## Six Year Old Man:

**Deadhouse** John Temple, 2007-07-17 An inside look at a big city coroner's office where investigators probe the mysteries of death

Laws of Human Behavior Donald Pfaff, Sandra Sherman, 2025-03-04 How scientific studies of human behavior can be replicated with the consistency and rigor characteristic of the physical sciences yielding scientific laws In *Laws of Human Behavior* Donald Pfaff and Sandra Sherman argue that many behavioral and neural discoveries verified over the years through precise reliable measurement are tantamount to laws comparable in rigor and replicability to physical laws such as gravity and the second law of thermodynamics Drawing on research in areas including psychophysics various types of conditioning and habit formation and even social behaviors they show how important aspects of the behavioral sciences contribute to laws that should be celebrated now Responding to what some commentators have called a crisis in reliability the authors make a compelling case for the progress that experimental work in areas formerly labeled as soft science has achieved The book is international in scope References range from the early nineteenth century work of Weber to papers published in 2023 In particular the authors cite important accomplishments in the behavioral and neural sciences of the past few decades that support the characterization of these sciences as exact Each chapter of the book has three parts examples of the law's manifestations in everyday life examples of the laboratory science that supports the law and neurobiological results that further support the validity of the law The book also offers clues for understanding where the field of behavioral science is headed The authors intend for the book to be accessible to interested nonscientists

The Parental Experience in Midlife Carol D. Ryff, Marsha Mailick Seltzer, 1996 Most adults experience parenthood But the longest period of the parental experience when children grow into adolescence and young adulthood and parents themselves are not yet elderly is the least understood In this groundbreaking volume distinguished scholars from anthropology demography economics psychology social work and sociology explore the uncharted years of midlife parenthood The authors employ a rich array of theory and methods to address how the parental experience affects the health well being and development of individuals Collectively they look at the time when parents watch offspring grow into adulthood and begin to establish adult to adult relationships with their children With a strong emphasis on the diversity of midlife parenting including sociodemographic variations and specific parent or child characteristics such as single parenting or raising a child with a disability this volume presents for the first time the complex factors that influence the quality of the midlife parenting experience

**Foundations and Applications of Medical Biochemistry in Clinical Practice** John Neustadt

Nd, Steve Pieczenik MD PhD, 2009-06-13 The culmination of more than ten years of research by the authors this book describes for the first time ever the scientific basis and clinical applications of medical biochemistry a fundamental paradigm shift in medicine This paradigm shift is so revolutionary that it has been called the Neustadt Pieczenik Paradigm which is the fusion and clinical applications of biochemistry thermodynamics physiology fractal enzymology nutritional medicine and laboratory testing to identify and correct the underlying causes of many diseases that are considered genetic in nature eg Phenylketonuria and those that are not considered genetic eg mature onset asthma depression fatigue In this new medicine doctors must reject the failed purely symptomatic treatments they learned in medical school and focus on learning and treating the underlying biochemical causes of disease From the first documented clinical observations of biochemical individuality in the early 1900s to the development of sophisticated biochemical tests the authors provide a detailed and stunning analysis of a new medical model to help millions and cure our ailing healthcare system They uniquely contrast the conventional medical approach with the functional biochemical approach through extensive case studies on depression arthritis migraine headaches seizures rashes and more This book is a must read for physicians medical students nutritionists and anyone looking to take charge of their health An Appealing Act Scott Barclay, 1999 What makes people sue Why do

individuals who have lost their cases decide to appeal In this book the author offers a comprehensive description of the motives and concerns underlying an individual's decision to appeal in civil litigation Contrary to most previous research on this topic that argues that people are primarily results driven Barclay asserts that people are actually concerned with getting a fair hearing from the court winning is secondary The evidence he presents is meticulous but engaging providing a perspective that explains many behaviours toward the courts including noncompliance violence and decisions to self represent This book is for anyone interested in the United States judicial system **Chronicles of an Old Man'S Journey**

Bledsoe, 2010-11-15 Most women in the West use contraceptives in order to avoid having children But in rural Gambia and other parts of sub Saharan Africa many women use contraceptives for the opposite reason to have as many children as possible Using ethnographic and demographic data from a three year study in rural Gambia *Contingent Lives* explains this seemingly counterintuitive fact by juxtaposing two very different understandings of the life course one is a linear Western model that equates aging and the ability to reproduce with

the passage of time the other a Gambian model that views aging as contingent on the cumulative physical social and spiritual hardships of personal history especially obstetric trauma Viewing each of these two models from the perspective of the other Caroline Bledsoe produces fresh understandings of the classical anthropological subjects of reproduction time and aging as culturally shaped within women s conjugal lives Her insights will be welcomed by scholars of anthropology and demography as well as by those working in public health development studies gerontology and the history of medicine
