and individuation that underlie Aristotle's and Hegel's antireductionist programs. He then proposes a contemporary metaphysical theory of emergence in the context of recent philosophy of science. This theory founded on the principle of the nonderivability of actual states from possible states holds that the differences among physical, biological, and mental phenomena are essential to any metaphysics. **Essential Difference** is the only focused treatment of this problem and is itself essential for any understanding of the nature of metaphysics.

The Essential Renewal of America's Schools Carl Glickman, Ian M. Mette, 2020. What can today's educational leaders do to create schools that are purposeful, moral, and successful? In this book, Glickman and Mette provide a powerful set of guidelines that will lead to true school renewal. Using a practical framework for school district and community leaders, their roadmap replaces dependence on top-down state and federal regulations, focusing instead on the creation of locally guided initiatives to address local goals. Filled with real-world examples, charts, and illustrations, the text gives teachers, principals, students, parents, central office personnel, school boards, and community members exactly what is needed to remake their schools. Building on Glickman's highly acclaimed classic *Renewing America's Schools* (1993), this resource is a must reading for anyone involved with school change in today's divisive and complex times. My life would have been a whole lot easier if this book had been written when I was in the principal's office. George Wood, former principal and superintendent, Stuart, Ohio. This timely and critical book demonstrates how teaching and learning and a democratic school community are the key assets to solving our problems. It is not just the future of our schools that is at stake but democracy itself. William Mathis, National Education Policy Center.
