Textual Histories Readings In The Anglo Saxon Chronicle:

Textual Histories Thomas A. Bredehoft, 2001-01-01 What modern scholars have been too willing to dismiss as a scattershot collection of unrelated annals is Bredehoft argues a tool created to forge through linking literature and history a patriotic Anglo Saxon national identity *Constructing the Anglo-Saxon Chronicles* Daniel Anlezark, 2025-06-03 Offers insights into sources and inspirations authorship and authorial style and patterns of separation and convergence across versions of the Anglo Saxon Chronicles The Anglo Saxon Chronicle is one of the most important documents to survive from early medieval England Written in Old English it was first created during the reign of King Alfred the Great 871 899 Up to Alfred s reign and then in multiple continuations extending into the twelfth century the Chronicle versions often provide a unique record of events at times reported in the barest style at others with passionate commentary This book is the first to tell the story of how the Chronicles came to be providing a clear but detailed account of the development of its various versions It starts with an examination of the textual and manuscript evidence then explores the work of the two chroniclers first responsible for the Anglo Saxon Chronicle s creation in the late ninth century arguing that the first made a set of annals from disparate sources The author then contends that a later reviser aligned with the Alfredian political programme wrote the annals for Alfred s reign and at the same time also revised earlier entries including the famous story of Cynewulf and Cyneheard This book also sheds new light on the annals of the Unready arguing that Archbishop Wulfstan of York is likely to have authored some these together with some tenth century annals Its final chapter provides the first comprehensive study of all the Chronicles poetry **Readings in Medieval Texts** David Frame Johnson, Elaine M. Treharne, 2005 Readings in Medieval Texts offers a thorough and accessible introduction to the interpretation and criticism of a broad range of Old and Middle English canonical texts from the ninth to the fifteenth centuries The volume brings together 24 newly commissioned chapters by a leading international team of medieval scholars An introductory chapter highlights the overarching trends in the composition of English Literature in the Medieval periods and provides an overview of the textual continuities and innovations Individual chapters give detailed information about context authorship date and critical views on texts before providing fascinating and thought provoking examinations of crucial excerpts and themes This book will be invaluable for undergraduate and graduate students on all courses in Medieval Studies particularly those focusing on understanding literature and its role in society *The Making of England* Mark Atherton, 2017-01-30 During the tenth century England began to emerge as a distinct country with an identity that was both part of yet separate from Christendom The reigns of Athelstan Edgar and Ethelred witnessed the emergence of many key institutions the formation of towns on modern street plans an efficient administration and a serviceable system of tax Mark Atherton here shows how the stories legends biographies and chronicles of Anglo Saxon England reflected both this exciting time of innovation as well as the myriad lives loves and hates of the people who wrote them He demonstrates too that this was a nation coming of age

ahead of its time in its use not of the Book Latin used elsewhere in Europe but of a narrative Old English prose devised for law and practical governance of the nation state for prayer and preaching and above all for exploring a rich and daring new literature This prose was unique but until now it has been neglected for the poetry Bringing a volatile age to vivid and muscular life Atherton argues that it was the vernacular of Alfred the Great as much as Viking war that truly forged the nation The Oxford History of Historical Writing Daniel R. Woolf, Andrew Feldherr, Grant Hardy, 2011 A collection of essays from leading historians which explores the ways in which history was written in Europe and Asia between 400 and 1400

The Oxford History of Historical Writing Sarah Foot, Chase F. Robinson, 2012-10-25 How was history written in Europe and Asia between 400 1400 How was the past understood in religious social and political terms And in what ways does the diversity of historical writing in this period mask underlying commonalities in narrating the past The volume which assembles 28 contributions from leading historians tackles these and other questions Part I provides comprehensive overviews of the development of historical writing in societies that range from the Korean Peninsula to north west Europe which together highlight regional and cultural distinctiveness Part II complements the first part by taking a thematic and comparative approach it includes essays on genre warfare and religion amongst others which address common concerns of historians working in this liminal period before the globalizing forces of the early modern world **The Medieval North and Its Afterlife** Siân Grønlie, Carl Phelpstead, 2023-12-04 This book showcases the variety and vitality of contemporary scholarship on Old Norse and related medieval literatures and their modern afterlives The volume features original new work on Old Norse poetry and saga other languages and literatures of medieval north western Europe and the afterlife of Old Norse in modern English literature Demonstrating the lively state of contemporary research on Old Norse and related subjects this collection celebrates Heather O Donoghue s extraordinary and enduring influence on the field as manifested in the wide ranging and innovative research of her former students and colleagues **Reading Old English Biblical Poetry** Janet Schrank Ericksen, 2020-11-03 Reading Old English Biblical Poetry considers the Junius 11 manuscript the only surviving illustrated book of Old English poetry in terms of its earliest readers and their multiple strategies of reading and making meaning Junius 11 begins with the Creation story and ends with the final vanquishing of Satan by Jesus The study is framed by particular attention to the materiality of the manuscript and how that might have informed its early reception and it broadens considerations of reading beyond those of the manuscript s compiler and possible patron As a book Junius 11 reflects a rich and varied culture of reading that existed in and beyond houses of God in England in the tenth and eleventh centuries and it points to readers who had enough experience to select and find wisdom narrative pleasure and a diversity of other things within this or any book s contents **Early Medieval Monetary History** Martin Allen, 2016-12-05 Mark Blackburn was one of the leading scholars of the numismatics and monetary history of the British Isles and Scandinavia during the early medieval period He published more than 200 books and articles on the subject and was instrumental in

building bridges between numismatics and associated disciplines in fostering international communication and cooperation and in establishing initiatives to record new coin finds This memorial volume of essays commemorates Mark Blackburn's considerable achievement and impact on the field builds on his research and evaluates a vibrant period in the study of early medieval monetary history Containing a broad range of high quality research from both established figures and younger scholars the essays in this volume maintain a tight focus on Europe in the early Middle Ages 6th-12th centuries reflecting Mark's primary research interests In geographical terms the scope of the volume stretches from Spain to the Baltic with a concentration of papers on the British Isles As well as a fitting tribute to remarkable scholar the essays in this collection constitute a major body of research which will be of long term value to anyone with an interest in the history of early medieval Europe

Early English Queens, 850-1000 Matthew Firth, 2024-04-23 This book offers a comprehensive biography led examination of queenship in England between 850 and 1000 tracing the development of the queen's role from bed companion to institutional office The period 850-1000 is critical to the development of English queenship In the aftermath of Viking invasion the kings of Wessex expanded their hegemony over neighbouring regions gradually establishing themselves as the kings of England Parallel to this broad narrative of political change is the lesser known story told in this book of the royal women who took part in it The lives of three remarkable women thelfd Lady of the Mercians and the West Saxon consorts Eadgifu and lfthryth are central to the story here retold through the careful analysis and reappraisal of source documents These biographies set the stage for detailed study of the agency and advocacy of all women who held queenly office in England between 850 and 1000 as well as their legacies and reception by later generations Early English Queens 850-1000 gives important insights into the role women played in the first 150 years of the West Saxon dynasty offering a compelling narrative that will appeal to students and scholars of early medieval England and royal studies
