North American Wetlands Conservation Act, Progress Report, 1994 *Occasional Paper*, 1978 *Hydrological Classification of Canadian Prairie Wetlands and Prediction of Wetland Inundation in Response to Climatic Variability* Ming-Ko Woo, Robert D. Rowsell, Robert G. Clark, Canadian Wildlife Service, 1993 Several wetland classification schemes have been devised to facilitate waterfowl management in North America These schemes were developed primarily from vegetational not hydrological characteristics of wetlands and so do not consider annual changes in slough responses to climatic variability Here we provide a hydrological scheme that proves to be consistent with Millar s 1976 ecological classification scheme

Abstract ICOLD Dam Decommissioning - Guidelines CIGB ICOLD, 2018-10-04 Dam decommissioning or dam removal has been increasingly common since the past decade The reason for considering dam removal may have to do with the safety of dams high repair costs high operating and maintenance costs or effects on fish passage and water quality However the decision to remove a dam must be based on careful evaluation of the alternatives to address the specific problem at each dam The ICOLD Committee for decommissioning dams was established in 2005 to develop information that can be used by ICOLD members to respond to questions about the dismantling of dams and to provide a forum for the exchange of information This ICOLD Bulletin is not intended as a design guide but as a guide to the decision making process consultation and regulatory approvals design and construction issues sediment management and performance monitoring The primary aim of these Dam decommissioning guidelines is to provide dam owners dam engineers and other professionals with the information needed to guide decision making when considering dam dismantling as a project alternative They are not meant to be used as a design guide but as a guide to highlighting the points of interest The guidelines in this ICOLD Bulletin apply only to flood defense structures and not to fall dams *Annual Report* Pomological and fruit growing society of the province of Quebec, 1910

Research and Information Needs for Canadian Wetlands, Proceedings of a Workshop on Wetland Hydrogeochemistry Christopher H. R. Wedeles, 1991 The purpose of this document is to report on the research and information needs for wetlands that were identified in the workshops Key knowledge and information gaps regarding physical and chemical aspects of Canadian wetlands were identified under three broad categories natural hydrogeochemical processes effects of human activity and wetlands as habitat **Pollution, Great Lakes Water Quality** Canada, 1993

Introduction, Refractory Materials, and Fuel. Revised and Greatly Enlarged Edition, Etc* John Percy, 1885 *Sedimentation and Sustainable Use of Reservoirs and River Systems / Sédimentation et Utilisation Durable des Réservoirs et Systèmes Fluviaux* ICOLD CIGB, 2023-11-15 ICOLD Bulletin 147 discusses the upstream and downstream fluvial morphological impacts of reservoir sedimentation and possible mitigation measures The current state of and possible future sediment deposition in reservoirs

have been investigated globally with the aid of the ICOLD Register on Dams The global mean reservoir sedimentation rate was found to be 0.8 % of the original storage capacity per year The book also investigates the impacts of dams on the ecology related to fluvial morphological changes and guidelines are proposed to mitigate the impacts on the downstream river morphology Finally an economical model is presented which considers a life cycle approach for reservoir conservation

Ce CIGB Bulletin 147 traite des impacts morphologiques fluviaux en amont et en aval de la sédimentation des réservoirs et des mesures d'atténuation possibles L'état actuel et l'avenir possible du dépôt de sédiments dans les réservoirs ont été étudiés à l'échelle mondiale à l'aide du registre des barrages de la CIGB Le taux moyen mondial de sédimentation des réservoirs s'est avéré de 0.8 % de la capacité de stockage initiale par an Le livre étudie également les impacts des barrages sur l'écologie liés aux changements morphologiques fluviaux et des directives sont proposées pour atténuer les impacts sur la morphologie des rivières en aval Enfin un modèle économique est présenté qui prend en compte une approche de cycle de vie pour la conservation des réservoirs

A First Scientific French Reader Benjamin Lester Bowen, 1902 **Plan Canada**, 1998 Informe de la Reunión Especial de Expertos Técnicos Sobre Indicadores Y Criterios Para El Cultivo Sostenible Del Camarón Food and Agriculture Organization of the United Nations, 1998 The Bangkok FAO Technical Consultation on Policies for Sustainable Shrimp Culture recommended that FAO specifically request governments of countries engaged in shrimp culture to report on progress in implementing the code of conduct for responsible fisheries in relation to shrimp culture activities to the Committee on Fisheries COFI at its next and subsequent sessions This publication contains the findings of the ad hoc expert meeting in pursuance of this recommendation The meeting prioritized and prepared a recommended short list of the criteria and indicators of sustainable shrimp fisheries which should form the basis for regular reporting by countries to COFI The meeting stressed that these criteria and indicators related to the national level and did not encompass farm level and local level indicators It noted that the regular collation of these indicators would greatly benefit the planning and management of shrimp culture development in the countries The meeting concluded that it would be premature at this stage to request governments to report actual data on those indicators to the next session of COFI in February 1999 Instead the meeting elaborated a questionnaire to allow governments to review and comment on the recommended indicators and on their present and future ability to acquire the related data and information Moreover the meeting decided that in this questionnaire governments should be given the opportunity to indicate the nature of assistance deemed desirable to adopt a comprehensive statistical system for their shrimp culture sub sectors in view of the inadequacies of many existing systems and the high socio economic importance and specific management and development requirements of shrimp culture
