**Territories of Grace** Keith P. Luria, 2024-06-28 *Territories of Grace* offers a sophisticated model of cultural change in early modern rural society by examining the religion of villagers in the French diocese of Grenoble during the Counter Reformation. Keith P. Luria describes the encounter of village and official forms of piety, arguing that historians have oversimplified the struggle between high and low culture in early modern Europe. He shows how religion was constructed in a complex relationship between villagers concerned with creating their own religion and a bishop intent on cultivating in his flock a Counter Reformation style of worship and a new standard of social behavior. Luria analyzes records of pastoral visits, examines forms of devotion to saints, and undertakes an ethnographic investigation of one community to illustrate this interaction. He uncovers a process of cultural change in which villagers and reformers alike took an active role in creating their own culture by adopting, adapting, or resisting the symbols, practices, and meanings of others. The theoretical insights of his study will be of interest to historians, anthropologists, and others concerned with rural society, comparative religion, and questions of cultural change. This title is part of UC Press's *Voices Revived* program, which commemorates the University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, *Voices Revived* makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. **Seventeenth-Century Cultural Discourse** Thomas Worcester, 2011-08-25 The series *Religion and Society* (RS) contributes to the exploration of religions as social systems both in Western and non-Western societies. In particular, it examines religions in their differentiation from and intersection with other cultural systems such as art, economy, law, and politics. Due attention is given to paradigmatic case or comparative studies that exhibit a clear theoretical orientation with the empirical and historical data of religion and such aspects of religion as ritual, the religious imagination, constructions of tradition, iconography, or media. In addition, the formation of religious communities, their construction of identity, and their relation to society and the wider public are key issues of this series.

*Reformation and Early Modern Europe* David M. The Fabrication of Labor Richard Biernacki,2024-06-04 This monumental study demonstrates the power of culture to define the meaning of labor Drawing on massive archival evidence from Britain and Germany as well as historical evidence from France and Italy The Fabrication of Labor shows how the very nature of labor as a commodity differed fundamentally in different national contexts A detailed comparative study of German and British wool textile mills reveals a basic difference in the way labor was understood even though these industries developed in the same period used similar machines and competed in similar markets These divergent definitions of the essential character of labor as a commodity influenced the entire industrial phenomenon affecting experiences of industrial work methods of remuneration disciplinary techniques forms of collective action and even industrial architecture Starting from a rigorous analysis of detailed archival materials this study broadens out to analyze the contrasting developmental pathways to wage labor in Western Europe and offers a startling reinterpretation of theories of political economy put forward by Adam Smith and Karl Marx In his brilliant cross national study Richard Biernacki profoundly reorients the analysis of how culture constitutes the very categories of economic life This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1996

*Fascist Modernities* Ruth Ben-Ghiat,2001-01-02 Ruth Ben Ghiat s innovative cultural history of Mussolini s dictatorship is a provocative discussion of the meanings of modernity in interwar Italy Eloquent pathbreaking and deft in its use of a broad range of materials this work argues that fascism appealed to many Italian intellectuals as a new model of modernity that would resolve the contemporary European crisis as well as long standing problems of the national past Ben Ghiat shows that

at a time of fears over the erosion of national and social identities Mussolini presented fascism as a movement that would allow economic development without harm to social boundaries and national traditions She demonstrates that although the regime largely failed in its attempts to remake Italians as paragons of a distinctly fascist model of mass society twenty years of fascism did alter the landscape of Italian cultural life Among younger intellectuals in particular the dictatorship left a legacy of practices and attitudes that often continued under different political rubrics after 1945 *Beyond the Pale*

Benjamin Nathans,2002-08-29 A surprising number of Jews lived literally and figuratively beyond the Pale of Jewish Settlement in tsarist Russia during the half century before the Revolution of 1917 Thanks to the availability of long closed Russian archives along with a wide range of other sources Benjamin Nathans reinterprets the history of the Russian Jewish encounter In the wake of Russia s Great Reforms Nathans writes a policy of selective integration stimulated social and geographic mobility among the empire s Jews The reaction that culminated toward the turn of the century in ethnic restrictions on admission to universities the professions and other institutions of civil society reflected broad anxieties that Russians were being placed at a disadvantage in their own empire Nathans s conclusions about the effects of selective integration and the Russian Jewish encounter during this formative period will be of great interest to all students of modern Jewish and modern Russian history Catholic Revival in the Age of the Baroque Marc R. Forster,2001-02-05 This book is a

study of Catholic reform popular Catholicism and the development of confessional identity in southwest Germany Based on extensive archival study it argues that Catholic confessional identity developed primarily from the identification of villagers and townspeople with the practices of Baroque Catholicism particularly pilgrimages processions confraternities and the Mass Thus the book is in part a critique of the confessionalization thesis which dominates scholarship in this field The book is not however focused narrowly on the concerns of German historians An analysis of popular religious practice and of the relationship between parishioners and the clergy in villages and small towns allows for a broader understanding of popular Catholicism especially in the period after 1650 Local Baroque Catholicism was ultimately a successful convergence of popular and elite lay and clerical elements which led to an increasingly elaborate religious style **Alone Before God**

**from Vesuvius** Nelson Moe,2006-05-17 This book shows that the Southern Question is far from just an Italian issue for its origins are deeply connected to the formation of European cultural identity between the mid eighteenth and late nineteenth centuries Jacket **Producing Desire** Dror Ze'evi,2006-10-16 This highly original book brings into focus the sexual

discourses manifest in a wealth of little studied source material medical texts legal documents religious literature dream interpretation manuals shadow theater and travelogues in a nuanced wide ranging and powerfully analytic exploration of Ottoman sexual thought and practices from the heyday of the Ottoman Empire in the sixteenth century to the beginning of

the twentieth Following on the work of Foucault Gagnon Laqueur and others the premise of the book is that people shape their ideas of what is permissible define boundaries of right and wrong and imagine their sexual worlds through the set of discourses available to them Dror Ze evi finds that while some of these discourses were restrictive and others more permissive all treated sex in its many manifestations as a natural human pursuit And he further argues that all these discourses were transformed and finally silenced in the last century leaving very little to inform Middle Eastern societies in sexual matters With its innovative approach toward the history of sexuality in the Middle East Producing Desire sheds new light on the history of the Ottoman Empire on the history of sexuality and gender and on the Islamic Middle East today
