Foreman, Torben Johansen, 2002-08-28 The

bestselling first edition of Textbook of Receptor Pharmacology originated from a renowned course in receptor pharmacology taught at the University College of London for the past three decades Its innovative format united four major approaches to the study of receptors molecular biology quantitative functional studies of agonists and antagonists ligand binding and signal transduction systems The second edition builds on this foundation This edition streamlines the material and focuses on cell membrane receptors along with their immediate signal transducers The section on the molecular structure of receptors reflects the advances in this area This edition also includes two restructured new chapters one on G proteins and one on tyrosine kinases as signal transducers Several chapters also contain problems for students to solve as well as worked out solutions The book contains over one hundred useful diagrams and tables to aid illustration of concepts and a helpful appendix explaining the simple mathematics used in the text A time saving resource and comprehensive textbook Textbook of Receptor Pharmacology Second Edition provides in depth up to date coverage of this still rapidly expanding research area that is both fundamental to the science of pharmacology and on the cutting edge of new drug development **Textbook of**

Receptor Pharmacology, Third Edition John C. Foreman, Torben Johansen, Alasdair J. Gibb, 2010-09-10 For the past four decades University College London has offered a renowned course on receptor pharmacology Originating from this course the perennially bestselling Textbook of Receptor Pharmacology has presented in depth coverage of this rapidly expanding area of research This third edition continues to combine current understanding of classical quantitative pharmacology and drug receptor interactions with the basics of receptor structure and signal transduction mechanisms providing an integrated analysis of the mechanisms of drug action at membrane receptors The hallmark of this popular text is the uniting of four major approaches to the study of receptors Molecular investigation of receptor structure Quantitative functional studies of agonists and antagonists Ligand binding Signal transduction at the cell membrane Maintaining the second edition's focus on cell membrane receptors and the immediate signal transduction events at the membrane this edition includes updated

chapters on receptor structure and signal transduction by G proteins and tyrosine kinases as well as enhancements to the quantitative treatment of drug receptor interactions Several chapters contain problems and worked out solutions giving students the ability to test their comprehension of the material Hundreds of diagrams and figures further enhance the text A time saving resource and comprehensive learning tool Textbook of Receptor Pharmacology Third Edition carries on the tradition of providing in depth up to date coverage of this critical area that is both fundamental to the science of pharmacology and on the cutting edge of new drug development

The G Protein-Coupled Receptors

Handbook Lakshmi A. Devi, 2008-03-01 A comprehensive survey of the many recent advances in the field of G protein coupled receptors GPCR The authors describe the current knowledge of GPCR receptor structure and function the different mechanisms involved in the regulation of GPCR function and the role of pharmacological chaperones in GPCR folding and maturation They also present new findings about how GPCR dimerization oligomerization modifies the properties of individual receptors and show how recent developments are leading to significant advances in drug discovery such as the detection of ligands for orphan GPCRs Also discussed are the most recent developments that could lead to new drug discoveries the role of GPCRs in mediating pain the development of receptor type selective drugs based on the structural plasticity of receptor activation and the identification of natural ligands of orphan GPCRs deorphanization as possible drug targets
