The British Nuclear Experience John Baylis,Kristan Stoddart,2015 Based on a detailed analysis of archives and high level interviews this book looks at the role of beliefs culture and identity in the making of British nuclear policy from 1945 through to the present day This book also examines Britain's nuclear experience by moving away from traditional interpretations of why states develop and maintain nuclear weapons by adopting a more contemporary approach to political theory Traditional mainstream explanations tend to stress the importance of factors such as the maximization of power the pursuit of national security interests and the role of structure in a largely anarchic international system This book does not dismiss these approaches but argues that British experience suggests that focusing on beliefs culture and identity provides a more useful insight and distinctive interpretation into the process of British nuclear decision making than the more traditional approaches

John Stewart Bell and Twentieth Century Physics Andrew Whitaker,2016 John Stewart Bell 1928-1990 was

one of the most important figures in twentieth century physics famous for his work on the fundamental aspects of the century's most important theory quantum mechanics While the debate over quantum theory between the supremely famous physicists Albert Einstein and Niels Bohr appeared to have become sterile in the 1930s Bell was able to revive it and to make crucial advances Bell's Theorem or Bell's Inequalities He was able to demonstrate a contradiction between quantum theory and essential elements of pre quantum theory locality and causality The book gives a non mathematical account of Bell's relatively impoverished upbringing in Belfast and his education It describes his major contributions to quantum theory but also his important work in the physics of accelerators and nuclear and elementary particle physics The Prime Minister:

The Office and Its Holders Since 1945 Peter Hennessy, 2001-10-05 He illuminates often for the first time precise Prime Ministerial attitudes toward and authority over nuclear weapons policy the planning and waging of war and the secret services as well as dealing with governmental overload the Suez crisis and the Soviet threat He concludes with a controversial assessment of the relative performance of each Prime Minister since 1945 and a new specification for the premiership as it meets its fourth century BOOK JACKET **Deterring Armageddon: A Biography of NATO** Peter Apps, 2024-02-01 EXCELLENT THE TLS HUGELY IMPRESSIVE THE INDEPENDENT AN ASTONISHINGLY FINE HISTORY COUNTRY LIFE FASCINATING DAILY MAIL The history of the world's most successful military alliance from the wrecked Europe of 1945 to Vladimir Putin's invasion of Ukraine As they signed NATO into being after World War II its founders fervently believed that only if the West's democracies banded permanently together could they avoid a catastrophic global atomic conflict Over the 75 years since the alliance has indeed avoided war with Russia also becoming a major political strategic and diplomatic player well beyond its borders It has survived disagreements between leaders from Eisenhower Churchill and de Gaulle to Trump Stoltenberg and Merkel faced down Kremlin foes from Stalin to Putin and endured unending questions and debate over what new nations might be allowed to join Deterring Armageddon takes the reader from backroom deals that led to NATO's creation through the Cold War the Balkans and Afghanistan to the current confrontation with the Kremlin following the invasion of Ukraine It examines the tightrope walked by alliance leaders between a powerful United States sometimes flirting with isolationism and European nations with their ever evolving wishes for autonomy and influence Having spent much of its life preparing for conflicts that might never come NATO has sometimes found itself in wars that few had predicted and with its members now again planning for a potential major European conflict It is a tale of tension danger rivalry conflict big personalities and high stakes military and diplomatic posturing as well as espionage politics and protest From the Korean War to the pandemic the Berlin and Cuba crises to the chaotic evacuation from Kabul Deterring Armageddon tells how the alliance has shaped and been shaped by history and looks ahead to what might be the most dangerous era it has ever faced Utterly eye opening compelling haunting and continually illuminating As Peter Apps so brilliantly demonstrates in this gripping book the story of the NATO alliance is in many ways a parallel global history of the

last 75 years As well as all the outbreaks of seething tension between the US and its European allies and the counter moves of rival powers this is also an account of just how often in those postwar years that we all stood on the edge of the most terrible abyss With mesmerising fluency and dazzling research Apps follows the criss crossing threads of the Cold War and beyond Those threads converge in our shadowed present and the conflict in Ukraine In order to fathom today s dark world Apps has explored a labyrinth of once classified history and he brings dazzling clarity Sinclair McKay Science and Spectacle John Agar,2014-02-04 Science and Spectacle relates the construction of the telescope to the politics and culture of post war Britain From radar and atomic weapons to the Festival of Britain and later Harold Wilson s rhetoric of scientific revolution science formed a cultural resource from which post war careers and a national identity could be built The Jodrell Bank Radio Telescope was once a symbol of British science and a much needed prestigious project for the Department of Scientific and Industrial Research but it also raised questions regarding the proper role of universities as sites for scientific research *Fallout* Roger Cross,2001 Fallout is the strange but true story of a celebrated Australian scientist s involvement in the 1956 British atomic bomb tests Hedley Marston an idol with his own feet of clay was determined not only to reveal official lies and chicanery but to expose as charlatans the Australian scientists who were appointed to protect the nation from any possible harm Contrary to official pronouncements radioactive fallout was blowing across the country and contaminating many towns and communities including Marston s beloved Adelaide The dispute that ensued was perhaps the most acrimonious in the history of Australian science Fallout tells us much about the nature of science and our society It is about science in service of the bomb and in service of self Roger Cross tells a story that must make us ask the alarming question could we be fooled again *New Horizons for Innovation Studies* Frédéric Goulet,Dominique Vinck,2023-12-11 This timely book takes an insightful look at rethinking innovation and how lessons can be learnt from what is a major turning point in our contemporary societies the urgent need to reduce the use or consumption of certain substances and technologies due to the dangers they pose to our environments and current way of life Using theoretical reflection and empirical work in a broad range of sectors including agriculture food health religion energy packaging markets and digital technology eminent scholars utilise new perspectives to enrich our understanding of innovation processes and how these can be transformed A Military History of the Cold War, 1944-1962 Jonathan M. House,2014-04-28 The Cold War did not culminate in World War III as so many in the 1950s and 1960s feared yet it spawned a host of military engagements that affected millions of lives This book is the first comprehensive multinational overview of military affairs during the early Cold War beginning with conflicts during World War II in Warsaw Athens and Saigon and ending with the Cuban Missile Crisis A major theme of this account is the relationship between government policy and military preparedness and strategy Author Jonathan M House tells of generals engaging in policy confrontations with their governments political leaders among them Anthony Eden Nikita Khrushchev and John F Kennedy many of whom made military decisions that hamstrung their own political goals In the

pressure cooker atmosphere of atomic preparedness politicians as well as soldiers seemed instinctively to prefer military solutions to political problems And national security policies had military implications that took on a life of their own The invasion of South Korea convinced European policy makers that effective deterrence and containment required building up and maintaining credible forces Desire to strengthen the North Atlantic alliance militarily accelerated the rearmament of West Germany and the drive for its sovereignty In addition to examining the major confrontations nuclear and conventional between Washington Moscow and Beijing including the crises over Berlin and Formosa House traces often overlooked military operations against the insurgencies of the era such as French efforts in Indochina and Algeria and British struggles in Malaya Kenya Cyprus and Aden Now more than fifty years after the events House describes understanding the origins and trajectory of the Cold War is as important as ever By the late 1950s the United States had sent forces to Vietnam and the Middle East setting the stage for future conflicts in both regions House s account of the complex relationship between diplomacy and military action directly relates to the insurgencies counterinsurgencies and confrontations that now occupy our attention across the globe

The Culture of Secrecy David Vincent,1998 A comprehensive study of the closure of communication in modern British history right up to 1998 this book seeks to understand why secrets have been kept and how the systems of control have been constructed and challenged over the past 160 years

Defence Intelligence and the Cold War Huw Dylan,2014-10-30 During the Second World War British intelligence provided politicians and soldiers with invaluable knowledge Britain was determined to maintain this advantage following victory but the wartime machinery was uneconomical unwieldy and unsuitable for peace Drawing on oral testimony international archives and private papers *Defence Intelligence and the Cold War* provides the first history of the hitherto little known organisation designed to preserve and advance British capability in military and military related intelligence for the Cold War the Joint Intelligence Bureau JIB Headed by General Eisenhower s wartime intelligence man Major General Kenneth Strong the JIB was central to the mission to spy on and understand the Soviet Union and the broader Communist world It did so from its creation in 1946 to its end in 1964 when it formed a central component of the new Defence Intelligence Staff This volume reveals hitherto hidden aspects of Britain s mission to map the Soviet Union for nuclear war the struggle to understand and contain the economies of the USSR China and North Korea in peace and during the Korean War and the urgent challenge to understand the nature and scale of the Soviet bomber and missile threat in the 1950s and 1960s The JIB s dedicated work in these fields won it the support of some politicians and military men but the enmity of others who saw the centralised organisation as a threat to traditional military intelligence The intelligence officers of the JIB waged Cold War not only with Communist adversaries but also in Whitehall

Being Nuclear Gabrielle Hecht, 2012-03-02 The hidden history of African uranium and what it means for a state an object an industry a workplace to be nuclear Uranium from Africa has long been a major source of fuel for nuclear power and atomic weapons including the bomb dropped on Hiroshima In 2003 after the infamous yellow cake from Niger Africa suddenly became notorious as a source of uranium a component of nuclear weapons But did that admit Niger or any of Africa's other uranium producing countries to the select society of nuclear states Does uranium itself count as a nuclear thing In this book Gabrielle Hecht lucidly probes the question of what it means for something a state an object an industry a workplace to be nuclear Hecht shows that questions about being nuclear a state that she calls nuclearity lie at the heart of today's global nuclear order and the relationships between developing nations often former colonies and nuclear powers often former colonizers Hecht enters African nuclear worlds focusing on miners and the occupational hazard of radiation exposure Could a mine be a nuclear workplace if as in some South African mines its radiation levels went undetected and unmeasured With this book Hecht is the first to put Africa in the nuclear world and the nuclear world in
