Age in America Corinne T. Field, Nicholas L. Syrett, 2015-05-22 Eighteen Twenty one Sixty five In America today we recognize these numbers as key transitions in our lives precise moments when our rights and opportunities change when we become eligible to cast a vote buy a drink or enroll in Medicare This volume brings together scholars of childhood adulthood and old age to explore how and why particular ages have come to define the rights and obligations of American citizens Since the founding of the nation Americans have relied on chronological age to determine matters as diverse as who can marry work be enslaved drive a car or qualify for a pension Contributors to this volume explore what meanings people in the past ascribed to specific ages and whether or not earlier Americans believed the same things about particular ages as we do The means by which Americans imposed chronological boundaries upon the variable process of growing up and growing old offers a paradigmatic example of how people construct cultural meaning and social hierarchy from embodied experience Further chronological age always intersects with other socially constructed categories such as gender race and sexuality Ranging from the seventeenth century to the present taking up a variety of distinct subcultures from frontier children and antebellum slaves to twentieth century Latinas *Age in America* makes a powerful case that age has always been a key index of citizenship

The New Politics of Old Age Policy Robert B. Hudson, 2014-09-22 A comprehensive overview of current aging policies As the average age of the U S population continues to increase age related policies have come under intense scrutiny sparking heated debates In the past older people were seen as a frail dependent population but major policies enacted or expanded on their behalf have made them major players in electoral and interest group politics This thoroughly revised and updated edition of Robert B Hudson s *The New Politics of Old Age Policy* not only explains the politics behind the country s age based programs and describes how those programs work but also assesses how well or poorly they meet the growing and changing needs of older Americans Essays by leading experts in political science sociology law social work and gerontology address among other things theoretical approaches to age based policy population dynamics and the impact of growing diversity within the older population and national state and local issues associated with major age based programs More than any other source this book presents the most current information on growing older in the United States including in depth analyses of Social Security Medicare Medicaid housing initiatives the Older Americans Act the Age Discrimination in Employment Act and tax policy Detailed new chapters focus on financial security and retirement in the context of the Great Recession diversity and inequality in aging populations and implications of the Affordable Care Act Scholars students and policymakers will appreciate the volume s timely overview of the evolution of aging policy

The Long Baby Boom Jeff Goldsmith, 2008-05-26 Important timely should be the basis for a national debate about how we each want to grow older and what kind of society we

want to do it in John Rother Group Executive Officer of Policy and Strategy AARP The aging of the boomer generation has unleashed a veritable tidal wave of gloomy punditry advertising for financial services and forecasts of impending national bankruptcy In *The Long Baby Boom* Jeff Goldsmith counters the catastrophic predictions with a far more optimistic scenario Drawing on evidence that most baby boomers plan on working long past age sixty five Goldsmith argues that they will have a constructive impact on society By assuming a much larger portion of the financial burden of their own retirement and health costs they will help preserve Social Security and Medicare for the less fortunate and for successive generations *The Long Baby Boom* is the first comprehensive forecast of baby boomers career plans health trends and cultural and political values Goldsmith's pro work pro savings pro health social policy emphasizes personal responsibility without ripping the social safety net Constructive and innovative *The Long Baby Boom* doesn't promise a cloud free future but it does reassure us that the sky isn't falling

Democracy and its Elected Enemies Steven Rosefielde, Daniel Quinn Mills, 2013-10-07 Democracy and its Elected Enemies reveals that American politicians have usurped their constitutional authority substituting their economic and political sovereignty for the people's This has been accomplished by creating an enormous public service sector operating in the material interest of politicians themselves and of their big business and big social advocacy confederates to the detriment of workers the middle class and the non political rich jeopardizing the nation's security in the process Steven Rosefielde and Daniel Quinn Mills contend that this usurpation is the source of America's economic decline and fading international power and provide an action plan for restoring true democracy in which politicians only provide the services people vote for within the civil and property rights protections set forth in the constitution

Old Age, New Science Hyung Wook Park, 2016-03-09 Between 1870 and 1940 life expectancy in the United States skyrocketed while the percentage of senior citizens age sixty five and older more than doubled a phenomenon owed largely to innovations in medicine and public health At the same time the Great Depression was a major tipping point for age discrimination and poverty in the West seniors were living longer and retiring earlier but without adequate means to support themselves and their families The economic disaster of the 1930s alerted scientists who were actively researching the processes of aging to the profound social implications of their work and by the end of the 1950s the field of gerontology emerged *Old Age New Science* explores how a group of American and British life scientists contributed to gerontology's development as a multidisciplinary field It examines the foundational biosocial visions they shared a byproduct of both their research and the social problems they encountered Hyung Wook Park shows how these visions shaped popular discourses on aging directly influenced the institutionalization of gerontology and also reflected the class gender and race biases of their founders

Fiscal and Monetary Policies in Developing Countries Rashed Al Mahmud Titumir, 2021-12-23 The COVID 19 crisis has fractured the pre-existing structural rigidities and institutional fragilities in the economies of developing countries more than ever necessitating a rethinking of fiscal and monetary policies the main vehicles for relief recovery and reconstruction This book examines the barriers to

transformation in developing countries in the wake of the pandemic and analyses the paths to recovery based on an economic policymaking agenda. It juxtaposes fiscal and monetary policies and state building from pre and post colonial periods to the present day context. It employs an interdisciplinary approach and ventures beyond the well rehearsed tendency to explain the state of developing countries by considering the experiences of advanced economies. The book utilises data on three levels: the aggregate level using world data, the single country context with case studies and a cross country assessment for comparative analysis. Further, the book critically assesses the relevance of different schools of thought and provides nuanced thought provoking theoretical apparatuses applicable to developing countries as well as allowing the reader to undertake a country specific analysis through the detailed historical country case studies undertaken in each chapter. Each chapter has a detailed and separate theoretical and empirical section for the ease of understanding of the key propositions in the book. The book will find an audience among scholars and researchers alike who wish to gain a deeper understanding of the formulation of fiscal and monetary policies specifically in developing countries. For policymakers and policy advocates, the book will serve as the groundwork for monetary and fiscal policies in the context of developing countries, providing more relevant instruments for transformational pathways.

Economics and Ageing José Luis Iparraguirre, 2019-11-29. This upper level textbook provides a coherent introduction to the economic implications of individual and population ageing. Placing economic considerations into a wider social sciences context, this is ideal reading not only for advanced undergraduate and masters students in health economics and economics of ageing, but policy makers, professionals and practitioners in gerontology, sociology, health related sciences and social care. This volume introduces topics in labour economics including the economic implications of ageing workforces. It covers pension economics and pension systems with their macroeconomic and distributive effects and the question of risk. Finally, it describes macroeconomic consequences of ageing populations on aggregate saving, inflation, international trade and financial markets.

Family, Intergenerational Solidarity, and Post-Traditional Society Ronald J. Angel, Jacqueline L. Angel, 2017-07-06. This book examines the challenges families commonly face during the life course with special emphasis on decisions concerning aging family members. These issues are explored in the context of the family in a post traditional society.
