Besides emphasizing the centrality of equitable economic growth and human resource development, themes like culture of growth, rising inequalities, misallocation of land and talent, developmental bureaucracy, judicial system, rent seeking, social capital, fiscal capacities and militancy etc. also find detailed exposition while exploring intimate causal connections of the said variables with economic growth. This book deals with three questions: What have been the trends of inequality in Asia and the Pacific? What are the key drivers of rising inequality in the region? How should Asian countries respond to the rising inequality? Technological change, globalization and market oriented reform have been the key drivers of Asia's remarkable growth and poverty reduction but they have also had significant distribution consequences. These three drivers of growth cannot be hindered because they are the sources of productivity improvement and betterment of quality of life. This book will be useful to those interested in policy options that could be deployed by Asian countries in confronting rising inequality. *Trade Policy, Growth and Poverty in Asian Developing Countries* Kishor Sharma, 2003-12-08 This new book provides a selection of writings that cover trade, equity and development in Asia.
