Sociological Measurement An Inventory Of Scales And:

Sociological Measurement Charles M. Bonjean, Richard J. Hill, S. Dale MacLemore, 1967 **Measurements in the Social Sciences** Hubert M. Blalock, 1974 Among the frustrations constantly confronting the social scientist are those associated with the general process of measurement The importance of good measurement has long been recognized in principle but it has often been neglected in practice in many of the social sciences Now that the methodological tools of multivariate analysis simultaneous equation estimation and causal modeling are diffused more widely into the social sciences and now that the very serious implications of random and non random measurement errors are being systematically investigated it is all the more important that social scientists give top priority to the quality of their data and the clarity of their theoretical conceptualizations as well as to methods for analyzing fallible data This book deals with selected problems of measurement and is written for graduate students and professional social scientists particularly in the technically less developed fields of sociology political science and anthropology The book is organized so that in general one proceeds from problems of data collection to those of data analysis It is not intended to be a complete work covering all types of measurement problems that have arisen in the social sciences Instead it represents a series of studies of topics that are deemed to be crucial for the advancement of social science research but which have not received sufficient attention in most of the social sciences The basic purpose is to stimulate further methodological research on measurement and to study the ways in which knowledge that has been accumulated in some fields may be generalized so that it may be applied to others The book is divided into three major parts Part I is concerned with applying scaling approaches developed in psychometrics to problems that arise in other social sciences The focus is on finding better ways to ask questions of respondents so as to raise the level of measurement above that of simple ordinal scales Part II focuses on multiple indicator theory and strategies as applied to relatively complex models and to change data In this section the emphasis shifts to how one analyzes fallible data through the construction of explicit measurement error models Part III deals with the statistical analysis of ordinal data including the interpretation and empirical behaviors of various ordinal measures of association The final chapter written by the editor discusses how ordered metric assumptions may be used to make more powerful predictions than those characterizing much of contemporary social science H M Blalock Jr 1926 1991 was Professor Department of Sociology the University of Washington Seattle He was recipient of the 1973 ASA Samuel Stouffer Prize and was a Fellow of the American Statistical Association and the American Academy of Arts and Sciences and is a member of the National Academy of Sciences He was the 70th president of the American Sociological Association *Sociological Methods* Norman K. Denzin, 2017-07-12 A comprehensive collection of contemporary and classical readings on sociological method this book provides students with systematic analyses of each of the major strategies employed in sociological research It may be used as a supplement or as the basic set of readings for all courses in methods The book contains thirteen sections dealing with theory and its

development issues of sampling units problems of developing new measurement techniques difficulties surrounding the interview with special emphasis on interviewing deviant hostile and silent respondents the nature of causation and a review of the major methods of proof available to the sociologist Actual research studies focusing in turn on the experiment the survey participant observation life histories and unobtrusive analysis are also included Each section is preceded by an introduction that defines the major issues in each paper offers a discussion of problems not covered explicitly in the readings and in general shows how each paper contributes to a view of interactional research processes Because of its interactional approach its use of classic articles its anticipation of problems not yet formulated clearly in the literature its illustrations of how social organizations may be studied its inclusion of articles relevant to the social psychology of experiments and its new statements on the ethics of research this book will be invaluable in methods courses Especially when used in conjunction with its companion text *The Research Act* the book provides perhaps the most original and most useful compendium available to students today

Health Measurement Scales David L. Streiner, Geoffrey R. Norman, John Cairney, 2014-11-06 Clinicians and those in health sciences are frequently called upon to measure subjective states such as attitudes feelings quality of life educational achievement and aptitude and learning style in their patients This fifth edition of *Health Measurement Scales* enables these groups to both develop scales to measure non tangible health outcomes and better evaluate and differentiate between existing tools *Health Measurement Scales* is the ultimate guide to developing and validating measurement scales that are to be used in the health sciences The book covers how the individual items are developed various biases that can affect responses e g social desirability yea saying framing various response options how to select the best items in the set how to combine them into a scale and finally how to determine the reliability and validity of the scale It concludes with a discussion of ethical issues that may be encountered and guidelines for reporting the results of the scale development process Appendices include a comprehensive guide to finding existing scales and a brief introduction to exploratory and confirmatory factor analysis making this book a must read for any practitioner dealing with this kind of data

Surveys in Social Research David de Vaus, 2013-01-11 This work provides advice on how to plan conduct and analyze social surveys It emphasizes the links between theory and research the logic and interpretation of statistics and the practices of social research The fifth edition includes a new chapter on ethics and a glossary It assumes no background in statistical analysis and gives readers the tools they need to come to grips with this often confusing field

Surveys in Social Research D. A. De Vaus, 2002 As well as explaining how to conduct effective social research surveys the author of *Surveys in Social Research* provides a range of tools to enable the reader to become a critical consumer of research findings

Profile and Measurement of Social Well-being Indicators for Use in the Evaluation of Water and Related Land Management Planning Patricia K. Guseman, Katheryn T. Dietrich, 1978 As a part of the continuing development of the Water Resources Assessment Methodology WRAM this report focuses on the Social Well Being SWB account as defined by the Water Resource Council s

Principles and Standards An outline of SWB categories subcategories and variables as interpreted from Principles and Standards is included In addition for selected variables definitions information about measurement and suggestions for prediction are provided It is noted that although the set of variables discussed in this report assists in defining SWB the list is tentative not exhaustive and is intended for use within the framework of WRAM The particulars of each planning study and the judgment of professionals and publics will dictate omission of some variables and inclusion of others Author Research Instruments in Social Gerontology ,1982 Theory and Methods in Sociology John Hughes,Wes Sharrock,2017-09-16 This book offers a guide to sociology that explores its theoretical and methodological dimensions Aiming to provide the reader with a sense of the reasoned character of the discipline it traces how different theories and methods relate to one another exploring the particular problems they spawn and the debates that have arisen in response *Handbook of Research Design and Social Measurement* Delbert Charles Miller,1983 Research Instruments in Social Gerontology David J.

Change and Stability Melvin L. Kohn,2015-12-03 In societies that experience rapid social transformation does an individual s social position have a major influence on their personality Exploring this and related questions Melvin Kohn presents a detailed overview of how social structure relates to personality in a variety of different countries in vastly different political and social contexts Case studies include the US communist Poland Japan and Poland and the Ukraine during their transition to capitalism *Assessment of Biological Mechanisms Across the Life Span* Lisabeth F. DiLalla,Stephanie M. Clancy Dollinger,Stephanie MC Dollinger,2013-06-17 Based on the First Biannual Lifespan Development Conference this

volume offers a multidisciplinary and multidimensional approach to the study of lifespan development in the areas of neuropsychology cognition behavior genetics and perception The objective of the conference was to provide a lively forum for the discussion of issues related to lifespan development and to reflect on important topics challenging the field during the 1990s The chapters in this book motivated by the conference presentations cover the assessment and evaluation of developmental changes in visual perception the contribution of behavioral genetic factors to development the predictability of perinatal risk factors as they relate to cognitive and linguistic outcomes the neuropsychological changes during aging and innovative approaches to the study of cognitive development using neuropsychological testing methods **Paradigms and**

Fairy Tales Julianne Ford, 2020-10-28 This book is an introduction to the epistemology and practice of social science It provides an exposition and critique of the ideology and practice of social science and an examination of the professional social scientist as a manipulator of ideas and appearances **Social Support Measurement and Intervention** Sheldon

Cohen, Lynn G. Underwood, Benjamin H. Gottlieb, 2000-10-19 Surgery and pharmaceuticals are not the only effective procedures we have to improve our health The natural human tendency to care for fellow humans to support them with social networks has proven to be a powerful treatment as well As a result the areas of application for social support intervention have expanded dramatically during the past 20 years As these areas have expanded so too has the literature on the theory and measurement of social support Yet the literature has focussed on very particular areas Investigators in the social sciences have mainly focused on the protection that social support confers in the context of stressful life events and transitions whereas studies in the health sciences have concentrated on the effects of social networks and supports on population mortality and morbidity Although no single theoretical framework has been widely accepted there is consensus that both the psychological sense of support and actual expressions of support play critical roles in maintaining health and well being This book is a state of the art resource for the selection and development of strategies for social support assessment and intervention Designed for use by behavioral and medical scientists conducting studies of physical illness psychological adjustment and psychiatric illness in human populations this volume presents a broad conceptual framework addressing the role of social support in mental and physical health The book is divided into four sections The first provides some historical context as well as a conceptual overview of how social support might influence mental and physical health The second discusses techniques for measuring social networks and support and the third addresses the design of different types of support interventions The final section presents some general comments on the volume and its implications for social support research and intervention This resource is meant to aid researchers in understanding the conceptual criteria on which measurement and intervention decisions should be made when studying the relations between social support and health Furthermore the information provided on both measurement and intervention will be valuable to practitioners interested in designing and evaluating prevention and treatment initiatives Sponsored by the Fetzer Institute as a follow up

to their successful 1995 publication *Measuring Stress* this book will provide the most up to date research on the effects of social support interventions on physical and mental health *Enriching the Sociological Imagination* Rhonda F.

Levine,2016-01-08 Since the 1960s radical sociology has had far more influence on mainstream sociology than many observers imagine This book pairs seminal articles with new reflective essays written by the founders of progressive sociology including Fred Block Edna Bonacich Samuel Bowles Herbert Gintis Val Burris G William Domhoff Richard Flacks Harvey Molotch Goran Therborn and Erik Olin Wright The book highlights the wider impact of radical sociology and shows how the work of these and other writers has continued to influence sociology s continuing interest in capitalism class race gender power and progressive social change It also describes future directions for a critical sociology relevant to a multicultural and global world *Handbook of Research Design and Social Measurement* Delbert C.
