Social Futures Global Visions:

Social Futures, Global Visions Cynthia Hewitt de Alcantara, 1996-08-08 Where is the world heading at the turn of the twenty first century Towards a desolate landscape of disintegrating societies or towards the construction of new institutions to mitigate violence reduce poverty and promote peace in a rapidly changing global context Do ideas of globalization reflect reality and how far are they either new or helpful Can trends identified in the near and distant past be helpfully extrapolated to predict the future and to understand the present Ralf Dahrendorf Amitai Etzioni Johan Galtung Anthony Giddens Eric Hobsbawm Fatima Mernissi Tetsuo Najita Emma Rothschild Wole Soyinka and Tatyana Tolstaya take up these and other questions and provide some searching and provocative answers Their discussions span academic disciplines and continents to provide a truly international dialogue on the future of humankind *Social Movements in Development* Staffan Lindberg, Arni Sverrisson, 2016-07-27 Nationalist movements in the South have been superseded by a plethora of different social movements This book examines these new movements and considers emerging paradigms of organization and mobilization which are related to the role movements play in economic and political development The book analyzes a number of cases and their context and discusses the implications for social movement theory The focus is on social movements among underprivileged and middle class groups and the book is global in scope Global Citizenship Nigel Dower, John Williams, 2016-04-22 The idea of global citizenship is that human beings are citizens of the world Whether or not we are global citizens is a topic of great dispute however those who take part in the debate agree that a global citizen is a member of the wider community of humanity the world or a similar whole which is wider than that of a nation state or other political community of which we are normally thought to be citizens Through four main sections the contributors to Global Citizenship discuss global challenges and attempt to define the ways in which globalization is changing the world in which we live Offering a breadth of coverage to the core theme of the individual in a global world Global Citizenship combines two factors the idea of global responsibility and the development of institutional structures through which this responsibility can be exercised **Global Nation?** John Wiseman, 1998-11-13 Globalisation was one of the most ubiquitous buzzwords of the late twentieth century yet its meaning was often elusive Retrenchments trade alliances global warming currency devaluations and so on are often explained as unavoidable consequences of globalisation and even everyday things from the food we eat to the television we watch and the clothes we wear are apparently impacted upon by globalisation This 1998 book provides an accessible exploration of the meanings and implications of globalisation The discussion is carefully grounded in the changing social economic ecological and political relationships of Australia Global Nation also looks at a range of existing and potential responses to the globalisation process arguing that there may be alternatives even though we are increasingly told that there are not **Long-range Futures Research** Robert H. Samet, 2009-03-24 This highly readable study explains how complexity science provides an evolutionary model for the civil system with a new world view

that out ranges United Nations reference scenarios to beyond 2150 *Routledge Handbook of Social Futures* Carlos López Galviz, Emily Spiers, 2021-11-22 Featuring chapters from an international range of leading and emerging scholars this Handbook provides a collection of cutting edge interdisciplinary research that sheds new light on contemporary futures studies Engaging with key defining questions of the early twenty first century such as climate change big data AI the future of economics education mental health cities and more the Handbook provides a review and synthesis of futures scholarship highlighting the role that societies can and should play in their making While the various chapters demonstrate how futures emerge and take shape in particular places at particular times the distinctive insight provided by the volume overall is that futures thinking today must be social and contextual By presenting a range of futures work from contexts around the globe the Handbook contextualizes techniques forecasting backcasting scenario planning collaboration and co production to ask how different dimensions of the social are created and circulated in the process Through its thirty chapters the volume explores and interrogates narratives anticipations enactments ecologies collaborations prospectations and so on to highlight which versions of the social are legitimized and which are encouraged and foreclosed This Handbook opens an important conversation about the centrality of the social in futures thinking By bringing arts humanities and social sciences scholars and practitioners into conversation with biologists environmental climate and computer scientists this volume seeks to encourage new pathways across between and within multiple disciplines to interrogate the futures we need and want The social must be our starting point if we are to steer our planet in a direction that supports good lives for the many everywhere

Community Analysis and Practice Josefina Figueira-McDonough, 2013-05-13 Concentrating on three main themes environmental complexity community as the target of intervention and commitment to social justice Community Theory and Practice updates and expands the current boundaries of thinking about community organization This book is an important resource for social work students educators and practitioners as well as those who work in the areas of sociology urban studies community organization and development and criminology and other areas of social study and policy **Nursing Practice, Policy and Change** Marjorie Gott, 2018-10-08 Many drugs requiring intravenous infusion are used in situations where precise and rapid administration are essential A simple miscalculation can easily lead to a massive error in dose administration with disastrous medical consequences This is the living nightmare of every sleep deprived junior doctor Intravenous Infusions A Guide To Their Calculation contains the vital information which doctors nurses and pharmacists need on those occasions demanding quick decisions It could save lives **Routledge Encyclopedia of International Political Economy** R. J. Barry Jones, 2002-09-11 This three volume Encyclopedia offers the first comprehensive and authoritative survey of the rapidly developing field of international political economy Its entries cover the major theoretical issues and analytical approaches within the field The set also provides detailed discussion of the contributions of key individuals and surveys a wide range of empirical conditions and developments within the global political economy including its major

institutions The Encyclopedia has been designed to be eclectic in approach and wide ranging in coverage Theoretical entries range from discussions of the definition and scope of the field through core methodological questions such as rationalism and the structure agent problem to surveys of the major theories and approaches employed in the study of the international political economy *Territoriality in the Globalizing Society* J.v. Hagen, Stefan Immerfall, 2012-12-06 Globalization is one of the buzz words in the 1990s It points to a world in which geographic location becomes increasingly irrelevant a vision that has aroused both hopes and fears Surprisingly globalization is accompanied by increasing regionalization This volume is a timely contribution to the debate on globalization and regionalism Coming from several disciplines its contributors explore the consequences of a world with no geographical barriers Refuting simple notions of globalization they argue that location and space will remain important dimensions of economic and social development In view of this the book develops a more balanced view of the tension between globalization and regionalism **Building a Heaven on Earth** Albert L.

Park, 2014-12-31 Why and how did Korean religious groups respond to growing rural poverty social dislocation and the corrosion of culture caused by forces of modernization under strict Japanese colonial rule 1910 1945 Questions about religion s relationship and response to capitalism industrialization urbanization and secularization lie at the heart of understanding the intersection between colonialism religion and modernity in Korea Yet getting answers to these questions has been a challenge because of narrow historical investigations that fail to study religious processes in relation to political economic social and cultural developments In *Building a Heaven on Earth* Albert L Park studies the progressive drives by religious groups to contest standard conceptions of modernity and forge a heavenly kingdom on the Korean peninsula to relieve people from fierce ruptures in their everyday lives The results of his study will reconfigure the debates on colonial modernity the origins of faith based social activism in Korea and the role of religion in a modern world *Building a Heaven on Earth* in particular presents a compelling story about the determination of the Young Men s Christian Association YMCA the Presbyterian Church and the Ch ndogyo to carry out large scale rural movements to form a paradise on earth anchored in religion agriculture and a pastoral life It is a transnational story of leaders from these three groups leaning on ideas and systems from countries such as Denmark France Japan and the United States to help them reform political economic social and cultural structures in colonial Korea This book shows that these religious institutions provided discursive and material frameworks that allowed for an alternative form of modernity that featured new forms of agency social organization and the nation In so doing *Building a Heaven on Earth* repositions our understandings of modern Korean history Fighting Back Charlie Fox, 2016-06-03 Work for the Dole is not a new idea It was introduced in Victoria in 1932 and became one of the battlegrounds of unemployed politics The provision and administration of sustenance relief work eviction of tenants from their homes the issue of free speech these were the major issues confronting unemployed workers and their families and organisations and they fought successive governments over each one Written in a pleasingly clear and accessible style this

absorbing work shows how complex unemployed politics was and situates it in the long history of agitation by unemployed workers. It takes issue with the prevailing historical orthodoxy that unemployed workers in Australia during the Great Depression were introspective, politically apathetic and concerned only with survival. It shows that to the contrary they were active, organised and remarkably successful in their aims. It also shows that government unemployment relief was as much a product of this agitation as it was of government policies and preferences. Yet the movement was always pulled in other directions by the hunger and poverty of its members, by their need simply to survive, by the disengagement that accompanies individual powerlessness and by resignation in the face of such an incomprehensible disaster. That a creative, often extensive and vigorous unemployed movement could exist in such circumstances in a decade of the worst poverty Australia has known is surely a tribute to the courage and resistance of the men and women who made unemployed politics. Fox's book takes a complex look at the actual politics of the unemployed in the Great Depression, a subject which for various reasons. Hence it represents a substantial revision of the existing historiography.

Ordinary Economies in Japan Tetsuo Najita, 2009-09-16

Ordinary Economies in Japan directs our attention to a subordinate yet powerful theme in modern Japanese economic thought that appeared unobtrusively in the mid Tokugawa period and found expression in the formation of voluntary non-hierarchical associations of commoners who purposively organized their self-help activities apart from state authority. Tetsuo Najita's compelling analysis of it is groundbreaking and explains a great deal about Japanese modernization that economic historians have overlooked or undervalued. Stephen Vlastos, University of Iowa.

Postsecular Cities Justin

Beaumont, Christopher Baker, 2011-06-16 This book reflects the wide spread belief that the twenty-first century is evolving in a significantly different way to the twentieth which witnessed the advance of human rationality and technological progress including urbanisation and called into question the public and cultural significance of religion. In this century, by contrast, religion, faith, communities and spiritual values have returned to the centre of public life, especially public policy, governance and social identity. Rapidly diversifying urban locations are the best places to witness the emergence of new spaces in which religions and spiritual traditions are creating both new alliances but also bifurcations with secular sectors. Postsecular Cities examines how the built environment reflects these trends. Recognizing that the turn to the postsecular is a contested and multifaceted trend, the authors offer a vigorous, open but structured dialogue between theory and practice, but even more excitingly between the disciplines of human geography and theology. Both disciplines reflect on this powerful but enigmatic force shaping our urban humanity. This unique volume offers the first insight into these interdisciplinary and challenging debates.

NGO Field Workers in Bangladesh Mokbul Morshed Ahmad, 2017-11-22 This title was first published in 2002. NGOs are receiving increasing international attention and resources from policy makers, donors, academics and others. The New Policy Agenda accepts NGOs as agents for social welfare alongside the state and as fostering democracy in the Developing World. Astonishingly, however, there have been very few studies and no books on NGO field workers. This study of

field workers in Bangladesh provides excellent insights into this neglected field Bangladesh is an excellent example as since independence in 1971 it has been a donor dependent country both financially and functionally and since the 1980s has concentrated this funding towards NGOs rather than to the state The book shows how field workers are seen simply as implementers carrying out directions given by their superiors and never being consulted on how best to achieve their goals The book examines four types of NGOs international national regional and small local in a number of sample locations It compares the benefits and facilities provided by each NGO to their field workers then explores the socio economic background of both field workers and their mid level managers and examines the interactions between these two groups and between field workers and their clients It also looks at the field workers personal and professional lives and problems and details their opinions on their NGO s activities and policies and on development The findings show that NGO managers and donors lack knowledge of the realities in the field and do not realise how certain policies such as their positive discrimination of women can have negative results It proposes that NGO field workers should be more active in policy making and puts forward several recommendations for changes in the management and structure of future NGOs **Development Theory**

Jan Nederveen Pieterse,2010 Written by one of the leading authorities in the field the Second Edition of this successful book Situates students in the expanding field of development theory Provides an unrivalled guide to the strengths and weaknesses of competing theoretical approaches Explains key concepts Examines the shifts in theory Offers an agenda for the future In this book the author brings a huge range of experience and knowledge about the relationship between the economically advanced and the emerging developing nations **Rule and Rupture** Christian Lund,Michael Eilenberg,2017-07-11 Rule

and Rupture State Formation Through the Production of Property and Citizenship examines the ways in which political authority is defined and created by the rights of community membership and access to resources Combines the latest theory on property rights and citizenship with extensive fieldwork to provide a more complex nuanced assessment of political states commonly viewed as weak fragile and failed Contains ten case studies taken from post colonial settings around the world including Cambodia Nepal Indonesia Afghanistan Rwanda Somalia Democratic Republic of Congo Colombia and Bolivia Characterizes the results of societal ruptures into three types of outcomes for political power reconstituted and consolidated challenged and fragmented Brings together exciting insights from a global group of scholars in the fields of political science development studies and geography **Transition and Justice** Gerhard Anders,Olaf Zenker,2014-12-23 Transition and

Justice examines a series of cases from across the African continent where peaceful new beginnings were declared after periods of violence and where transitional justice institutions helped define justice and the new socio political order Offers a new perspective on transition and justice in Africa transcending the institutional limits of transitional justice Covers a wide range of situations and presents a broad range of sites where past injustices are addressed Examines cases where peaceful new beginnings have been declared after periods of violence Addresses fundamental questions about transitions and justice

in societies characterized by a high degree of external involvement and internal fragmentation *Newly Emerging Needs of Children* N. J. A. van Oudenhoven, Rekha Wazir, 2006 Wat een kind nodig heeft is aan het veranderen en ook de wereld verandert en is duidelijk veel kleiner geworden Met de steun van Plan Netherlands willen de auteurs bevindingen uit de ontwikkelingspsychologie en eigen participerend onderzoek in India Kenia Nicaragua en Nederland aanreiken aan humanitaire organisaties De nieuwe noden zien ze vooral in de gelijke behandeling van de vrouw en de opkomst van girl power het verdwijnen van traditionele structuren waardoor maatschappelijke instabiliteiten ontstaan de schrikbarende groeiende seksuele exploitatie van kinderen de vermenging van het reële en virtuele de mogelijkheid van totaal nieuwe levensstijlen in een geglobaliseerde wereld De auteurs verbinden concrete ontwikkelingen steeds met de veranderende visies en theorieën over kinderen Sanctuaries of the City Anni Greve, 2016-04-01 This book proposes that we can learn from Tokyo about the intrinsic importance of in between realms to an international culture the sanctuaries It argues that certain urban societies are more robust than others because they offer socio spatial capacities that enable the development of skills for coping with modern forms of living It studies places that may open the way to an international culture namely market places venues for performing arts and religious sites which with particular reference to the Durkheimian tradition are considered here in their quality as sanctuaries From its empirical analysis of such sanctuaries in Tokyo this book develops a more general theory about mega cities urban sociability and identity
