Murray,Steven P. Wise,Kim S. Graham,2016-10-27 Current theories about human memory have been shaped by clinical observations and animal experiments This doctrine holds that the medial temporal lobe subserves one memory system for explicit or declarative memories while the basal ganglia subserves a separate memory system for implicit or procedural memories including habits Cortical areas outside the medial temporal lobe are said to function in perception motor control attention or other aspects of executive function but not in memory The Evolution of Memory Systems advances dramatically different ideas on all counts It proposes that several memory systems arose during evolution and that they did so for the same general reason to transcend problems and exploit opportunities encountered by specific ancestors at particular times and places in the distant past Instead of classifying cortical areas in terms of mutually exclusive perception executive or memory functions the authors show that all cortical areas contribute to memory and that they do so in their own ways using specialized neural representations The book also presents a proposal on the evolution of explicit memory According to this idea explicit declarative memory depends on interactions between a phylogenetically ancient navigation system and a representational system that evolved in humans to represent one s self and others As a result people embed representations of themselves into the events they experience and the facts they learn which leads to the perception of participating in events and knowing facts The Evolution of Memory Systems is an important new work for students and researchers in neuroscience psychology and biology **The Science of Reinventing Yourself Rapidly: How to Break Old Patterns and Create a Powerful New Identity** Silas Mary,2025-02-26 Reinvention is not just for celebrities it s a powerful tool anyone can use to transform their life The Science of Reinventing Yourself Rapidly provides the framework for making rapid changes in your life and creating a powerful new identity Whether you re looking to change careers lose weight or simply develop a new
