Textiles Edition:

Interior Textiles T Rowe, 2009-09-25 This book provides an overview of the types of textiles used within the interior textile sector and key technological developments and safety issues affecting the industry. An understanding of these topics enables the designer or manufacturer to select the most appropriate fabrics for interior applications. The first group of chapters reviews types and selection of materials for interior textiles including natural and synthetic fibres as well as knitted, woven and nonwoven fabrics. Further chapters review surface design of interior textiles and the use of textiles in carpets and floor coverings. The second part of the book discusses developments in such areas as joining furniture fabrics, the use of sustainable and recycled textiles in interior applications, using interior textiles to minimise indoor environmental pollution, flame retardant materials and innovative textiles for seating. Interior textiles design and developments is an important text for manufacturers, designers and buyers of interior textiles as well as being a valuable resource for students and academics studying interior design and materials. Provides a comprehensive review of the type of textiles used within the interior textile sector. Considers environmental issues in interior textiles, assessing different types of sustainable and recycled textiles. Explores the important issues of surface design and flammability testing. Advances in Healthcare and Protective Textiles Shahid Ul Islam, Abhijit Majumdar, Bhupendra Singh Butola, 2023-02-09 Advances in Healthcare and Protective Textiles addresses technologies that have had a major impact in industry for decades but which are currently attracting unprecedented attention due to their applications in the fight against the Coronavirus epidemic. Recent advances in textile technology have opened new possibilities for textile researchers and scientists in antiviral textiles, flame retardant textiles, antimicrobial textiles, insect repellent textiles, breathable medical textiles, aroma protective textiles, high tech textiles, smart textiles, nano textiles and more. This book provides systematic and comprehensive coverage of cutting edge research and developments on material design, methodologies, characterizations, processes, properties and applications of medical, healthcare and protective textiles. In addition, sections pay special attention to advanced fabrication methodologies and materials used in apparel engineering. Provides a thorough review of recent advances in personal protective equipment (PPE) design and manufacture in response to the requirements of the fight against Coronavirus. Gives advice on improving sustainability through the use of reusable and recyclable medical textiles. Explores innovative materials like biopolymers and their applications in medical textiles.
