Territorial Ambitions And The Gardens Of Versailles:

Territorial Ambitions and the Gardens of Versailles Chandra Mukerji, 1997-09-25 In seventeenth century France land took on new importance for the practice of politics and rituals of court life In her major new book Chandra Mukerji highlights the connections between the two seemingly disparate activities of engineering and garden design She shows how at Versailles in particular the royal park showcased French skills in using nature and art to design a distinctively French landscape and create a naturalized political territoriality. She challenges the association of state power with social and legal structures alone and demonstrates the importance for Louis XIV and his state of a controlled physical site a demarcated French territory within the wider European geo political continent Envisioning Landscapes, Making Worlds Stephen Daniels, Dydia DeLyser, J. Nicholas Entrikin, Doug Richardson, 2012-03-15 There has been a remarkable resurgence in the past decade of intellectual interplay between geography and the humanities in both academic and public circles Terminology and concepts such as space place landscape mapping and geography are becoming pervasive as conceptual frameworks and core metaphors in recent publications by humanities scholars and well known writers Envisioning Landscapes Making Worlds examines the depth and complexity of human meaning invested in maps attached to landscapes and embedded in the spaces and places of modern life The clashing and blending of cultures caused by globalization and the new technologies that profoundly alter human environmental experience suggest new geographical narratives and representations that are explored here by a multidisciplinary group of authors With contributions from leading scholars this text is essential reading for scholars and students seeking to understand the new synergies and interconnectedness of geography and the humanities

Scripturalizing the Human Vincent L. Wimbush,2015-07-16 Scripturalizing the Human is a transdisciplinary collection of essays that reconceptualizes and models scriptural studies as a critical comparative set of practices with broad ramifications for scholars of religion and biblical studies This critical historical and ethnographic project is focused on scriptures scripturalization scripturalizing as shorthand for the psycho cultural and socio political work we make language do for and to us Each essay focuses on an instance of or situation involving such work engaging with the Bible Book of Mormon Bhagavata Purana and other sacred texts artifacts and practices in order to explore historical and ongoing constructions of the human Contributors use the category of scriptures understood not simply as texts but as freighted shorthand for the dynamics and ultimate politics of language as tools for self illumination and self analysis The significance of the collection lies in the window it opens to the rich and complex view of the highs and lows of human un making as it establishes the connections between a seemingly basic and apolitical religious category and a set of larger social cultural phenomena and dynamics Mapping Discord Jeffrey N. Peters,2004 Mapping Discord examines a series of allegorical maps published in France during the seventeenth century that cast in spatial terms a number of heated aesthetic and social debates It discusses the convergence of map making and literary creation in the context of early modern cartographic practice and demonstrates

that the unique language of allegorical cartography raises important theoretical questions about the relations between rationalist discourses of science and the figural designs of imaginative writing In detailed analyses of the imaginary maps that appeared in seventeenth century novels and stories as well as of maps atlases and geographic treatises produced by professional scholars and engineers of the period Mapping Discord considers the ideological structure and uses of cartographic language and argues that allegorical maps have much to tell us about the potential capacity of every map to operate as a visual metaphor for power Illustrated Jeffrey N Peters is Associate Professor of French at the University of Kentucky Structures of Memory Jennifer A. Jordan,2006 Structures of Memory turns to the landscape of contemporary Berlin particularly places marked by the presence of the Nazi regime in order to understand how some places of great cruelty or great heroism are forgotten by all but eyewitnesses while others become the site of public ceremonies museums or commemorative monuments Does War Make States? Lars Bo Kaspersen, Jeppe Strandsbjerg, 2017-03-02 This engaging volume scrutinises the causal relationship between warfare and state formation using Charles Tilly's work as a foundation

The Perraults Oded Rabinovitch, 2018-11-15 In The Perraults Oded Rabinovitch takes the fascinating eponymous literary and scientific family as an entry point into the complex and rapidly changing world of early modern France Today the Perraults are best remembered for their canonical fairy tales such as Cinderella and Puss in Boots most often attributed to Charles Perrault one of the brothers While the writing of fairy tales may seem a frivolous enterprise it was in fact linked to the cultural revolution of the seventeenth century which paved the way for the scientific revolution the rise of national literatures and the early Enlightenment Rabinovitch argues that kinship networks played a crucial yet unexamined role in shaping the cultural and intellectual ferment of the day which in turn shaped kinship and the social history of the family Through skillful reconstruction of the Perraults careers and networks Rabinovitch portrays the world of letters as a means of social mobility He complicates our understanding of prominent institutions such as the Academy of Sciences Versailles and the salons as well as the very notions of authorship and court capitalism. The Perraults shows us that institutions were not simply rigid entities embodying or defining intellectual or literary styles such as Cartesianism empiricism or the purity of the French language Rather they emerge as nodes that connect actors intellectual projects family strategies and practices of **Instruments of Knowledge** Jean-François Gauvin, 2023-06-19 In a bid to claim scientific objects as requiring a writing significant amount of conceptual labor this book looks sequentially at instruments habits and museums The goal is to uncover how together these material and immaterial activities rules and commitments form one meaningful and credible blueprint revealing the building blocks of knowledge production They serve to conceptualize and examine the entire life of an instrument from its ideation and craft to its use reuse circulation recycling and if not obliterated its final entry into a museum It is such an epistemological triptych that guides this investigation Modernity Reimagined: An Analytic Guide Chandra Mukerji, 2016-12-19 Winner of the American Sociological Association's Distinguished Book Award in 2012 Chandra

Mukerji offers with this remarkable new book an explanation of the birth and subsequent proliferation of the many strands in the braid of modernity The journey she takes us on is dedicated to teasing those strands apart using forms of cultural analysis from the social sciences to approach history with fresh eyes Faced with the problem of trying to understand what is hardest to see the familiar she gains analytic distance and clarity by juxtaposing cultural analysis with history asking how modernity began and how people conjured into existence the world we now recognize as modern Part I describes the genesis of key modern social forms the modern self communities of strangers the modern state and the industrial world economy Part II focuses on modern social types races genders and childhood Part III focuses on some of the cultural artifacts and activities of the contemporary world that people have invented and used to cope with the burdens of self making and to react against the broken promises of modern discourse and the silent injuries of material modernism Beautifully illustrated with over 100 color photographs in its 10 chapters MODERNITY REIMAGINED is not just an explanation an analysis of how modern life came to be it is also a model for how to do cultural thinking about today s world Antiquarianism and the Visual Histories of Louis XIV Robert Wellington, 2017-07-05 Antiquarianism and the Visual Histories of Louis XIV Artifacts for a Future Past provides a new interpretation of objects and images commissioned by Louis XIV 1638 1715 to document his reign for posterity The Sun King s image makers based their prediction of how future historians would interpret the material remains of their culture on contemporary antiquarian methods creating new works of art as artifacts for a future time The need for such items to function as historical evidence led to many pictorial developments and medals played a central role in this Coin like in form but not currency the medal was the consummate antiquarian object made in imitation of ancient coins used to study the past Yet medals are often elided from the narrative of the arts of ancient r me France their neglect wholly disproportionate to the cultural status that they once held This revisionary study uncovers a numismatic sensibility throughout the iconography of Louis XIV and in the defining monuments of his age It looks beyond the standard political reading of the works of art made to document Louis XIV s history to argue that they are the results of a creative process wedded to antiquarianism an intellectual culture that provided a model for the production of history in the grand si e St. Petersburg and the Russian Court, 1703-1761 P. Keenan, 2013-06-24 This book focuses on the city of St Petersburg the capital of the Russian empire from the early eighteenth century until the fall of the Romanov dynasty in 1917 It uses the Russian court as a prism through which to view the various cultural changes that were introduced in the city during the eighteenth century Shapely Bodies Christine A. Jones, 2013-05-16 Shapely Bodies The Image of Porcelain in Eighteenth Century France constructs the first cultural history of porcelain making in France It takes its title from two types of bodies treated in this study the craft of porcelain making shaped clods of earth into a clay body to produce high end commodities and the French elite shaped human bodies into social subjects with the help of makeup stylish patterns and accessories These practices crossed paths in the work of artisans whose luxury objects reflected and also influenced the curves of fashion

in the eighteenth century French artisans began trials to reproduce fine Chinese porcelain in the 1660s The challenge proved impossible until they found an essential ingredient kaolin in French soil in the 1760s Shapely Bodies differs from other studies of French porcelain in that it does not begin in the 1760s at the S vres manufactory when it became technically possible to produce fine porcelain in France but instead ends there Without the secret of Chinese porcelain artisans in France turned to radical forms of experimentation Over the first half of the eighteenth century they invented artificial alternatives to Chinese porcelain decorated them with French style and with equal determination shaped an identity for their new trade that distanced it from traditional guild crafts and aligned it with scientific invention The back story of porcelain making before kaolin provides a fascinating glimpse into the world of artisanal innovation and cultural mythmaking To write artificial porcelain into a history of real porcelain dominated by China Japan and Meissen in Saxony French porcelainiers learned to describe their new commodity in language that tapped into national pride and the mythic power of French savoir faire Artificial porcelain cut such a fashionable image that by the mid eighteenth century Louis XV appropriated it for the glory of the crown When the monarchy ended revolutionaries reclaimed French porcelain the fruit of a century of artisanal labor for the Republic Tracking how the porcelain arts were depicted in documents and visual arts during one hundred years of experimentation Shapely Bodies reveals the politics behind the making of French porcelain s image Published by University of Delaware Press Distributed worldwide by Rutgers University Press The Pineapple from Domestication to Commodification Victoria Avery, Melissa Calaresu, 2025-10-15 The pineapple's discovery by European colonisers in the late fifteenth century and its remarkable global trajectory from an early modern object of rarity desire and horticultural innovation to a cheap canned consumable and fair trade logo today is a story of modern globalisation. The Pineapple from Domestication to Commodification is a wide ranging interdisciplinary volume intended to provoke timely debate and generate radical rethinking of an overly familiar fruit with associations from luxury to kitsch It deliberately problematizes the pineapple by investigating understudied tensions between its representational power and the historical and political contexts of its worldwide production and consumption This connects the global and local at the heart of contemporary debates about the nature and origins of our food It will have cross disciplinary appeal for scholars of politics economics history plant sciences food and material culture as well as for broader audiences interested in food gardening the environment and visual France Graham Robb, 2022-07-05 A wholly original history of France filled with a lifetime s knowledge and passion arts by the author of the New York Times bestseller Parisians Beginning with the Roman army's first recorded encounter with the Gauls and ending in the era of Emmanuel Macron France takes readers on an endlessly entertaining journey through French history Frequently hilarious always surprising Graham Robb s France combines the stylistic versatility of a novelist with the deep understanding of a scholar Robb's own adventures and discoveries while living working and traveling in France connect this tour through space and time with on the ground experience There are scenes of wars and revolutions from the plains of

Provence to the slums and boulevards of Paris Robb conveys with wit and precision what it felt like to look over the shoulder of a young Louis XIV as he planned the vast garden of Versailles and the dangerous thrill of having a ringside seat at the French revolution Some of the protagonists may be familiar but appear here in a very different light Caesar Charlemagne Louis XIV Napoleon Bonaparte General Charles de Gaulle This extraordinary narrative is the fruit of decades of research and thirty thousand miles on a self propelled two wheeled time machine a bicycle Even seasoned Francophiles will wonder if they really know that terra incognita on the edge of Europe that is currently referred to as France The Institutionalization of Science in Early Modern Europe, 2019-11-26 This volume aims to furnish a broader framework for analyzing the scientific and institutional context that gave rise to scientific academies in Europe including the Accademia del Cimento in Florence the Royal Society in London the Acad mie Royale des Sciences in Paris and the Academia naturae curiosorum in Schweinfurt The essays detail the multiple backgrounds that prompted seventeenth century savants from Italy to England and from Poland to Portugal to establish new forms of scientific organizations in which to institutionalize collaborative research as well as modes of communication with like minded individuals and associations The Construction of Space in Early China Mark Edward Lewis, 2012-02-01 This book examines the formation of the Chinese empire through its reorganization and reinterpretation of its basic spatial units the human body the household the city the region and the world The central theme of the book is the way all these forms of ordered space were reshaped by the project of unification and how at the same time that unification was constrained and limited by the necessary survival of the units on which it was based Consequently as Mark Edward Lewis shows each level of spatial organization could achieve order and meaning only within an encompassing superior whole the body within the household the household within the lineage and state the city within the region and the region within the world empire while each level still contained within itself the smaller units from which it was formed The unity that was the empire s highest goal avoided collapse back into the original chaos of nondistinction only by preserving within itself the very divisions on the basis of family or region that it claimed to transcend **Perspectives on Garden Histories** Michel Conan, 1999 Garden history is a discipline of contested purposes Perspectives on Garden Histories contributes to a self critical examination of this emergent field of study at the same time offering an overview of its main achievements in several domains such as Italian and Mughal gardens and of the new kinds of investigation to which they have led In its early years garden history centered on architectural studies of garden design but in the 1960s the emphasis shifted from garden design to garden meaning The new paradigm considered gardens as complex works of art and demanded an extensive documentation of the historical context as well as of the figurative and discursive sources. This approach in its turn was challenged by neo Marxist scholars who proceeded to view landscape appreciation as an ideological superstructure an outgrowth of agricultural production processes Garden designs and their histories can also be viewed as expressions of ideological conflicts in society Neither gardens nor their history can thus be studied independently of the social cultural and

political movements that give prominence to the contested ideologies Gardens can be used to foster some ideologies or reflect a reaction against a social change Comparative research offers another fascinating approach exploring the relations between European landscape concepts and other cultural contexts and discussing issues of cultural dominance and interpretation The emergence of various perspectives has led to the incorporation of further questions into the domain of garden studies which has been moving in new directions and using new methods in search of an adapted theoretical framework This volume offers a striking view of changes taking place in the discipline Place and Memory in the Singing Crane Garden Vera Schwarcz, 2014-11-05 The Singing Crane Garden in northwest Beijing has a history dense with classical artistic vision educational experimentation political struggle and tragic suffering Built by the Manchu prince Mianyu in the mid nineteenth century the garden was intended to serve as a refuge from the clutter of daily life near the Forbidden City In 1860 during the Anglo French war in China the garden was destroyed One hundred years later in the 1960s the garden served as the ox pens where dissident university professors were imprisoned during the Cultural Revolution Peaceful Western involvement began in 1986 when ground was broken for the Arthur Sackler Museum of Art and Archaeology Completed in 1993 the museum and the Jillian Sackler Sculpture Garden stand on the same grounds today In Place and Memory in the Singing Crane Garden Vera Schwarcz gives voice to this richly layered corner of China's cultural landscape Drawing upon a range of sources from poetry to painting Schwarcz retells the garden's complex history in her own poetic and personal voice In her exploration of cultural survival trauma memory and place she reveals how the garden becomes a vehicle for reflection about history and language Encyclopedic in conception and artistic in execution Place and Memory in the Singing Crane Garden is a powerful work that shows how memory and ruins can revive the spirit of individuals and cultures alike Nationalism in Modern Europe Derek Hastings, 2023-01-12 Derek Hastings s Nationalism in Modern Europe is the essential guide to a potent political and cultural phenomenon that featured prominently across the modern era With firm grounding in transnational and global contexts the book traces the story of nationalism in Europe from the French Revolution to the present Hastings reflects on various nationalist ideas and movements across Europe and always with a keen appreciation of other prevalent signifiers of belonging such as religion race class and gender which helps to inform and strengthen the analysis The text shines a light on key historiographical trends and debates and includes 20 images 14 maps and a range of primary source excerpts which can serve to sharpen vital analytical skills which are crucial to the subject New content and features for the second edition include A chapter examining region religion class and gender as alternative markers of identity throughout the 19th century An enhanced global dimension that covers transnational fascism and non European comparatives Additional primary source excerpts and figures Historiographical updates throughout which account for recent research in the field Repairing Infrastructures Christopher R. Henke, Benjamin Sims, 2020-10-13 An investigation of the causes and consequences of the strange ambivalent and increasingly central role of infrastructure repair

in modern life Infrastructures communication food transportation energy and information are all around us and their enduring function and influence depend on the constant work of repair In this book Christopher Henke and Benjamin Sims explore the causes and consequences of the strange ambivalent and increasingly central role of infrastructure repair in modern life Henke and Sims offer examples from local to global to investigate not only the role of repair in maintaining infrastructures themselves but also the social and political orders that are created and sustained through them Repair can encompass not only the kind of work we most commonly associate with the term but also any set of practices aimed at restoring a sense of normalcy or credibility to the places and institutions we inhabit in everyday life From cases as diverse as the repair of building systems on a university campus a conflict over retrofitting a bridge while protecting murals painted on it and the global challenge posed by climate change Henke and Sims assemble a range of examples to illustrate key conceptual points about the role of repair They show that repair is an essential if often overlooked aspect of understanding the broader impact and politics of infrastructures Understanding repair helps us better understand infrastructures and the scope of their influence on our lives

log linear analysis wikipedia - Sep 15 2023

log linear analysis is a technique used in statistics to examine the relationship between more than two categorical variables

Territorial Ambitions And The Gardens Of Versailles

the technique is used for both hypothesis testing and model building in both these uses models are tested to find the most parsimonious i e least complex model that best accounts for the variance in the observed frequencies a pearson s chi square test could be used instead of log linear analysis but that technique only allows for two of the variables to be c
