Social Dimensions of U.S. Trade Policies Alan Verne Deardorff, Robert Mitchell Stern, 2000-01-21 divTrade policy experts convene to explore the social ramifications of the United States international trade policy DIV *Corporate versus National Interest in US Trade Policy* Richard L. Bernal, 2020-10-31 This book provides a history of the WTO US EU banana dispute through the lens of a major actor the US owned multinational firm Chiquita Brands International It documents and explains how Chiquita succeeded in having the Clinton administration pursue a trade policy of forcing the European Union to dismantle its preferential banana import regime for exports from the small English speaking Caribbean ESC countries The export of bananas was critically important to the social stability and economic viability of these countries and that was in the national security interest of the United States The experience indicates that succeeding in this goal was detrimental to U S national security interest in the Caribbean

Intellectual Property Thomas Cottier, Petros Constantinou Mavroidis, Marion Panizzon, 2010-04-23 The incorporation of intellectual property protection into the WTO international trading system has been a milestone in international economic law and has added a new dimension to trade regulation new rights and obligations and new challenges alike The contributors leading scholars and practitioners in the field provide insights into the legal relationship of the TRIPs Agreement to the GATT 94 and the GATS The book widens the debate with a thorough discussion on pending and unresolved relations of TRIPs the WTO UPOV the Convention on Biodiversity and Farmers Rights contained in the FAO International Undertaking and efforts of the World Bank GCIAR system including IPGRI What will be the impact of TRIPs on ownership of plant genetic resources Largely a victory for OECD countries the present state of intellectual property rights has important implications for developing countries The incorporation of intellectual property rights into the WTO system will eventually change the relationship of trade competition and intellectual property It will equally have to assist in providing equitable sharing of benefits in the use

of plant genetic resources All of these issues are essential for the revision of exclusions from patenting in TRIPs This volume offers insights into how this difficult task could and should be approached in a balanced manner and will be essential reading for economists and trade and intellectual property lawyers interested in the subject Moreover the volume will be relevant to agricultural economists as it addresses complex problems in the interstices of trade intellectual property plant genetic resources and sustainable development Thomas Cottier is Professor of European and International Economic Law University of Bern and Managing Director World Trade Institute University of Bern Petros C Mavroidis is Professor of Law University of Neuchâtel He formerly worked in the Legal Affairs Division of the World Trade Organization Marion Panizzon is Research Fellow University of Bern Simon Lacey is Research Fellow University of Bern *Reluctant Partners* Andrew Gardner Brown, 2009-12-21 Examines how and why nations have succeeded in forming cooperative trade arrangements

Trading System Ramesh Adhikari, Premachandra Athukoralge, 2002-01-01 Experience suggests that trade liberalization has contributed substantially to the remarkable growth of industrialized countries However for various reasons many developing countries have not yet been able to integrate successfully into global markets and reap the growth inducing and poverty reducing benefits of trade This book argues that while developing countries are heavily represented in the WTO accounting for about four fifths of its membership there is still plenty of scope for the world trading system to work more effectively in their interests
