From the Terrorists' Point of View Fathali M. Moghaddam, 2006-06-30 Presenting a picture of the world giving rise to Islamic terrorism From the Terrorists Point of View argues that terrorism arises from a deep and pervasive identity crisis in Islamic societies The account presented in these 10 chapters is shaped by the author's first hand experiences of life in the Islamic world as well as his more than quarter century of research on the psychology of conflict and radicalism Moghaddam shows us why individuals who are recruited into terrorist organizations are convinced it is the only viable alternative They believe there are no effective legal means of expressing their grievances and participating in decision making so they become socialized to see terrorist organizations as legitimate The organizations they join train them to adopt an us vs them categorical view seeing all members outside their group including civilians as among the evil enemy ranks Looking at the perspective of the terrorist groups themselves Moghaddam explains why current U S policy focusing almost exclusively on individual terrorists and their eradication will achieve only short term gains He argues that the more effective long term

policy against terrorism is prevention That he writes requires cultivation and nourishment of contextualized democracy through culturally appropriate avenues Only allowing people a greater voice and creating mobility opportunities for them will ensure that they do not feel a need to climb the staircase to terrorism The International Political Thought of Carl Schmitt Louiza Odysseos, Fabio Petito, 2007-03-06 Presenting the first critical analysis of Carl Schmitt's *The Nomos of the Earth* and how it relates to the epochal changes in the international system that have risen from the collapse of the Westphalian international order There is an emerging recognition in political theory circles that core issues such as order social justice rights need to be studied in their global context Schmitt's international political thought provides a stepping stone in these related paths offering an alternative history of international relations of the genesis achievements and demise of the Westphalian system Writing at a time when he believed that the spatial political and legal order the *nomos* of the earth had collapsed he highlighted the advent of the modern state as the vehicle of secularization tracing how this interstate order was able to limit and rationalize and humanize war Providing a large number of case studies including global terrorism humanitarian intervention and US hegemony this book will give further impetus to and expand the nascent debate on the significance of Schmitt's legal and political thought for international politics *The International Political Thought of Carl Schmitt* will be of interest to students and scholars of international relations law and history **Peace in Uganda** S. Sasidharan,2020-02-14 Understanding Theologocracy is a collection of nine essays plus an introductory chapter The essays are independent studies on different conceptual issues involved in the ways of understanding religious and spiritual practices in general The term theologocracy has been coined by the author to characterise the working of religion and spirituality in the modern secularised world Theologocracy thus signifies a rule of theology as something different from the rule of theocracy Unlike the case of theocracy where political rule is controlled directly by particular religion in the secular socio political scenario religiosity spirituality takes a formal backseat for an indirect control of the secular world through the promotion of theological interests It tries to argue that theologocratic ways are found even in the case of secularism as it is operating in the modern liberal democracy Theologocracy is a situation where different theologies are seen operating simultaneously for controlling the socio political power in favour of different theological religious communities In a typical theocracy there will be a single religion to control political power whereas in a secular democracy many religious and related forces interests take control of power directly and indirectly It is to characterise such an indirect or disguised operation of different theological and religious community interests that the term theologocracy has been framed Secularism seen as a disguised theocracy crypto theocracy has been proved to be logically inconceivable and historically unavailable A race for supremacy or superiority of theological ideals and promises seems to be the basic level from which every thelogocratic religion operates Since the urge for power and supremacy is so peculiar to every thelogocratic religiosity no domain of human imagination is free from the imprints of theologocracy especially the domain of so called secular socio political processes A theoretical analysis of the political nature of religious and spiritual practices is a running theme for the different essays of this book
