Susan Anne Capel, Margaret Whitehead, 2012 *Debates in Physical Education* explores major issues physical education teachers encounter in their daily professional lives. It engages with established and contemporary debates, promotes and supports critical reflection and aims to stimulate both novice and experienced teachers to reach informed judgements and argue their own point of view with deeper theoretical knowledge and understanding. In addition, concerns for the short, medium and long term future of the subject are voiced with a variety of new approaches proposed. Key issues debated include: What are the aims of physical education? What should be covered in a physical education curriculum? How should we judge success in physical education? Is physical education really for all or is it just for the gifted and talented? Can physical education really combat the rise in obesity? What is the future for physical education in the 21st Century? *Debates in Physical Education* makes a timely and significant contribution to addressing current contentious issues in physical education. With its combination of expert opinion and fresh insight, this book is the ideal companion for all student and practising teachers engaged in initial teacher education, continuing professional development and Masters level study.

Issues in Physical Education Susan Capel, Susan Piotrowski, 2013-01-11 *Issues in Physical Education* stimulates student teachers, NQTs and practising physical education teachers to reflect on issues important to improving teaching in physical education. It encourages reflection and debate as an important part of professional development. Issues discussed include: aims as an issue in physical education; breadth, balance and assessment in the physical education curriculum; equality and the inclusion of pupils with special needs in physical education; progression and continuity in physical education between primary and secondary schools; community initiatives in physical education; physical education, health and life-long participation in physical activity.

The Impact of New Health Imperatives on Educational Policy and Schooling Jan Wright, Valerie Harwood, 2016-02-05 Currently a great deal of public discourse around health is on the assumed relationship between childhood inactivity, young people's diets

and a putative steep rise in obesity Children and young people are increasingly being identified as a population at risk in relation to these health concerns Such concerns are driving what might be described as new health imperatives which prescribe the choices young people should make around lifestyle physical activity body regulation dietary habits and sedentary behaviour These health imperatives are a powerful force driving major policy initiatives on health and education in a number of countries in the Western world Schools in particular have been targeted for the implementation of a plethora of initiatives designed to help children and young people lose weight become more active and change their eating patterns inside and outside school Addressing these issues requires an innovative theoretical approach Neither the fields of eating disorders nor obesity research has addressed these issues from a sociological and pedagogical perspective The contributors to this edited collection draw on a range of social theories including Michel Foucault and Basil Bernstein to interpret the data collected across three countries Australia and New Zealand United Kingdom and from a range of primary and secondary schools Each chapter addresses various aspects of the relationship between health imperatives as constituted in government policies school programs and practices their recontextualised in school practices and the impact of this on the subjectivities of children and teachers This book was originally published as a special issue of Discourse Studies in the Cultural Politics of Education *Physical Education, Curriculum And Culture* Richard Tinning, 2006-05-23 This collection of studies addresses contemporary issues and problems in the physical education curriculum The editors stress that physical education is a part of social life and is therefore a key site for the production of cultural mores values and symbols Scientific Development of Sport Pedagogy Paul G. Schempp, **Research In Physical Educ.& Sp** Andrew Sparkes, 2012-10-12 The text aims to provide an in depth exploration of a range of traditions that are beginning to reshape the nature of research in physical education and the sports sciences The chapters are all original contributions by leading scholars that bring together new data from a variety of research approaches Each offers its own specific challenge to the orthodoxy that has dominated the field A range of traditions are considered by the contributors who provide specific examples from their own work that include phenomenology ethnography life histories discourse analysis feminist research curriculum history and action research These cases are highlight for the reader the basic assumption of each approach the significance of the understanding they develop and their potential for the future development of research in physical education and sport The forms of analysis provided should be of interest to a wider audience such as students of education and the social sciences It is aimed at physical education researchers BEd MEd BSc MSc courses on physical education and sport and teachers of sports science
