Web Based Education in the Human Services reflects the vitality and diversity of Web based courses currently delivered within human services. Unlike previous texts that have combined technologies such as Interactive Television (ITV) and two way audio where Web involvement was minimal, this unique book focuses on Web based models, tools, and techniques used in courses where the majority of the content is delivered online. The book's contributors emphasize the social aspects of learning, examining topical areas not usually associated with Web based education as they remind us of the need to move beyond the similarities between WBE and face to face FTF approaches.
