post human lineage *Mapping Reality* Jane Azevedo, 1997-01-30 With postmodernism and poststructuralism sweeping the social sciences and humanities a whole generation of students from disciplines as diverse as history English literature philosophy sociology and anthropology are learning that truth is bogus a tired old liberal humanist fiction Language is incapable of telling the truth and science nothing but a socially constructed discourse functions to maintain the status quo There is much to be said for this point of view but ironically relativists face precisely the same quandary for if all claims to knowledge are equally valid then de facto the knowledge claims of the most powerful are the ones disseminated and acted upon This timely book offers a way out of the current realist relativist impasse Azevedo uses the insights of evolutionary epistemology to develop a naturalist realist methodology of science the mapping model of knowledge and applies it to solving the conceptual practical and ethical problems faced by sociology as a discipline The model is developed from the practice of the natural sciences and comes with an easily applied and powerful heuristic based on mapping filling the gap left by the downfall of positivist and empiricist methodologies It shows the inescapably social nature of science but argues that scientific theories can in fact be validated in perspective neutral ways not despite the social and interest driven nature of science but because of it **Applied Sociology for Nurses** Shama Lohumi, Rakesh Lohumi, 2022-12-15 This book has been written keeping in view the specific requirements of undergraduate nursing students and it fully covers the new syllabus prescribed by the Indian Nursing Council Although it primarily aims at catering to the curricular needs of B Sc Nursing students it will also be immensely useful for degree students of various other streams studying sociology The basic concepts have been explained in unambiguous terms from the students point of view Sociological aspects relevant to nursing have been dealt with in detail wherever necessary so that students not only learn the subject but also are able to make practical use of the acquired knowledge in profession Applied aspects of Sociology as per the new syllabus has been covered in the book Written with a view to fulfilling the curricular needs of student nurses as per the revised INC Curriculum A new section on Clinical Sociology Unit VIII comprising 3 chapters as per the new syllabus added Includes substantially new approaches aspects on various aspects Covers latest events like social fallout of COVID 19 pandemic and the law banning triple talaq Contains short answer and long answer exam oriented questions at the end of chapters Additional multiple choice questions to help students have a firm grasp on the subject *Evolutionary Theory in Social Science* M. Schmid, Franz M. Wuketits, 1987-10-31 In

retrospect the 19th century undoubtedly seems to be the century of evolutionism The discovery of time and therewith the experience of variability was made by many sciences not only historians worked on the elaboration and interpretation of this discovery but also physicists geographers biologists and economists demographers archaeologists and even philosophers The successful empirical foundation of evolutive processes by Darwin and his disciples suggested Herbert Spencer's vigorously pursued efforts in searching for an extensive catalogue of prime and deduced evolutionary principles that would allow to integrate the most different disciplines of natural and social sciences as well as the efforts of philosophers of ethics and

epistemologists Soon it became evident however that the claim for integration anticipated by far the actual results of these different disciplines Darwin's theory suffered from the fact that in the beginning a hereditary factor which could have his theory could not be detected while the gains of genetics supported in the social sciences got lost in consequence of the completely ahistorical or biologicistic speculations of some representatives of the evolutionary research programme and common socialdarwinistic misinterpretations *Society* Ian Robertson,1989 This concise elegantly written paperback volume on the essential elements of sociology is perfect as the sole textbook for a brief introductory course or as a core text to be supplemented with other readings **Sociology** David M. Newman,2022-10-14 In the Fourteenth Edition of *Sociology Exploring the Architecture of Everyday Life* David Newman shows students how to see the unfamiliar in the familiar to step back and see organization and predictability in their take for granted personal experiences With his approachable writing style and lively anecdotes the author's goal from the first edition has been the same to write a textbook that reads like a real book Many adopters of this book are fans of Peter Berger's classic works which helped introduce the idea of social constructionism to sociology Newman uses the metaphors of architecture and construction to help students understand that society is not something that exists out there independently of themselves it is a human creation that is planned maintained or altered by individuals Using vivid prose current examples and fresh data this text presents a unique and thought provoking overview of how society is constructed and experienced Instead of surveying every subfield in sociology the more streamlined coverage 14 chapters focuses on the individual and society the construction of self and society and social inequality in the context of social structures This title is accompanied by a complete teaching and learning package in SAGE Vantage an intuitive learning platform that integrates quality SAGE textbook content with assignable multimedia activities and auto graded assessments to drive student engagement and ensure accountability Unparalleled in its ease of use and built for dynamic teaching and learning Vantage offers customizable LMS integration and best in class support *Archaeology and World Prehistory* Christopher R. How Society Makes Itself: The Evolution of Political and Economic Institutions Howard J Sherman, 2015-06-01 This radical account of the evolution of political social and economic institutions weaves together strands of anthropology sociology political science history and economics In a highly readable text Howard Sherman explains the interconnections of ideas and economic forces and traces the evolution of social and economic institutions from primitive times to the present Sherman focuses on the myth of inevitable progress in technology and argues that it progresses only when social and economic institutions and dominant ideas encourage it to improve He shows that throughout history technology as a part of the economic forces ebbs and flows to create or undermine existing economic institutions
