Urban Geography Michael Pacione, 2009-03-16 Today for the first time in the history of Humankind urban dwellers outnumber rural residents. Urban places towns and cities are of fundamental importance for the distribution of population within countries in the organization of economic production distribution and exchange in the structuring of social reproduction and cultural life and in the allocation and exercise of power. Furthermore in the course of the present century the number of urban dwellers and level of global urbanisation are destined to increase. The analysis of towns and cities is a central element of all social sciences including geography which offers a particular perspective on and insight into the urban condition. The principal goal of this third edition of the book remains that of providing instructors and students of the contemporary city with a comprehensive introduction to the expanding field of urban studies. Greening Post-Industrial Cities

Corina McKendry, 2017-09-22 City greening has been heralded for contributing to environmental governance and critiqued for exacerbating displacement and inequality. Bringing these two disparate analyses into conversation, this book offers a comparative understanding of how tensions between growth, environmental protection, and social equity are playing out in practice. Examining Chicago USA, Birmingham UK, and Vancouver Canada, McKendry argues that city greening efforts were closely connected to processes of post-industrial branding in the neoliberal economy. While this brought some benefits, concerns about the unequal distribution of these benefits and greening's limited environmental impact challenged its legitimacy. In response, city leaders have moved toward initiatives that strive to better address environmental effectiveness and social equity while still spurring growth. Through an analysis that highlights how different varieties of liberal environmentalism are manifested in each case, this book illustrates that cities, though constrained by inconsistent political will and broader political and economic contexts, are making contributions to more effective, socially just environmental governance. Both critical and hopeful, McKendry's work will interest scholars of city greening, environmental governance, and comparative urban politics.

Geography and Ethics James D. Proctor, David M. Smith, 2002-09-11 This book represents a landmark exploration of the common terrain of geography and ethics. Drawing together specially commissioned contributions from distinguished geographers across the UK, North America, and Australasia, the place of geography in ethics and of ethics in geography is examined through wide-ranging thematic chapters. Geography and Ethics is divided into four sections for discussion and exploration of ideas: Ethics and Space, Ethics and Place, Ethics and Nature, and Ethics and knowledge, all of which point to the rich interplay between geography and moral philosophy or ethics.

Illegal Residence and Public Safety in the Netherlands Arjen Leerkes, 2009 *Illegal Residence and Public Safety in the Netherlands* is een onderzoek naar de gevolgen van de steeds drastischere maatregelen om illegaal verblijf in Nederland tegen te gaan. EU lidstaten als Nederland hanteren steeds zwaardere voorwaarden voor immigratie vanuit niet-westerse landen en niet-Europese landen. Zijn illegale immigranten eerder geneigd tot criminaliteit of weerhoudt hun juridische status hen er juist van.

The Political Economy of City Branding Ari-Veikko Anttiroiko, 2014-02-24 Globalization affects urban communities in many ways. One of its manifestations

is increased intercity competition which compels cities to increase their attractiveness in terms of capital entrepreneurship information expertise and consumption This competition takes place in an asymmetric field with cities trying to find the best possible ways of using their natural and created assets the latter including a naturally evolving reputation or consciously developed competitive identity or brand The Political Economy of City Branding discusses this phenomenon from the perspective of numerous post industrial cities in North America Europe East Asia and Australasia Special attention is given to local economic development policy and industrial profiling and global city rankings are used to provide empirical evidence for cities characteristics and positions in the global urban hierarchy On top of this social and urban challenges such as creative class struggle are also discussed The core message of the book is that cities should apply the tools of city branding in their industrial promotion and specialization but at the same time take into account the special nature of their urban communities and be open and inclusive in their brand policies in order to ensure optimal results This book will be of interest to scholars and practitioners working in the areas of local economic development urban planning public management and branding *Introducing Human Geographies, Second Edition* Paul Cloke, Philip Crang, Mark Goodwin, 2013-01-11

Skifter Andersen, 2019-01-15 This title was first published in 2003 Most European cities have experienced problems in certain neighbourhoods that are termed deprived or excluded Traditionally these were found in the oldest urban areas with lowest quality housing but since the 1980s such areas have emerged in housing estates built around the cities edges These neighbourhoods are marked by visible physical and social problems that disfigure the otherwise pleasant urban landscape and can be seen as urban sores This engaging and thought provoking book provides a deeper understanding of why urban decay and deprived neighbourhoods appear in certain parts of cities as well as how they affect residents and cities in general Drawing on in depth empirical research from Denmark it compares this with other studies from Europe and the United States The author combines theories and methodologies from the fields of geography on segregation economics on processes of urban decay and social research on social exclusion and deprived neighbourhoods to provide original illuminating and invaluable insights *Social Polarization in Post-industrial Metropolises* John Vianney O'Loughlin, Jürgen Friedrichs, 1996

How to Build a Global City Michele Acuto, 2022-01-15 In *How to Build a Global City* Michele Acuto considers the rise of a new generation of so called global cities Singapore Sydney and Dubai and the power that this concept had in their ascent in order to analyze the general relationship between global city theory and its urban public policy practice The global city is often invoked in theory and practice as an ideal model of development and a logic of internationalization for cities the world over But the global city also creates deep social polarization and challenges how much local planning can achieve in a world economy Presenting a unique elite ethnography in Singapore Sydney and Dubai Acuto discusses the global urban discourses aspirations and strategies vital to the planning and management of such metropolitan growth The global city he shows is not one single idea but a complex of ways to imagine a place to be global and aspirations to make it so often deeply steeped in politics His resulting book is a call to reconcile proponents and critics of the global city toward a more explicit engagement with the politics of this global urban imagination **Healthy Cities** Namir Khan, Willem H. Vanderburg, 2001 Modern cities

can be designed to constitute a more supportive environment for a great many activities provide a more livable habitat and reduce the burden imposed on the biosphere They can be made healthier in terms of the definition by World Health Organization and more sustainable by means of new and emerging preventive approaches *Healthy Cities* focuses on those preventive approaches that can make cities healthier and more sustainable This book as well as the two companion volumes *Sustainable Energy* and *Sustainable Production* is the result of a twelve year research project carried out at the Center for Technology and Social Development at the University of Toronto The research findings led to the development of a new conceptual framework and strategy aimed at converting technological and economic growth into development that would gradually become more sustainable *International Handbook of Globalization and World Cities* Ben Derudder, 2012-02-01
