EBOOK: Intellectual Disability: Social Approaches David Race, 2007-09-16. This book has an unusual format and its intentions and underlying constructions are stimulating. At the price currently 19.99 it represents excellent value for money and is affordable for individual students to purchase.

Learning Disability Practice. This could have been a triumphant book; instead it is a sober one and far more useful for it. Based on an around the world tour of countries where the concepts of normalization and Social Role Valorization have been influential, the book offers a comparative account of the ways these ideas have worked out in seven different national contexts more than thirty years after their introduction. Foreword by John O'Brien, The Centre on Human Policy, Syracuse University, USA. In addition to its useful comparative approach, this text demystifies and clarifies a number of complex issues. Iain Carson, University of Manchester, UK. How do services in different countries vary across the lifespan? What lessons can the different countries learn from one another? Based on the author's own experience from over thirty years in the field, this thought-provoking book offers a comparative study of services for people with intellectual disabilities in seven countries: England, Australia, Canada, New Zealand, Norway, Sweden, and the USA. Through the author's discussions with people with intellectual disabilities, parents and families, and those involved with services at a professional and academic level, the book provides a critical reflection on intellectual disability services across the lifespan. Each chapter contains the following key features: A brief 'Instant Impacts' reflection of an incident or a person encountered in the country concerned; A short history of services in the country and a summary of the current service system; A detailed look at services through the age range, including issues around screening and pre-birth; Drawing on the author's own experience of being a parent of a child with intellectual disabilities. Adam's World Tour boxes include a summary of the author's views on the likely services Adam might receive in the country concerned.

Intellectual Disability is key reading for students of social work, learning disability, nursing, social policy and community work, as well as those training to work with people with intellectual disabilities in health and social care services. Because of its unique approach, however, it is as relevant to families of people with intellectual disabilities as it is to professionally qualified practitioners and policy makers.

Leadership and Change in Human Services David Race, 2003-08-29. For over forty years, Wolf Wolfensberger has been a significant figure in the world of human services, especially in the field of learning disability. His work on normalization and citizen advocacy in the late 1960s and early 1970s has been acknowledged by supporters and critics alike to have been fundamental to developments in a number of countries, most notably his adopted country and the USA, Canada, Australasia, and the UK. His further work in developing the theory of

social role valorization the successor to normalisation and as a commentator on broader trends in society and their effects on vulnerable people and services for them has ensured his place as a major voice for values and the human worth of all people. Never afraid of controversy his views have brought him into conflict with institutional vested interests and radical groups alike. In *Leadership and Change in Human Services* David Race introduces the reader to Wolfensburger's key ideas through a series of extracts with commentary from his published work. Throughout the edited selection the emphasis is on placing Wolfensburger's work in contemporary context and examining its continuing relevance today. Including a comprehensive bibliography of Wolfensburger's written output this text offers an invaluable source of reference to all those concerned with the recent history of the human services.

Valuing People with a Learning Disability Steve Mee, 2012. Most health and social care service providers claim to value those with a learning disability. Yet there can sometimes be a huge gulf between stated intentions and what happens in everyday practice. In a few cases that have recently hit the headlines there have even been allegations of systematic abuse. This timely book asks three vital questions: What do we mean by valuing? How does the process of valuing work? What needs to happen to ensure that we value people with a learning disability? Too often practitioners tend to say they are all right in theory but not in the real world. In this book Dr Steve Mee draws on his experience as a practitioner and lecturer on a learning disability nursing course in which he has successfully used stories to bridge the gap between academic theory and everyday practice. Each chapter introduces the reader to a particular area of theory and illustrates it with uniquely powerful memorable stories from practice as well as examples from recent news and historic accounts. Reading the book will give practitioners new insight, empathy and sensitivity that will make a lasting difference to their practice. It invites practitioners to truly reflect on whether they can claim to value the people they support.

REVIEWER COMMENT I feel this is a very important piece of work in an area that is often misunderstood. From reading the author's work I have questioned my own approach to valuing people and found myself lacking in some areas even though I was of the opinion that I did truly value people with a learning difficulty.

Understanding Disability Ranu Uniyal, Fatima Rizvi, 2023-11-02. This edited volume brings together contributions on disability studies organized around two themes: literary and sociological aspects. The contributors include academics, disability activists and researchers from within and outside the Indian periphery. While the book strengthens the disability discourse and contributes to building academic scholarship on this subject, it also promotes disability activism by giving space to both direct practitioners and persons with disabilities. The chapters discuss various analytical and literary aspects of the marginalization experienced by the disabled community and bring forth new and elaborate perspectives. It draws connections across multiple identities and includes personal narratives across nations, cultures and societies. It is an excellent research resource on disability studies in India for scholars and students in the area of humanities, education, law, sociology and social work while at the same time also addressing the global context.
