Approach: How to Model B2Bi Choreographies for Orchestration Execution Andreas Schönberger,2012 The establishment and implementation of cross organizational business processes is an implication of today s market pressure for efficiency gains In this context Business To Business integration B2Bi focuses on the information integration aspects of business processes A core task of B2Bi is providing adequate models that capture the message exchanges between integration partners Following the terminology used in the SOA domain such models will be called choreographies in the context of this work Despite the enormous economic importance of B2Bi existing choreography languages fall short of fulfilling all relevant requirements of B2Bi scenarios Dedicated B2Bi choreography standards allow for inconsistent outcomes of basic interactions and do not provide unambiguous semantics for advanced interaction models In contrast to this more formal or technical choreography languages may provide unambiguous modeling semantics but do not offer B2Bi domain concepts or an adequate level of abstraction Defining valid and complete B2Bi choreography models becomes a challenging task in the face of these shortcomings At the same time invalid or underspecified choreography definitions are particularly costly considering the organizational setting of B2Bi scenarios Models are not only needed to bridge the typical gap between business and IT but also as negotiation means among the business users of the integration partners on the one hand and among the IT experts of the integration partners on the other Misunderstandings between any two negotiation partners potentially affect the agreements between all other negotiation partners *Forthcoming Books* Rose Arny,2002 **SMP GCSE Interact 2-tier Higher 1 Pupil's Book** School Mathematics Project,2006-06-01 This series is an excellent preparation for the linear and modular mathematics GCSE specifications offered by AQA Edexcel and OCR Higher 1 is the first of two main books for the Higher tier It prepares up to grade B and is suitable as the year 10 text for students who have followed any extension course in key stage 3 Alternatively it can follow on from Higher transition a preparatory key stage 4 text for students who have followed a core key stage 3 course **SMP GCSE Interact 2-tier Foundation Transition Pupil's Book** School Mathematics Project,2006-08-01 This series is an excellent preparation for the linear and modular mathematics GCSE specifications offered by AQA Edexcel and OCR The books for the Foundation tier have been especially praised for helping raise the confidence of students who as a result have a better understanding of the mathematics and a clearer self awareness of what they ve learned Foundation transition is for students who have followed any support course in key stage 3 It prepares up to GCSE grade F and can be used to cover or revise basic topics before students start Foundation 1 the first of the two main books for the Foundation tier To help teachers identify material that can be omitted by some students or just dipped into for revision or to check competence chapter sections estimated to be at levels 3 or 4 are labelled as such Each chapter is clear and thorough with ideas developed and highlighted by key worked examples and discussion points Plentiful
