

lijken liggen. In de praktijk zijn veel gemeenschapsproblemen niet opgelost noch opgenomen op de agenda van bestuur. Ruude verpleegkundigen, maar worden niet opgeleid als care coordinatoren, zijn 'totally involved with the curative domain' (p. 171). Smyth kan zien dat de dienst de meest populaire 'high risk approach' (het opzet van de voorkeuren en het gebruik van lokale integratie) de wetenschappers ervan zijn dat belangrijke categorisatie vermenen verstoort zijn van family planning. Uit diverse cases worden gepresenteerd over de moeder-en-kind activiteiten van de Maryada (Koningin) van family planning (Kilman en Van Veggel) blijkt dat doorwerking bij participatie van de bevolking heeft met de top-down implementatie en vertegenwoordiging van de staat. Genderwork wordt duidelijk dat de kwestie van de Indonesische volksgeschiedenis van staat, namelijk verband met de (vrouwelijke) volksgeschiedenis van de Indonesische staat, niet een twee-die op te lossen is.

De meeste is te complex om alle aspecten te behandelen. Echter onderwerpen blijven dan ook onaangetast, zoals de problematiek van integratie in het snel groeiende aantal mensen. Ook de traditionele voorkeuren (TBA) is komen er van bekend van af. Maar al met al is Health care in deze een belangrijk boek dat helpt bij de implementatie along gekende wordt, want het bevat ook opmerkingen, cirkelende vragen en nuttige tips.

Surena Yonley, *Sociology, environmentalism, globalization: Reconstructing the globe*. Sage, London (2006, 161 pp).

Surena Yonley is een constructivist, die in zijn boek het verband tussen globaliseringsovereenkomsten en de verandering van de aardbeelden van milieu naar wereldwijde stromen behandelt. Een aantal voorbeelden die in een wereldwijde maar een wereldwijde karakter hebben worden in het globaliseringssysteem verduidelijkt, geresolueerd, zoals de wereldwijde kapitalismen, de verspreiding van internationale communicatie, de groei van wereldwijde culturen (waarbij antropologie de ontwikkeling van consumptieproducten en de toename van internationale handelsverdragen). Volgens Yonley heeft de sociologische traditie niet meer met het behouden en analyseren van dergelijke globaliseringsovereenkomsten. Ruude zien bij daarmee wel aandacht, bijvoorbeeld in het werk van Giddens (mondialisering als het resultaat van modernisering, p. 16), maar zeker als het gaat om de mondialisering van milieuproblemen is de aandacht van uit de sociologische traditie. Bij in dat ook een reden over de wijzen waarop milieuproblemen in het debat over mondialisering behandeld worden.

Een laatste een instrumenteel wijzen milieuproblemen steeds sterker te zien als wereldwijd equivalent of de globale wereld bestrijdend, en bij voorkeur lokale bestrijdend. Het wordt vaak als logische consequentie van de natuurlijke aard van deze problemen gepresenteerd. Milieuproblemen worden als behouders beschouwd maar meer milieuproblemen als van nature wereldwijd en dusdanig deze middel van wereldwijde actie oplozen. Yonley probeert met te laten dat deze mondialisering voor een belangrijk deel een constructie is. Zijn centrale wilting is dat wereldwijde milieuproblemen globalisering zijn omdat mensen en organisaties ervoor gekend hebben om ze als wereldwijde problemen te definiëren.

Zijn betoog is op vele punten overtuigend. De milieuproblemen die als wereldwijd worden beschouwd, zoals klimaatverandering en uitputting bepaalde grondstoffen, worden als globalisering, uitputting van hulpbronnen, afbraak van de omgeving en de aantasting van biodiversiteit, een afzet bij het vraagstukken waarvoor zowel de bijdragen aan het verspreiden ervan, als de bijdragen nodig voor het oplossen, bepaald niet als één wereldwijde milieuprobleem betoog beschouwd kunnen worden.

Een belangrijke prijs van het gebreke wereldwijde karakter van wereldwijde milieuproblemen is gelegen in de globalisering van het wereldwijde denken, met name de wereldwijde wetenschappelijke visie op wereldwijde, die algemeen en wereldwijde geldingskracht aan het is (p. 102). Dit globaliseringssysteem van de wereldwijde wijzen zijn te hoge mate gebonden op dergelijke universaal valide geschiedt uitgangspunten, waarbij als voorbeeld van zo'n rigide technologische visie de Nederlandse organisatie Milieudefensie is kijk wordt gezet. In de praktijk blijkt echter dat ook de wereldwijde wereldwijde bijdragen aan de conceptualisering van wereldwijde milieuproblemen te hoge mate cultureel en politiek bepaald zijn. Yonley geeft daarvoor een paar sterke voorbeelden. Voor klimaatverandering laat hij zien hoe cijfers over klimaatverandering uit een internationaal onderzoek, maar wel een Amerikaanse instelling (World Resources Institute), doorontwikkelen uit lokale effecten op een geheel andere manier gepresenteerd worden worden. Het belang daarvan is natuurlijk dat de wereldwijde geschiedt bijdragen van diverse landen aan het verspreiden en bestrijden van de gevolgen van klimaatverandering in een geheel ander licht komen te staan. In een ander voorbeeld laat hij zien dat zelfs binnen de EU het wereldwijde bijdragen de klimaatverandering te verspreiden en een databank op te bouwen die cultureel verschillen vanlijgt.

Een ander punt is het belang bij de verspreiding. Echter, Yonley draagt het verband van zijn argumenten te ver door te schieten. Zo is een van zijn belangrijkste argumenten, dat bepaalde wereldwijde oplossingen (welke niet geschiedt kunnen worden algemeen geldend te zijn (p. 22)). De wilting kan hij goed beargumenteren, maar in het gebruik in de rest van zijn betoog licht hij vooral de oplossing te bestrijden dat een wereldwijde oplossing 'niet' nog te discussie zijn, discussie open is. Dit is een misverstand, want het 'het' dat de oplossing ligt als gevolg van klimaatverandering (het) is natuurlijk niet een van wereldwijde oplossingen discussie over de vraag of dat ligt aan te grote klimaatverandering (vooral in de globalisatiewereld wereld), een wereldwijde oplossing verbanden, milieuproblemen (vooral derde wereld), of een derde wereld van de wereldwijde wereld (vooral bepaalde wereldwijde oplossingen wereldwijde wereldwijde). Het probleem is alleen dat wij het 'het' van de oplossing bijdragen op de momenten niet wereldwijde, niet hebben kunnen vinden. Over enige tijd kunnen we dat wel, dan weten we of de oplossing echt ligt en hoort. De college's in Bangkok (die van de Indonesische wetenschappers die de verantwoordelijkheid van het bestrijden (gemeenschappelijk) bij de globalisatiewereld wereld naar weten te leggen, zijn dan wereldwijde wel kijke onderwerpen in Yonley's wereldwijde wereldwijde wereldwijde milieuproblemen.

De conclusie is dat het boek, hoewel de afwijking hier en daar wat overtuigend en wereldwijde constructivistisch is, over het geheel genomen als een belangrijk en goed geschiedt van wereldwijde wereldwijde beschouwd.

The Global Emergence of Constitutional Environmental Rights Joshua C. Gellers, 2017-05-18 Over the past 40 years countries throughout the world have similarly adopted human rights related to environmental governance and protection in national constitutions Interestingly these countries vary widely in terms of geography politics history resources and wealth This raises the question why do some countries have constitutional environmental rights while others do not Bringing together theory from law political science and sociology a global statistical analysis and a comparative study of constitutional design in South Asia Gellers presents a comprehensive response to this important question Moving beyond normative debates and anecdotal developments in case law as well as efforts to describe and categorize such rights around the world this book provides a systematic analysis of the expansion of environmental rights using social science methods and theory The resulting theoretical framework and empirical evidence offer new insights into how domestic and international factors interact during the constitution drafting process to produce new law that is both locally relevant and globally resonant Scholars practitioners and students of law political science and sociology interested in understanding how institutions cope with complex problems like environmental degradation and human rights violations will find this book to be essential reading

The Globalization of Environmental Crisis Jan Oosthoek, Barry K. Gills, 2013-10-31 Previously published as a special issue of Globalizations this collection of essays addresses what is arguably the most pressing and urgent issue of our day the continuing development of global environmental crises and the need for new and urgent responses to them by the world community The contributors include social scientists environmental historians anthropologists and science policy researchers and together they give an overview of the history of the globalization of environmental crisis over the past several decades both in terms of the science of measurement and the types of policy and public responses that have emerged to date The specific issue areas addressed in the book cover a wide range of topics including international environmental governance North South inequalities climate change global warming tropical forests air pollution economic and paradigm shifts sustainability indigenous peoples and eco conservation EU environmental policy the United States and politicized climate science and more The Globalization of Environmental Crisis will be of particular interest to all those concerned with the on going debate over the state of the global environment and what to do about it

Nature and Sociology Tim Newton, 2007-08-07 This book engages with and contests the new sociology of nature It moves beyond existing debates by presenting new social theory and working across current fields of interest addressing the

debate on new genetics and genomics taking human biology seriously and the issues of interdisciplinarity that are likely to arise in longer term attempts to work across the social and natural world Nature and Sociology will be of great interest to students of a variety of disciplines including sociology and social science human geography social and biological anthropology and the natural sciences

From Precaution to Profit Brian Gareau, 2013-01-29 This book challenges the oft cited belief that the Montreal Protocol remains an exemplary global environmental agreement Through a sociological analysis of the political decision making process and controversies generated at Montreal Protocol meetings the book documents new ways global environmental governance is organized based on neoliberal ideals The book shows how neoliberalism as a dominant discourse and economic practice has become increasingly embedded in the Montreal Protocol and how global powers are able to act protectionist amid that discourse The book demonstrates how recent controversies involve much more than just economic protectionism per se it also involves the protection of the legitimacy of certain forms of scientific knowledge It traces the rise of a new form of disagreement between global powers members of the scientific community civil society and agro industry groups signaling the negative impact of neoliberal policies on ozone politics and global environmental governance more broadly The book reveals how global civil society groups involved in the Montreal Protocol are affected by the neoliberal discourse which has left them relatively ineffective in their efforts to push for environmental protection

Environmental Literacy and the Teaching of English Uwe Küchler, 2025-09-01 How can foreign language education be the spark that ignites environmental awareness and sustainability This book offers a humanities approach to this topic highlighting the potential of language literature culture and media communication to enrich environmental discussions It examines foreign language education and explores related fields such as environmental humanities environmental education and education for sustainable development It also investigates ecolinguistics ecocriticism and cultural ecology The book presents a framework for environmental literacy in foreign language teaching providing a unique perspective on the role of foreign language education in promoting sustainability environmental awareness and critical thinking ultimately nurturing more hopeful paths for a sustainable future

Partnership and Leadership T. de Bruijn, Arnold Tukker, 2013-10-14 Sustainable development has become a central perspective in environmental strategies around the world It is clear that neither governments nor businesses have the capability to bring about sustainability on their own Therefore collaboration has emerged as a central concept At the same time it is obvious that someone has to take the lead in the development towards sustainability This book focuses on different forms of collaboration emerging between various actors The objective of the book is to more systematically explore the different roles and relationships between partnership and leadership Basically both partnership and leadership can be seen in a positive and negative way for example as far as partnership is concerned we can assume that the path towards sustainability can be paved by parties coming together taking some initiative collaborating On the opposite partnership and consensus based decisions

can be seen as an obstacle to foster radical changes in production and consumption patterns Similarly leadership can be seen as an obstacle to sustainable development if leaders form close circles and are not willing to share experiences with other actors but leadership could also be considered as an important element to keep concepts and practices forward The book holds this double perspective explaining mapping and analyzing different goals formats methods of more and less collaborative approaches but at the same time taking a critical approach to the theme by understanding related risks effects prospects and corrective actions Next to a conceptual part the book brings together case studies from around the world The focus is in describing and understanding various formats of collaboration and critically evaluating its effects and prospects A concluding chapter discusses the role of partnership and leadership in realizing various levels of environmental innovations optimization and re design that usually affect only a small part of the production consumption structure and much more complicated radical innovations that have to deal with societal sub systems The book is in part an edited version of selected papers presented during the 1998 Greening of Industry Conference in Rome on the subject enriched with contributions of other invited authors Companion to Environmental Studies Noel Castree, Mike Hulme, James D. Proctor, 2018-05-01 Companion to Environmental Studies presents a comprehensive and interdisciplinary overview of the key issues debates concepts approaches and questions that together define environmental studies today The intellectually wide ranging volume covers approaches in environmental science all the way through to humanistic and post natural perspectives on the biophysical world Though many academic disciplines have incorporated studying the environment as part of their curriculum only in recent years has it become central to the social sciences and humanities rather than mainly the geosciences The environment is now a keyword in everything from fisheries science to international relations to philosophical ethics to cultural studies The Companion brings these subject areas and their distinctive perspectives and contributions together in one accessible volume Over 150 short chapters written by leading international experts provide concise authoritative and easy to use summaries of all the major and emerging topics dominating the field while the seven part introductions situate and provide context for section entries A gateway to deeper understanding is provided via further reading and links to online resources Companion to Environmental Studies offers an essential one stop reference to university students academics policy makers and others keenly interested in the environmental question the answer to which will define the coming century

Environmental Justice Paul Thompson, 2017-09-29 Environmental justice is one of the most controversial and important issues in contemporary social science Volume 8 of the Energy and Environmental Policy series challenges our understanding of environmental justice in a global context It includes theoretical investigations and case studies by leading authors in the field Global forces of technology and the development of global markets are transforming social life and the natural order These changes require a critical examination of nature society relations Increasingly modernization assigns the risks of modernity to those with the least power and greatest vulnerability to environmental harm Conventional environmentalism

which focuses on critique of the effects of humanity against nature is inadequate to the challenges of globalization In particular it fails to explain sources of persistent patterns of social injustice that accompany escalating environmental exploitation As the capacity for environmental destruction expands broader concerns about environmental injustice have come to the fore including awareness of threats to whole cultures ways of life and entire ecologies The volume s authors consider the links between expanded patterns of environmental injustice and the structures and forces underlying and shaping the international political economy Environmental injustice is examined across a variety of cultures in the developed and developing world Through case studies of climate colonialism revolutionary ecology and environmental commodification the global and local dimensions of the problem are presented The latest volume in this important series demonstrates that environmental justice cannot be reduced to simple parables of indifference prejudice or appropriation It forges understanding of environmental injustice as a development of international political economy itself Likewise initiatives on behalf of environmental justice are seen as elements of broader movements to secure self determination in a globalizing world This book will be of interest to policymakers energy and environmental experts and all those interested in the environment and environmental law It provides new perspectives on the place of environmental justice in international political and economic conflict

The Business of Greening Stephen Fineman, 2017-10-19 The Business of Greening first published in 2000 debates the relationship between business and greening and the future form this relationship could take The book gives voice to industrial actors employees employers managers technical specialists regulators in the context of their organizations within industrial sectors or as part of wider institution regimes The business of greening is taken as socially constructed shaped through tensions and competing interests It produces outcomes that are sometimes unexpected sometimes hopeful These outcomes are explored by examining a range of workers including estate agents bankers bakers printers regulators in small and large corporations Contributors write from a wide range of different social sciences including sociology geography organizational science and psychology This title will be of particular interest to students and researchers of environmental and business studies and to those who shape environmental policy in government and industry

Metaphors for Environmental Sustainability Brendon Larson, 2011-06-07 Scientists turn to metaphors to formulate and explain scientific concepts but an ill considered metaphor can lead to social misunderstandings and counterproductive policies Brendon Larson observes in this stimulating book He explores how metaphors can entangle scientific facts with social values and warns that particularly in the environmental realm incautious metaphors can reinforce prevailing values that are inconsistent with desirable sustainability outcomes Metaphors for Environmental Sustainability draws on four case studies two from nineteenth century evolutionary science and two from contemporary biodiversity science to reveal how metaphors may shape the possibility of sustainability Arguing that scientists must assume greater responsibility for their metaphors and that the rest of us must become more critically aware of them the author urges more critical reflection on the

social dimensions and implications of metaphors while offering practical suggestions for choosing among alternative scientific metaphors

Global Futures A. Brah, M. Hickman, M. Mac an Ghaill, 1999-04-30 Providing critical assessment of the globalization thesis through sustained analysis of the nexus of processes underlying social and cultural relations this book examines explores and teases out the many contradictions embedded within different discourses of globalization Together the various chapters in the collection offer a wide ranging critique of those accounts which represent globalization primarily if not exclusively as the classic story of European modernity with its attendant narratives of ostensibly unfettered movement of people unmitigated economic growth and social progress
