Sociological Human Ecology Contemporary Issues And Applications:

Sociological Human Ecology Michael Micklin, Harvey M Choldin, 2019-09-18 First published in This volume grew out of concerns raised by the contributors and a few others over the current status of human ecology within the field of sociology Stemming from conferences and subsequent discussions by a group of sociologist demographers on recent developments in sociological human ecology which started at the annual meeting of the Population Association of America in 1976 the original essays contained in this book are designed to review and assess the current state of knowledge in the field **Sociological**

Human Ecology Michael Micklin, Harvey M. Choldin, 1984-01-01 **Continuities in Sociological Human Ecology** Michael Micklin, Dudley L. Poston, 2013-11-11 The completion of this volume would not have been possible without the generous and dedicated help of numerous people The book had its genesis in a conference held at Cornell University in the fall of 1990 that was organized by Dudley Poston Paul Eberts and Michael Hannan all professors at the time at Cornell With the very generous financial assistance of David Call then the dean of Cornell s College of Agriculture and Life Sciences Poston Eberts and Hannan put together a two day conference of lectures and papers by human ecologists from Cornell University and elsewhere The conference focused on sociological human ecology and celebrated the fortieth anniversary of the publication of Amos Hawley s Human Ecology Ronald Press 1950 Professor Hawley was the keynote speaker at the conference Many of the authors of the chapters in this volume presented earlier versions at the Cornell conference in 1990 Cornell s Departments of Rural Sociology and Sociology also contributed financial assistance however without Dean Call s very generous support the conference would not have been possible A few months after the conference Poston and Michael Micklin discussed the possibility of asking the various authors of the Cornell conference papers to revise them for publication in a volume on sociological human ecology Many opted to do so but others did not because of time and other kinds of commitments and constraints Encyclopedia of Urban Studies Ray Hutchison, 2010 An encyclopedia about various topics relating to urban studies **Environmental Sociology** Michael D. Mehta, Eric Ouellet, 1995 **Health Ecology** Morteza Honari, Thomas Boleyn, 2005-07-28 This ground breaking study offers new challenges to those teaching studying or developing strategies and policies in health and the environment Bringing together a variety of approaches from different perspectives and different locations the contributors examine the various dimensions of health ecology in a human ecology framework examining how local regional and global factors impinge upon the health and environment of individuals communities and the globe The Structure and Dynamics of Human Ecosystems William R.  Poston, Michael Micklin, 2006-08-10 This comprehensive handbook provides an overview and update of the issues theories
 processes and applications of the social science of population studies The volume s 30 chapters cover the full range of
 conceptual empirical disciplinary and applied approaches to the study of demographic phenomena This book is the first effort
 to assess the entire field since Hauser and Duncan s 1959 classic The Study of Population The chapter authors are among the
 leading contributors to demographic scholarship over the past four decades They represent a variety of disciplines and
 theoretical perspectives as well as interests in both basic and applied research *Nature: Thinking the natural* David
 Inglis, John Bone, Rhoda Wilkie, 2005 **The Population of Modern China** Dudley L. Poston Jr., David Yaukey, 2013-11-11
 Student interested in world populations and demography inevitably need to know China As the most populous country of the
 world China occupies a unique position in the world population system How its population is shaped by the intricate
 interplays among factors such as its political ideology and institutions economic reality government policies sociocultural
 traditions and ethnic divergence represents at once a fascinating and challenging arena for investigation and analysis Yet for
 much of the 20th century while population studies have developed into a mature science precise information and
 sophisticated analysis about the Chinese population had largely remained either lacking or inaccessible first because of the
 absence of systematic databases due to almost uninterrupted strife and wars and later because the society was closed to the
 outside observers for about three decades since 1949 Since the end of the Cultural Revolution things have dramatically
 changed China has embarked on an ambitious reform program where modernization became the utmost goal of societal
 mobilization China could no longer afford to rely on imprecise census or survey information for population related studies
 and policy planning nor to remaining closed to the outside world Both the gathering of more precise information and access
 to such information have dramatically increased in the 1980s Systematic observations analyses and reporting about the
 Chinese population have surfaced in the population literature around the globe **Human Ecology** Amos H.
 Hawley, 1986-11-15 Human Ecology A Theoretical Essay by Amos Hawley presents for the first time a unified theory of
 human ecology by a scholar whose name is virtually synonymous with the discipline Focused on the interaction between
 society and environment human ecology is an attempt to deal holistically with the phenomenon of human organization
 Beginning in the first quarter of the century sociologists such as Park Burgess and McKenzie developed the study of human
 ecology to account for the dynamics of change in American cities Over time theorists have reached beyond the boundaries of
 sociology drawing on the findings of economics political science anthropology and bioecology to understand the relationship
 of human beings to their environment Hawley has successfully integrated the scattered theses of this wide ranging discipline

into a schematic whole The early human ecologists seized on the analogy of plant communities as a way of understanding urban communities Hawley here maintains that the most important contribution to human ecology of the lexicons of plant and animal ecologies is the perspective of collective life as an adaptive process consisting in an interaction of environment population and organization From the adaptive process he argues emerges the ecosystem a concept that serves as a common denominator for bioecology and human ecology Hawley has codified the theory of human ecology by a set of deductive hypotheses that establish its claims to coherence and comprehensiveness His model charts a synthesis of ecological concepts ranging from adaptation and equilibrium through growth in temporal and spatial dimensions to convergence and openness The essay underscores the critical importance of transportation and communication technology to the shaping of the human ecological system Human Ecology brings concision and elegance to this holistic perspective and will serve as a point of reference and orientation for anyone interested in the powers and scope of the ecological approach

Understanding Urban Ecosystems Alan R. Berkowitz, Charles H. Nilon, Karen S. Hollweg, 2006-05-29 Nowhere on Earth is the challenge for ecological understanding greater and yet more urgent than in those parts of the globe where human activity is most intense cities People need to understand how cities work as ecological systems so they can take control of the vital links between human actions and environmental quality and work for an ecologically and economically sustainable future An ecosystem approach integrates biological physical and social factors and embraces historical and geographical dimensions providing our best hope for coping with the complexity of cities This book is a first of its kind effort to bring together leaders in the biological physical and social dimensions of urban ecosystem research with leading education researchers administrators and practitioners to show how an understanding of urban ecosystems is vital for urban dwellers to grasp the fundamentals of ecological and environmental science and to understand their own environment

The Forest and the Trees Allan Johnson, 2014-09-12 If sociology could teach everyone just one thing what would it be The Forest and the Trees is one sociologist's response to the hypothetical the core insight with the greatest potential to change how people see the world and themselves in relation to it Amazon.com

Ecosystem Management William Burch, 1998-12-01 This text looks at the management of critical resources and the fact that the definition of what is and is not seen as a critical resource for survival varies by time and culture

The Handbook of Community Practice Marie Weil, Michael S. Reisch, Mary L. Ohmer, 2013 Written by some of the most influential scholars in the field this Handbook covers community development organizing planning and social change as well as key issues fields of practice and global approaches

Rethinking Rental Housing John Gilderbloom, 2012-06-20 In recent years almost daily media attention has been focused on the plight of the homeless in cities across the United States Drawing upon experiences in the U S and Europe John Gilderbloom and Richard Appelbaum challenge conventional assumptions concerning the operation of housing markets and provide policy alternatives directed at the needs of low and moderate income families Rethinking Rental Housing is a ground breaking analysis that shows the value

of applying a broad sociological approach to urban problems one that takes into account the basic economic social and political dimensions of the urban housing crisis Gilderbloom and Appelbaum predict that this crisis will worsen in the 1990s and argue that a supply and demand approach will not work in this case because housing markets are not competitive They propose that the most effective approach to affordable housing is to provide non market alternatives fashioned after European housing programs particularly the Swedish model An important feature of this book is the discussion of tenant movements that have tried to implement community values in opposition to values of development and landlord capital One of the very few publications on rental housing it is unique in applying a sociological framework to the study of this topic

The Community in Rural America Kenneth P. Wilkinson, 2023-03-15 The Community in Rural America by Kenneth P Wilkinson is a foundational theoretical work that both defines the interactional approach to the study of the community in rural areas and frames its application to encourage and promote rural community development Recognized for its detailed theoretical construction and logic for understanding human interactions this book has been widely adopted and used by researchers extension faculty and community development practitioners for over thirty years Presenting Wilkinson's groundbreaking work in its original form with a new foreword aimed at clarifying several key concepts in interactional theory this edition of The Community in Rural America will appeal to new students of the community as well as established scholars in the field

Micro-Macro Links and Microfoundations in Sociology Vincent Buskens, Werner Raub, Marcel Van Assen, 2014-07-16 Micro Macro Links and Microfoundations in Sociology focuses on two main issues in sociology Firstly how macro conditions can explain macro outcomes mediated by actor behaviour at the micro level micro macro links Secondly how alternative micro models affect macro outcomes microfoundations The contributions reflect key features of micro macro modelling in sociology as well as recent progress in this field The chapters address core features of explanations of social phenomena using micro macro models the problem of cooperation heterogeneity of actors structural balance opinion formation segregation and problems of micro macro models that are based on rational choice assumptions Moreover the contributions show how different research methods can be applied fruitfully such as laboratory experiments equilibrium analysis and agent based modelling As a result the book can be a guide for graduate students who want to develop their skills in building micro macro models In addition the book provides specialists of the different substantive research areas with up to date new developments in their research area This book was originally published as a special issue of Journal of Mathematical Sociology

Comparative Social Dynamics Erik Cohen, 2019-02-22 These original articles relate to major themes in the comparative study of the dynamics of cultures modernization and social and political change The authors ranking scholars in their fields provide fresh and important insights to the study of topics such as the interface of anthropological and sociological theory the dynamics of Latin America

The Fragile Community Mara B. Adelman, Larry R. Frey, 2020-07-24 This book examines the concept of community focusing on how communication practices help manage the

tensions of creating and sustaining everyday communal life amidst the crisis of human loss While acknowledging how the contradictory and inconsistent nature of human relationships inevitably affects community this intimate and compelling text shows how community is created and sustained in concrete communication practices The authors explore these ideas at Bonaventure House an award winning residential facility for people with AIDS where the web of social relationships and the demands of a life threatening illness intersect in complex ways Facing a life threatening illness can defy meaningful social connections but it can also inspire such ties sometimes in ways that elude us in the course of daily life By understanding how collective communication practices help residents forge a sense of community out of the fragility and chaos of living together with AIDS we are able to better understand how communication is inexorably intertwined with the formation of community in other environments Based on seven years of ethnographic research including participant observation in depth interviews and questionnaires this book weaves together narratives and visual images with conceptual analysis to uncover the ongoing oppositional forces of community life and to show how both mundane and profound communication processes ameliorate these tensions and thereby sustain this fragile community Because the average length of stay for a resident is seven months in which time he or she moves from being a newcomer to a community member to someone the community remembers the text reflects this short but crystallized life starting with the day a new resident opens the door to the day he or she passes away The writing is rich intimate engaging personal compelling and vivid The stories told discuss such deeply personal topics as the dilemmas of romantic relationships in a context fraught with many perils issues of power authority and control that enable and constrain social life and communicative practices that help residents cope with bereavement over the loss of others as well as their own impending deaths The text concludes by examining the lessons learned from Bonaventure House about creating and sustaining a health community and serves as an inspiration for strengthening interpersonal relationships and communities in other environments
