children and in its sexual and non sexual forms These varied topics together with an emphasis on naturalistic rather than laboratory based investigations distinguish these researchers from those aiming to make generalizations about human aggression without considering the issues of sex and gender In doing so Male Violence raises fundamental questions about values which are accepted and unchallenged by the majority of people living in the modern world This book will be of interest to students of psychology sociology and gender studies
