Organizational Ethics and Stakeholder Well-Being in the Business Environment Sean Valentine, 2014-04-01 Organizational ethics involves the institutionalized principles guidelines and norms that influence how a company and its employees function in an ethical manner Ultimately these processes collectively influence a firm's 1 overall sense of business ethics 2 management of employees and 3 interactions with partners outside of the immediate work environment Researcher and practitioners are interested in organizational ethics because the different approaches used to develop such a context generate many other positive business outcomes While the connection between organizational ethics and employee stakeholder well being has been explored moving forward with a number of new investigations should push the literature forward This book seeks to explore these important topics and present a more comprehensive overview of organizational ethics and stakeholder well being in the business environment Such inquiry is important because the linkages between business ethics and stakeholders

if wellmanaged have the capacity to benefit both companies and employees In addition the content of this book should serve to guide future investigations within this area of business ethics Attitude Measurements in Science Education Dr. Myint Swe Khine,2015-04-01 The research into how students attitudes affect learning of science related subjects have been one of the core areas of interest by science educators The development in science education records various attempts in measuring attitudes and determining the correlations between behaviour achievements career aspirations gender identity and cultural inclination Some researchers noted that attitudes can be learned and teachers can encourage students to like science subjects through persuasion But some view that attitude is situated in context and it is much to do with upbringing and environment The critical role of attitude is well recognized in advancing science education in particular designing curriculum and choosing powerful pedagogies and nurturing students Since Noll 1935 seminal work on measuring the scientific attitudes a steady stream of research papers that describe development and validation of scales appear in scholarly publications Despite these efforts the progress in this area has been stagnated by limited understanding of the conception about attitude dimensionality and inability to determine the multitude of variables that made up such concept This book makes an attempt to take stock and critically examine the classical views on science attitudes and explore the contemporary attempts in measuring science related attitudes The chapters in this book are reflection of researchers who work tirelessly in promoting science education and will illuminate the current trends and future scenarios in attitude measurement

Leadership Processes and Follower Self-identity Robert G. Lord, Douglas J. Brown, 2003-09-12 Presenting a follower centered perspective on leadership this book focuses on followers as the direct determinant of leadership effects because it is generally through follower reactions and behaviors that leadership attempts succeed or fail Therefore leadership theory needs to be articulated with a theory of how followers create meaning from leadership acts and how this meaning helps followers self regulate in specific contexts In this book an attempt is made to develop such a theory maintaining that the central construct in this process is the self identity of followers In developing this theoretical perspective the authors draw heavily from several areas of research and theory The most critical constructs do not come directly from the leadership literature but from social and cognitive theory pertaining to follower s self identity self regulatory processes motivation values cognitions and emotions and perceptions of social justice Leaders may have profound effects on these aspects of followers and it is by analyzing such indirect follower mediated leadership effects that most ideas regarding leadership theory and practice are developed Due to its broad theoretical focus this book is relevant to a number of audiences The authors principal concern is with the development of leadership theory and the practice of leadership making the book relevant to audiences in management applied psychology and social psychology They have tried to clearly

define key constructs and provide practical examples so that the book could be accessible to advanced undergraduate students. However, the diversity of the underlying theoretical literatures and the complexity of the framework developed also make the book appropriate for graduate courses in those disciplines and for readers with a professional interest in leadership theory or practice.
