The Socialist Collective Agreement László Nagy, 1984 Shop Collective Bargaining Francis Joseph Haas, 1922

Labour Law , 1986 Collective Bargaining Developments in Times of Crisis Sylvaine Laulom, 2024-12-19

The first edition of this book published in 2018 analysed developments in systems of collective bargaining in fifteen mainly European Union countries related to the post 2008 crisis mixing comparative and national presentations Since then other crises of unprecedented magnitude have hit all countries the totally unexpected COVID 19 pandemic with its massive consequences the energy crisis the environmental crisis and the Ukrainian war crisis followed by inflation However an essential change has taken place at the European level in this area since the publication in 2018 of the first edition a change of such magnitude that it can be described as a paradigm shift The adoption of the Directive on Adequate Minimum Wages marks a true break with the post financial crisis period as the EU is now focusing on the development and enhancement of strong sectoral collective bargaining systems in wage settings This very new European context justifies an update of the research published in 2018 to analyse the evolutions of collective bargaining in this new context The book is organised around two building blocks Part I presents some comparative perspectives both in terms of the structure of the industrial relations systems and in terms of subjects of collective bargaining whether this be a classical theme of collective bargaining wages and working time or less traditional themes platform work young people and older people which are two categories particularly affected by the crisis Part II presents some national situations Each chapter explores how national systems have been able to respond to European injunctions and have also responded to the new challenges posed by the COVID 19 pandemic and the emergence of new themes These presentations demonstrate once again the extreme diversity of each industrial relations system Some systems such as the Austrian system appear to be unfailingly stable while the Belgian system seems to be having more difficulty adapting Others like the Portuguese or the Spanish systems appear to be resilient while in some countries Turkey Hungary Poland and Romania collective bargaining is particularly weak In these countries the question raised by the adoption of the AMW Directive is therefore to determine how sectoral bargaining can be developed in countries where there is no such level of bargaining or in countries where collective bargaining remains underdeveloped at all levels As the first edition the book takes stock of the current state of collective bargaining in Europe It is an essential study for labour and employment law practitioners and an exemplary analysis of immeasurable value to policymakers and academics in the field

The Legal and Institutional Framing of Collective Bargaining in CEE Countries Ivana Palinkaš, 2018-04-09 The formerly communist countries of Central and Eastern Europe CEE have witnessed a profound transformation of their labour laws since the 1990s and especially after their accession to the European Union Today in comparison to the other Member States they continue to have weak trade unions and employers associations and an underdeveloped system of collective bargaining Moreover the recent economic and financial crisis highlighted the need to invest further efforts in bringing the CEE

industrial relations closer to the old Member States in order to facilitate a more meaningful enforcement of the EU wide economic and social policies This is the first book to scrutinise this important matter in depth Focusing on four current CEE labour law regimes in Slovenia Slovakia the Czech Republic and Poland that also have different collective bargaining trends and can be said to exemplify some of the main legal and institutional frameworks for collective bargaining that the CEE countries have developed the author addresses the following major issues the transition from a centralised to an open market economy and the degree of continuing residual characteristics the extent to which labour laws since the 1990s have enabled an adequate institutionalisation of industrial relations to allow free and voluntary collective bargaining at the national sectoral and company levels and the effectiveness of the standard setting role of trade unions and employers associations insofar as they have persisted or come into play The analysis always keeps in focus the development of labour laws in relation to a number of such interlinked elements as market transformation type of privatisation of state ownership and attitudes towards welfare It draws on both the relevant literature and on twenty five interviews with legal and policy experts from social partners organisations and staff within the ministries for social affairs in the selected countries In support of the study s general finding that the laws in CEE countries could provide more stimulus for sectoral and cross sectoral collective bargaining the author offers deeply informed recommendations and insights into legal shortcomings and pinpoints how the existing legal frameworks can be enhanced Any professional or academic in the field of industrial relations and particularly those concerned with complex transitions such as those occurring in the CEE countries and elsewhere in the world will find this book of great value

Riley, 2019-01-29 A historical look at the emergence of fascism in Europe Drawing on a Gramscian theoretical perspective and development a systematic comparative approach The Civic Foundations of Fascism in Europe Italy Spain and Romania 1870 1945 challenges the received Tocquevillian consensus on authoritarianism by arguing that fascist regimes just like mass democracies depended on well organized rather than weak and atomized civil societies In making this argument the book focuses on three crucial cases of inter war authoritarianism Italy Spain and Romania selected because they are all counter intuitive from the perspective of established explanations while usefully demonstrating the range of fascist outcomes in interwar Europe Civic Foundations argues that in all three cases fascism emerged because the rapid development of voluntary associations combined with weakly developed political parties among the dominant class thus creating a crisis of hegemony Riley then traces the specific form that this crisis took depending on the form of civil society development autonomous as in Italy elite dominated as in Spain or state dominated as in Romania in the nineteenth century The Sources of Labour Law Tamás Gyulavári, Emanuele Menegatti, 2019-12-06 Labour law has traditionally aimed to protect the employee under a hierarchy built on constitutional provisions statutory law collective agreements at various levels and the employment contract in that order However in employment regulation in recent years flexibility has come to dominate the world of work a set of policies that reshuffle the relationship among the fundamental pillars of labour law and inevitably lead to degrading the protection of employees This book the first ever to consider the sources of labour law from a comparative perspective details the ways in which the traditional hierarchy of sources has been altered presenting an international view on major cross cutting issues followed by fifteen country reports The authors analysis of the changing hierarchy of labour law sources in the light of recent trends includes such elements as the following the constitutional dimension of labour rights the normative intervention by the State the regulatory function of collective bargaining and agreements the hierarchical organization of labour law sources and the principle of favour the role played by case law in both common law and civil law countries the impact of the European Economic Governance decentralization of collective bargaining employment conditions as key components of global competitive strategies statutory schemes that allow employees to sign away their rights National reports Australia Brazil China Denmark France Germany Hungary Italy Poland Russia Spain Sweden South Africa the United Kingdom and the United States describe the structure of labour law regulations in each legal system with emphasis on the current state of affairs The authors all distinguished labour law scholars in their countries thus collectively provide a thorough and comprehensive commentary on labour law regulation and recent tendencies in national labour laws in various corners of the globe With its definitive analysis of such crucial matters as the decentralization of collective bargaining and how individual employment contracts can deviate from collective agreements and statutory law and its comparison of representative national labour law systems this highly informative book will prove of inestimable value to all professionals concerned with employment relations labour disputes or labour market policy especially in the context of multinational

workforces *USSR Information Bulletin* ,1951 **Pathways in Decentralised Collective Bargaining in Europe** Frank Tros,2025-10-01 One of the main challenges in labour relations in Europe is the ongoing decentralisation of collective bargaining from national and sectoral levels to company levels Decentralisation might be an answer to business needs in competitiveness and organisational flexibility However it risks erosion of collective bargaining structures more inequality in employment conditions and fragmentation in trade unions powers Based on recent qualitative research this book shows high varieties across European countries and economic sectors in degrees forms and impacts of decentralisation The authors explore in interdisciplinary and multi level perspectives continuity and change in regulating and practicing collective bargaining in France Germany Ireland Italy the Netherlands Poland Spain and Sweden In cross country comparisons company case studies in manufacturing and retail show the divergent effects of national regimes and social partners power resources on trade unions strategies and influence in company bargaining Congressional Record United States.
