Brian Newsome, 2009 French Urban Planning 1940 1968 explores the creation and progressive dismantling of France's centralized authoritarian system of urban and architectural planning Established in the wake of World War II to facilitate the reconstruction and expansion of cities this planning program led to the evolution of large suburban housing estates plagued by inter intra family conflict juvenile delinquency and other social difficulties which sociologists connected to poor planning and design Critics began calling for the democratization of planning to remedy design problems and the government of Charles de Gaulle started reforming planning procedures in the late 1950s and early 1960s This book moves beyond technical and political issues to explore forces of religion gender and class that affected planning practices Key critics and state officials emerged from the Catholic Left Some were women from working class backgrounds and they manipulated gender stereotypes to insert working and middle class women into the design process Sometimes in opposition but often together these reformers initiated the most significant change of architectural and urban planning until the introduction of François Mitterrand's decentralization reforms in the 1980s French Urban Planning 1940 1968 will appeal to scholars and students interested in architectural urban and social trends in twentieth century France *Élie Halévy* K. Steven Vincent, 2020-05-29 An intellectual biography of the renowned and influential observer of the era of tyrannies Élie Halévy 1870 1937 was one of the most respected and influential intellectuals of the French Third Republic In this densely contextualized biography K Steven Vincent describes how Halévy best remembered as the historian of British Utilitarianism and nineteenth century English history was also a persistent acute and increasingly anxious observer of society in a period defined by industrialization and imperialism and by what Halévy famously called the era of tyrannies Vincent distinguishes three broad phases in the development of Halévy's thought In the first Halévy brought his version of neo Kantianism to debates with sociologists and philosophers and to his study of English Utilitarianism He forged ties with Xavier Léon Léon Brunschvicg and Alain Finkielkraut Auguste Chartier life long intellectual interlocutors Together they founded the *Revue de métaphysique et de morale* a continuing venue for Halévy's reflections The Dreyfus Affair Vincent argues caused Halévy to shift his focus from philosophy to history and from metaphysics to politics He became a philosopher historian less interested in abstract neo Kantianism and more in real world action less given to rarified debates over truth and more to investigation of how theories and their applications were situated within broader political economic and cultural movements World War I and its destabilizing effects provoked the third phase Vincent explains As he watched reason recede before rabid nationalism and a pox of political enthusiasms Halévy sounded the alarm about liberal democracy's vulnerabilities Vincent situates Halévy on

the unsteady and narrowing middle ground between state socialism and fascism showing how he defended liberalism while at the same time appreciating socialists analyses of capitalism s negative impact and their calls for reform and greater economic equality Through his analysis of Hal vy s life and works Vincent illuminates the complexity of the Third Republic s philosophical historical and political thought and concludes with an incisive summary of the distinctive nature of French liberalism

Women in International and Universal Exhibitions, 1876-1937 Rebecca Rogers, Myriam Boussahba-Bravard, 2017-08-14 This book argues for the importance of bringing women and gender more directly into the dynamic field of exposition studies Reclaiming women for the history of world fairs 1876-1937 it also seeks to introduce new voices into these studies dialoguing across disciplinary and national historiographies From the outset women participated not only as spectators but also as artists writers educators artisans and workers without figuring among the organizers of international exhibitions until the 20th century Their presence became more pointedly acknowledged as feminist movements developed within the Western World and specific spaces dedicated to women s achievements emerged International exhibitions emerged as showcases of modernity and progress but also as windows onto the foreign the different the unexpected and the spectacular As public rituals of celebration they transposed national ceremonies and protests onto an international stage For spectators exhibitions brought the world home for organizers the entire world was a fair Women were actors and writers of the fair narrative although acknowledgment of their contribution was uneven and often ephemeral Uncovering such silence highlights how

A Nation Among Nations Thomas Bender, 2025-09-23 A provocative new book that shows us why we must put American history firmly in a global context from 1492 to today Americans like to tell their country's story as if the United States were naturally autonomous and self-sufficient with characters, ideas, and situations unique to itself Thomas Bender asks us to rethink this exceptionalism and to reconsider the conventional narrative He proposes that America has grappled with circumstances, doctrines, new developments, and events that other nations too have faced and that we can only benefit from recognizing this Bender's exciting argument begins with the discovery of the Americas at a time when peoples everywhere first felt the transforming effects of oceanic travel and trade He then reconsiders our founding Revolution occurring in an age of rebellion on many continents the Civil War happening when many countries were redefining their core beliefs about the nature of freedom and the meaning of nationhood and the later imperialism that pitted the United States against Germany, Spain, France, and England Industrialism and urbanization, laissez-faire economics, capitalism, and socialism, and new technologies are other factors that Bender views in the light of global developments *A Nation Among Nations* is a passionate, persuasive book that makes clear what damage is done when we let the old view of America alone in the world falsify our history Bender boldly challenges us to think beyond our borders

French Sociology Johan Heilbron, 2015-11-06 French Sociology offers a uniquely comprehensive view of the oldest and still one of the most vibrant national traditions in sociology Johan Heilbron covers the development of sociology in France from its beginnings in the early nineteenth century through the discipline's expansion in the late twentieth century tracing the careers of figures from Auguste Comte to Pierre Bourdieu Presenting fresh interpretations of how renowned thinkers such as mile Durkheim and his collaborators defined the contours and content of the discipline and contributed to intellectual renewals in a wide range of other human sciences Heilbron's sophisticated book is both an innovative sociological study and a major reference work in the history of the social sciences Heilbron recounts the halting process by which sociology evolved from a new and improbable science into a legitimate academic discipline Having entered the academic field at the end of the nineteenth century sociology developed along two separate tracks one in the Faculty of Letters engendering an enduring dependence on philosophy and the humanities the other in research institutes outside of the university in which sociology evolved within and across more specialized research areas Distinguishing different dynamics and various cycles of change Heilbron portrays the ways in which individuals and groups maneuvered within this changing structure seizing opportunities as they arose French Sociology vividly depicts the promises and pitfalls of a discipline that up to this day remains one of the most interdisciplinary endeavors among the human sciences in France

Freedom from Fear Alan S. Kahan, 2026-02-24 A provocative new history of liberalism that also provides a road map for today's liberals *Freedom from Fear* offers a striking new account of the dominant political and social theory of our time liberalism In a pathbreaking reframing of the historical debate Alan Kahan charts the development of Western liberalism from the late eighteenth century to the present Examining key liberal thinkers and issues Kahan shows how liberalism is both a response to fear and a source of hope the search for a world in which no one need be afraid *Freedom from Fear* reveals how liberal arguments typically rely on three pillars freedom markets and morals But when liberals ignore one or more of these pillars their arguments generally fail to persuade Extending from Adam Smith and Montesquieu to today's battles between liberals and populists the book examines the twists and turns of the incomplete or unfinished liberal tradition while demonstrating its fundamental continuity It combines fresh accounts of familiar figures such as Tocqueville and Rawls with discussions of less famous but pivotal thinkers such as A V Dicey and Jane Addams and explores how liberals have dealt with crucial issues from debates over male and female suffrage to colonialism and liberal anti Catholicism By transforming our understanding of the history of liberal thought and practice *Freedom from Fear* provides a new picture of the political creed today the paths liberals need to follow the questions they need to answer and the dead ends they must avoid if they are to win

The Expert Consumer Alain Chatriot, Marie-Emmanuelle Chessel, 2017-09-29 Recent work has focused on the politics of consumption and its manifestation in a number of situations This volume extends these debates providing a tighter focus and contributing to a noticeable gap in the field that numerous scholars are beginning to turn towards that is organizations of consumers themselves who have chosen to speak for all consumers and similar such bodies of experts which act on behalf of consumers The volume is fortunate in drawing upon a number of scholars who are about to publish major works on the subject but who are happy to provide summary versions of their work for the volume The book pays particular attention to specific moments in consumer mobilization and expertise capturing the range of types of expert consumers across the twentieth century from ethical consumer groups at the beginning to intellectuals housewives economists and public officials It addresses questions on the nature of consumer organizing which bodies can speak for consumers whether one consumer voice can ever be identified and the relationship between consumption and citizenship Overview pieces demonstrate the larger narratives

involved in the study of the expert consumer whilst more comparative essays set out the nature of transatlantic exchanges. Other contributions point to the similarities across seemingly different consumption regimes while case studies of specific organisations and key historical moments draw out the particularities of consumer expertise. *Selling Paris* Alexia M. Eugenics in the Garden Fabiola López-Durán, 2018-03-01. Winner Robert Motherwell Book Award Outstanding Book on Modernism in the Arts The Dedalus Foundation 2019. As Latin American elites strove to modernize their cities at the turn of the twentieth century they eagerly adopted the eugenic theory that improvements to the physical environment would lead to improvements in the human race. Based on Jean Baptiste Lamarck's theory of the inheritance of acquired characteristics this strain of eugenics empowered a utopian project that made race gender class and the built environment the critical instruments of modernity and progress. Through a transnational and interdisciplinary lens *Eugenics in the Garden* reveals how eugenics fueled by a fear of social degeneration in France spread from the realms of medical science to architecture and urban planning becoming a critical instrument in the crafting of modernity in the new Latin world. Journeying back and forth between France Brazil and Argentina Fabiola López-Durán uncovers the complicity of physicians and architects on both sides of the Atlantic who participated in a global strategy of social engineering legitimized by the authority of science. In doing so she reveals the ideological trajectory of one of the most celebrated architects of the twentieth century Le Corbusier who deployed architecture in what he saw as the perfecting and whitening of man. The first in depth interrogation of eugenics influence on the construction of the modern built environment *Eugenics in the Garden* convincingly demonstrates that race was the main tool in the geopolitics of space and that racism was and remains an ideology of progress.
