## **Testing The Medical Covenant Active Euthanasia And Health Care Reform:**

Testing the Medical Covenant William F. May, 2004-01-06 William F May a leading expert on medical ethics here explores two of today's most crucial tests of the medical covenant active euthanasia and health care reform May begins with an incisive introduction that delineates the covenantal or relational nature of the practice of medicine over against the merely contractual view the quid pro quos of the commercial buying and selling of professional services In the subsequent chapters May follows the implications of the medical covenant with respect to the related issues of euthanasia and health care reform He also provides a covenantal view of professional character and virtue what virtues we should look for in covenanted physicians and nurses discusses the limits of the medical covenant in the face of medical futility and examines the implications of covenant keeping for the shape of future health care reform

*Cura Animarum* Ioan C. Veres, 2025-04-25 As artificial intelligence advances healthcare faces a profound ethical question Can machines truly care This book critically examines the rise of AI driven social robots carebots in patient care evaluating their benefits and potential harms through the lens of Christian ethics While AI may enhance efficiency and offer support in specific healthcare contexts it also risks dehumanizing care replacing genuine human presence with technological substitutes Grounded in a theology of covenant care this work builds its ethical argument around the biblical parable of the Good Samaritan emphasizing the irreplaceable nature of human compassion It presents theological and ethical criteria to guide the responsible use of AI in healthcare ensuring that technology serves rather than supplants the dignity of human relationships This book is essential reading for theologians ethicists healthcare professionals and AI developers navigating the intersection of faith ethics and emerging technology As healthcare increasingly integrates AI *Cura Animarum* challenges readers to consider where technology supports human dignity and where it threatens to erode the essence of genuine care Is AI merely a tool or does it risk redefining what it means to care

**A Revised Consent Model for the Transplantation of Face and Upper Limbs:**

**Covenant Consent** James L. Benedict, 2017-04-25 This book supports the emerging field of vascularized composite allotransplantation VCA for face and upper limb transplants by providing a revised ethically appropriate consent model which takes into account what is actually required of facial and upper extremity transplant recipients In place of consent as permission giving waiver or autonomous authorization the standard approaches this book imagines consent as an ongoing mutual commitment i e as covenant consent The covenant consent model highlights the need for a durable personal relationship between the patient subject and the care provider researcher Such a relationship is crucial given the recovery period of 5 years or more for VCA recipients The case for covenant consent is made by first examining the field of vascularized composite allotransplantation the history and present understandings of consent in health care and the history and use of the covenant concept from its origins through its applications to health care ethics today This book explains how standard approaches to consent are inadequate in light of the particular features of facial and upper limb transplantation In

contrast use of the covenant concept creates a consent model that is more appropriate ethically for these very complex surgeries and long term recoveries      *Health Care as a Social Good* David M. Craig, 2014-07-23 Health Care as a Social Good argues that as escalating costs absorb a greater percentage of family income and government budgets only the implementation of religious values can help Americans create a more community based system which reflects the ideals of American democracy      Christian Ethics Hak Joon Lee, 2021-11-09 In this capacious and accessible introduction to Christian ethics Hak Joon Lee advances a renewed vision of Christian life that is liberative grace centered and justice and peace oriented in nature Responding to key ethical questions of today Lee applies the moral meaning and implications of the New Covenant in Jesus Christ to twenty first century life characterized by fluidity fragmentation division and violence Christian Ethics begins by introducing covenant as the central drama and storyline of Scripture that culminates in the New Covenant of Jesus It presents shalom the wholeness and flourishing of creation as God s ultimate purpose and God s covenant as God s organizing mechanism of community that mediates God s work of liberation and restoration Lee proposes a creative model of Christian ethics based on the New Covenant of Jesus and its organizing patterns reconstructing the key categories of ethics agency norms authority of Scripture ethical discernment etc and drawing out four practices communicative engagement just peacemaking grassroots organizing and nonviolence The result is a new model of Christian ethics that is inclusive egalitarian ecological and justice and peace oriented which overcomes the limitations of traditional covenantal ethics In the second part of the book Lee systematically applies New Covenant ethics to the most urgent and controversial social issues of our time democratic politics economic ethics creation care criminal justice race sex and marriage medicine and war and peace Through his deep pastoral and irenic inquiries into these difficult topics Lee demonstrates a pattern of covenantal moral reasoning that undercuts the dominant neoliberal ethos of individualism and transactional relationship that more and more influences Christian moral decisions His conclusion is that as covenant has been at the heart of modern democracy human rights civil society and civic formation a renewed understanding of covenant centered in Jesus can help to heal our broken society and imperiled planet and to reorganize the fragmented human life in the era of globalization and digitization      *The Future of Creation Order* Govert J. Buijs, Annette K. Mosher, 2019-04-16 This book investigates humanities social sciences and politics from the perspective of the concept of creation order It is the second volume in a series that provides a unique and topical overview of attempts to assess the current health of the concept of creation order within Reformational philosophy when it is compared with other perspectives Divided into a section on fundamental reflections and a section on normative practices it discusses issues such as redemption beauty nature love justice morality and ethics It concludes with discussions on a practice based theory to explain religion in international relations and a normative model for the practice of cooperation in development This series reflects the role that the branch of Christian philosophy called Reformational philosophy plays in the discussion on the status of laws of nature Ever since its inception almost a century ago the concepts of order and law

principle structure have been at the heart of this philosophy One way to characterise this tradition is as a philosophy of creation order Firmly rejecting both scholastic metaphysics and Deism Reformational philosophers have maintained the notion of law as holding for reality Questions have arisen about the nature of such law is it a religious or philosophical concept does law just mean orderliness How does it relate to laws of nature Have they always existed or do they emerge during the process of evolution

**Covenantal Biomedical Ethics for Contemporary Medicine** James J. Rusthoven, 2014-04-29 Principles based biomedical ethics has been a dominant paradigm for the teaching and practice of biomedical ethics for over three decades Attractive in its conceptual and linguistic simplicity it has also been criticized for its lack of moral content and justification and its lack of attention to relationships This book identifies the modernist and postmodernist worldviews and philosophical roots of principlism that ground the moral minimalism of its common morality premise Building on previous work by prominent Christian bioethicists an alternative covenantal ethical framework is presented in our contemporary context Relationships constitute the core of medicine and understanding the ethical meaning of those relationships is important in providing competent and empathic care While the notion of covenant is articulated through the richness of meaning taught in the Christian Scriptures covenantal commitment is also appreciated in Islamic Jewish and even pagan traditions as well In a world of increasing medical knowledge and consequent complexity of care such commitment can help to resist enticements toward the pursuit of self interest It can also improve relationships among caregivers each of whose specific expertise must be woven into a matrix of care that constitutes optimal medical practice for each vulnerable and needy patient

Lammers, Allen Verhey, 1998-05-11 Collecting a wide range of contemporary and classical essays dealing with medical ethics this huge volume is the finest resource available for engaging the pressing problems posed by medical advances **Current Issues in Irish Health Management** Timothy J. Wineberg,2008-01-01 This book integrates the traditional understanding of a profession a calling to selfless service for the public good through the pursuit of a learned art with that of vocation work that offers a deep sense of personal fulfilment meaning and identity Professions are moral endeavours since they require vulnerable individuals to trust in the competence and integrity of someone who professes to care for them Currently most versions of professional ethics narrowly focus upon standards of conduct or upon ethical dilemmas Yet these are rarely compelling enough to change us they are not morally formative This volume takes a different tack to doing ethics It explicitly targets the moral development of educators This is crucial because as we develop our sensibilities of perception and qualities of character we can better interpret practice situations and respond fittingly Moreover this approach to ethics seeks to reconceptualize our professional obligation to embody it in more adequate metaphors and to revitalize its relational dimension In this view our task as educators is to seek out those relational metaphors images and narratives of practice which are profound enough to shape our self perceptions and to fund our moral formation This book explores five ethical spheres sacrifice community craft tradition and moral imagination and five respective pedagogical images which illuminate the nature of professional care servant moral friend mentor covenantor and moral companion When critically engaged and appropriated these rich metaphorical images provide clarity order and meaning to our perceptions and powerful imperatives for our own moral development *Beleaguered*
