The 3rs And The New Religion:

Equipping Educators to Teach Religious Literacy Emile Lester, W. Y. Alice Chan, 2022-03-17 This volume provides a detailed evaluation of a unique education program implemented in secondary schools in Georgia to enhance teachers' religious literacy and their ability to promote this in schools and classrooms. The text demonstrates that religious literacy can be proactively taught to students whilst also highlighting key considerations and tensions around religious liberty in the American South. Spanning rural, urban, and suburban Georgia, the text presents an original approach to the growing field of religious literacy by foregrounding community voices and perspectives. Using rich empirical data and qualitative interviews with religious and political leaders, scholars, teachers, parents, and students, the book evaluates the challenges, efficacy, and benefits of the program in view of rising political polarization. In doing so, the text tackles historical and contemporary issues around race and religion and considers tensions between religious and nonreligious groups in the US. Ultimately, the book presents a significant contribution to the dialogue around fostering religious literacy in schools. This text will benefit researchers, academics, and educators with an interest in religious education, teacher education, and religious literacy more broadly. Those interested in the sociology of education as well as diversity and religion in America will also benefit from this volume.

State Support for Religious Education Anne Bayefsky, Arie Waldman, 2006-11-30

This book is an essential tool for those interested in the vital relationship between international human rights law and domestic policy. It explores this subject in the context of public funding for religious education in Canada, an area of controversy for well over a hundred years. This work provides in one volume a unique set of source documents concerning the legal and political history of religious education in a multicultural environment and especially in Ontario, Canada's largest province. It makes available for the first time a complete set of documents concerning the international litigation which has occurred between the Canadian government and its citizens who have been seriously affected by entrenched religious discrimination. An introductory essay provides an overview of how religious discrimination forms the backbone of Ontario's education system. Having failed to remedy such discrimination in Canadian courts, the UN Human Rights Committee provided a mechanism to address this breach of Canada's international legal obligations. The volume is an expose of the process and the consequences of international human rights litigation before the UN Committee and will be of special interest to others seeking to take cases of human rights violations forward to the international level. Canadian policy makers and analysts will consider this collection an invaluable resource for future consideration of the public funding of religious education in Canada, still unresolved after 135 years.

The Integration of Immigrants into American Society National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Committee on Population, Panel on the Integration of Immigrants into American Society, 2016-04-17

The United States prides itself on being a nation of immigrants and the country has a long history of successfully absorbing people from across the globe. The integration of immigrants and their children contributes to our economic vitality and our vibrant and ever-changing culture. We have offered opportunities to immigrants and their children to better themselves and to be fully incorporated into our society and in exchange immigrants have become Americans embracing an American identity and citizenship, protecting our country through service in our military, fostering technological innovation, harvesting its crops, and enriching everything from the nation's cuisine to its universities, music, and art. Today the 41 million immigrants in the United States represent 13.1 percent of the U.S. population. The U.S.-born children of immigrants, the second generation, represent another 37.1 million people or 12 percent of the population. Thus together the first and second generations account for one out of four members of the U.S. population. Whether they are successfully integrating is therefore a pressing and important question. Are new immigrants and their children being well integrated into American society within and across generations? Do current policies and practices facilitate their integration? How is American society being transformed by the millions of immigrants who have arrived in recent decades? To answer these questions, this new report from the National Academies of Sciences, Engineering,

and Medicine summarizes what we know about how immigrants and their descendants are integrating into American society in a range of areas such as education occupations health and language **The State of Social Progress of Islamic Societies** Habib Tiliouine, Richard J. Estes, 2016-04-08 This handbook addresses the historical background of the Islamic world and reviews its basic past intellectual achievements It studies social progress of these regions and sub regions in comparison with other parts of the world It uses large data sets and well established statistically weighted Indexes in order to assess the nature and pace of the multiple facets of social change in member states of the Organization of Islamic Cooperation OIC The handbook extensively discusses the main challenges confronting the Islamic nations in the social economic political and ideological fields Though it is recognizable that social change in the Islamic World is generally positive it remains highly variable in pace and there is room to speed it up to the benefit of millions of deprived Muslim people Hence the book studies the different propositions and programs of action such as the United Nations Millennium Development Campaign and the OIC s Ten Year Programme of Action to present an integrated and comprehensive agenda of action to help improve the situation in the Islamic World **Encyclopedia of the Social and Cultural Foundations of Education: A-H ; 2, I-Z ; 3, Biographies, visual history, index** Eugene F. Provenzo, John P. Renaud, Asterie Baker

Provenzo, 2009 The Encyclopedia provides an introduction to the social and cultural foundations of education The first two volumes consist of A Z entries featuring essays representing the major disciplines including philosophy history and sociology and a third volume is made up of documentary photographic and visual resources **Community Education Journal** , 1974

The Writers Directory , 2004 *Education as and for Legitimacy* M.K. Bacchus, 2006-01-01 This study of the development of education in the British West Indian colonies during the last half of the nineteenth century examines the educational policies and curriculum used in schools following the abolition of slavery During this period the nature and development of the educational system in the region was profoundly affected by the decline of the sugar industry the emergence of black and coloured middle classes and the threat they posed to the ruling white elite and the institutionalization of cultural divisions between the black and white populations Bacchus argues that after 1846 the elite white plantocracy used the educational system to maintain domination following the end of slavery This is the first book to present an overall picture of educational developments in the British West Indies in this period and pays special attention to the historical context in which they occurred In *Education as and for Legitimacy* the author continues the study of West Indian education he began with his previous book *Utilization Misuse and Development of Human Resources in the Early West Indian Colonies* **Come Follow Me and Foresake Temptation** Tom A. O'Donoghue, 2004 The focus of this book is on the situation prevailing in the United States England and Wales Ireland Australia and New Zealand from 1922 to 1965 whereby Catholic schools were used to maximise the possibility of recruiting new members to the religious orders and to minimise the temptation to leave the religious life amongst those who had already joined Four major practices are examined in this regard

First Catholic schools deliberately set out to encourage pupils to join the ranks of the religious Secondly they replicated within the schools the authoritarianism of the religious life Thirdly they worked continuously to marginalize lay teachers from their decision making Finally they were ever vigilant in their opposition to co education and sex education The contribution of the religious orders to Catholic education is recognized but consideration is also given to child abuse both physical and sexual in which members of various religious teaching orders engaged The book closes with some consideration of current practices in Catholic education book cover
