Society And Knowledge:

Society and Knowledge V. G. Levine, 2017-07-05 The sociology of knowledge is generally seen as part of the sociology of cultural products Along with the sociology of science it explores the social character of science and in particular the social production of scientific knowledge Knowledge in all its varieties is of crucial importance in social political and economic relations in modern society Yet new realities the editors argue in their introduction to this second edition require a new perspective In the past half century the social role of knowledge has changed profoundly The natural attitude toward scientific knowledge in science that assigned a special status to science's knowledge claims has lost its dominance and the view that all knowledge is socially constructed has gained general acceptance Science increasingly influences the political agenda in modern societies Consequently a new political field has emerged knowledge politics These fourteen essays by social scientists philosophers and historians cover fundamental issues theoretical perspectives knowledge and power and empirical studies Eight of the fourteen contributions were part of the first edition of *Society and Knowledge* published in 1984 and most of these have been updated and revised for this new edition Included in this edition are six new contributions by Robert K Merton Steve Fuller Dick Pels Nico Stehr Barry Schwartz and Michael Lynch This second revised edition builds on its predecessor in presenting cutting edge theoretical and empirical efforts to transform the sociology of knowledge Professionals policymakers and graduate students in the fields of sociology political science and social science will find this volume of interest and importance

as well as thoughtful discussion of all papers Those chosen for publication in the Yearbook and those undoubtedly to be published elsewhere have all benefitted considerably from our discussions in Darmstadt which also included a number of the members of the editorial board of the Yearbook In addition we are pleased that the authors were able to read and comment further on each other's papers prior to publication As is the case in every endeavor of this kind we have incurred many debts and are only able to acknowledge these at this point publicly while expressing our sincere thanks and appreciation for all the intellectual support and the considerable labor invested by a number of persons in the realization of the collection

[A Series.] KNOWLEDGE.,1956 **Participating in the Knowledge Society** R. Finnegan,2005-09-27 In current debates about the knowledge society and the organization of research the spotlight is most often on the universities This interdisciplinary and transhistorical volume focuses on the less often recognized work of independent researchers creating and participating in knowledge outside the academy from seventeenth century north country astronomers to Victorian naturalists to today s think tanks community historians and new forms of researching and publishing through the internet These intriguing cases raise challenging issues about the location definition and validation of research about active participation in knowledge generation and about the perhaps changing boundaries of university today Society and Knowledge Vere Gordon Childe,1956 **Societal Dynamics** Frederick Betz,2014-01-25 At both a micro information level and a macro societal level the concepts of knowledge and wisdom are complementary in both decisions and in social structures and institutions At the decision level knowledge is concerned with how to make a proper choice of means where best is measured as the efficiency toward achieving an end Wisdom is concerned with how to make a proper choice of ends that attain best values At a societal level knowledge is managed through science technology and innovation And while science technology is society s way to create new means with high efficiencies they reveal nothing about values Technology can be used for good or for evil to make the world into a garden or to destroy all life It is societal wisdom which should influence the choice of proper ends ends to make the world a garden How can society make progress in wisdom as well as knowledge Historically the disciplines of the physical sciences and biology have provided scientific foundations for societal knowledge But the social science disciplines of sociology economics political science have not provided a similar scientific foundation for societal wisdom To redress this gap Frederick Betz examines several cases in recent history that display a

fundamental paradox between scientific technological achievement with devastating social effects i e historical events of ideological dictatorships in Russia Germany China and Yugoslavia He builds a new framework for applying social science perspectives to explain societal histories and social theory Emerging from this methodological and empirical investigation is a general topological theory of societal dynamics This theory and methodology can be used to integrate history and social science toward establishing grounded principles of societal wisdom
