Weaponizing Maps Joe Bryan, Denis Wood, 2015-03-05 Maps play an indispensable role in indigenous peoples' efforts to secure land rights in the Americas and beyond. Yet indigenous peoples did not invent participatory mapping techniques on their own; they appropriated them from techniques developed for colonial rule and counterinsurgency campaigns and refined by anthropologists and geographers. Through a series of historical and contemporary examples from Nicaragua, Canada, and Mexico, this book explores the tension between military applications of participatory mapping and its use for political mobilization and advocacy. The authors analyze the emergence of indigenous territories as spaces defined by a collective way of life and as a particular kind of battleground.

**The Last Turtlemen of the Caribbean** Sharika D. Crawford, 2020-10-01 Illuminating the entangled histories of the people and commodities that circulated across the Atlantic, Sharika D. Crawford assesses the Caribbean as a waterscape where imperial and national governments vied to control the profitability of the sea. Crawford places the green and hawksbill sea turtles and the Caymanian turtlemen who hunted them at the center of this waterscape. The story of the humble turtle and its hunter, she argues, came to play a significant role in shaping the maritime boundaries of the modern Caribbean. Crawford describes the colonial Caribbean as an Atlantic commons where all could compete to control the region's diverse peoples, lands, and waters and exploit the region's raw materials. Focusing on the nineteenth and twentieth centuries, Crawford traces and connects the expansion and decline of turtle hunting to matters of race, labor, political and economic change, and the natural environment. Like the turtles they chased, the boundary-flouting laborers exposed the limits of states' sovereignty for a time but ultimately they lost their livelihoods, having played a significant role in legislation delimiting maritime boundaries. Still, former turtlemen have found their deep knowledge valued today in efforts to protect sea turtles and recover the region's ecological sustainability.

*Mapping Latin America* Jordana Dym, Karl Offen, 2011-09-28 57 studies of individual maps and the cultural environment that they spring from and exemplify, including one pre-Columbian map.

Blacks and Blackness in Central America Lowell Gudmundson, Justin Wolfe, 2010-10-18 Essays recovering the forgotten and downplayed histories of blacks in Central America, demonstrating the centrality of African Americans to the region's history from the earliest colonial times to the present.

*The Awakening Coast* Karl Offen, Terry Rugeley, 2014-06-01 The indigenous and Creole inhabitants of the Mosquito Coast of African descent in present-day Nicaragua underwent a key transformation when two Moravian missionaries arrived in 1849. Within a few short generations, the new faith became so firmly established there that eastern Nicaragua to this day remains one of the world's strongest Moravian enclaves. *The Awakening Coast* offers the first comprehensive English language selection of the writings of the multinational missionaries who established the Moravian faith among the indigenous and Afro-descendant populations through the turbulent years of the Great Awakening of 1881 to 1882, when converts flocked to the church and the mission's membership more than doubled. The anthology tracks the intersection of religious, political, and economic forces that led to this dynamic religious shift and illustrates how the mission's first fifty years turned a relatively obscure branch of

Protestantism into the most important political and spiritual institution in the region by contextualizing the Great Awakening Protestant evangelism and indigenous identity during this time of dramatic social change *Land, Liberty, and Water* Salvador Salinas, 2018-10-09 Following the death of Emiliano Zapata in 1919 the Zapatistas continued to lead the struggle for land reform *Land Liberty and Water* offers a political and environmental history of the aftermath of the 1910 Mexican Revolution by examining the outcomes of the insurgency in the state of Morelos Salvador Salinas takes readers inside the diverse pueblos of the former Zapatistas during the 1920s and 1930s and recounts the first statewide land reform carried out in postrevolutionary Mexico Based on extensive archival research he reveals how an alliance with the national government that began in 1920 stimulated the revival of rural communities after ten years of warfare and helped once landless villagers reclaim Morelos's valley soils forested mountains and abundant irrigation waters During the presidency of Plutarco Elías Calles 1924-1928 pueblos forged closer ties to the centralized government in Mexico City through a plethora of new national institutions such as ejidos forestry cooperatives water juntas credit societies and primary schools At the same time the expansion of charcoal production in the Sierra de Ajusco and rice cultivation in the lowland valleys accelerated deforestation and intensified water conflicts Salinas recounts how the federal reforms embraced by the countryside aided the revival of the pueblos and in return villagers repeatedly came to the defense of an embattled national regime Salinas gives readers interested in modern Mexico the Zapatista revolution and environmental history a deeply researched analysis of the outcomes of the nation's most famous revolutionary insurgency *In the Shadow of Melting Glaciers* Mark Carey, 2010-04-07 Global climate change has triggered profound changes at the ground level and for real people This book illustrates in vivid detail how 25,000 Peruvian residents died from melting Andean glaciers Successful engineering efforts to prevent additional catastrophes simultaneously helped commodify glaciers erode local authority and unleash contested modernization agendas in the Andes *Latin American Research Review*, 2007 *Indigenous Autocracy* Jaclyn Sumner, 2023-11-14 When General Porfirio Díaz assumed power in 1876 he ushered in Mexico's first prolonged period of political stability and national economic growth though progress came at the cost of democracy *Indigenous Autocracy* presents a new story about how regional actors negotiated between national authoritarian rule and local circumstances by explaining how an Indigenous person held state level power in Mexico during the thirty-five year dictatorship that preceded the Mexican Revolution the Porfiriato and the apogee of scientific racism across Latin America Although he was one of few recognizably Indigenous persons in office Próspero Cahuantzi of Tlaxcala kept his position 1885-1911 longer than any other gubernatorial appointee under Porfirio Díaz's transformative but highly oppressive dictatorship 1876-1911 Cahuantzi leveraged his identity and his region's Indigenous heritage to ingratiate himself to Díaz and other nation-building elites Locally Cahuantzi navigated between national directives aimed at modernizing Mexico often at the expense of the impoverished rural majority and strategic management of Tlaxcala's natural resources in particular balancing growing

industrial demand for water with the needs of the local population Jaclyn Ann Sumner shows how this intermediary actor brokered national expectations and local conditions to maintain state power challenging the idea that governors during the Porfirian dictatorship were little more than provincial stewards who repressed dissent Drawing upon documentation from more than a dozen Mexican archives the book brings Porfirian era Mexico into critical conversations about race and environmental politics in Latin America *History in Practice* Ludmilla Jordanova,2019-08-22 Exploring the breadth and complexities of history as a field of study History in Practice demystifies what historians actually do and the tasks they take on This study written by one of the most acute practitioners in the field examines not only the academic discipline but also engages with the use of historical ideas in the wider world The new edition features A new chapter on history in the digital age covering the use of information technology in historical practice Extended coverage of the relationships between history and other disciplines Fresh material on current trends in the practice of history Over 35 new illustrations spread throughout the book drawn from around the world This book is essential reading for all students seeking an understanding of history as a discipline **British Bulletin of Publications on Latin America, the Caribbean, Portugal and Spain** ,2003
