Transitional Justice in Troubled Societies Aleksandar Fatic, Klaus Bachmann, Igor Lyubashenko, 2018-11-26 This book discusses the crucial strategic topic for the practical implementation of transitional justice in post conflict societies by arguing that the dilemma is defined by the extent to which the actual achievement of the political goals of transition is a necessary condition for the long term observance and implementation of justice While in many cases the blind criminal justice does not enhance and even militates against the achievement of political transitions an understanding of transitional justice as a fundamentally political process is novel controversial and a concept which may shape the future of transitional justice This collection contributes to developing this concept both theoretically and through concrete and current case studies from the world's most pronounced crisis spots for transitional justice

History and Theory of Compromise Jan-Hendryk de Boer, Manon Westphal, Julia Mariko Jacoby, Karsten Mause, Stefan Zeppenfeld, 2025-11-17

Interest in compromise has recently grown both in public and scholarly debates. However, there is a lack of interdisciplinary dialogue on the topic. This volume fills this gap by bringing together contributions from various relevant disciplines. They show that compromise has been a central technique to regulate social and political conflicts in different contexts. In a compromise, the conflicting parties create an agreement by making mutual concessions but do not give up their original claims. Therein lies the capacity of compromise to prevent or end escalated conflicts even in situations in which disagreements cannot be transformed into a consensus. In addition to theoretical investigations of the concept, the volume includes case studies on Europe in the Middle Ages in the 19th and 20th centuries and on pre-modern and contemporary Japan. The overarching question is about the preconditions of compromises. The authors examine the role of compromise in diplomacy, politics, trade, economics, and everyday life. Together, they generate a comprehensive picture of the capacities and limitations of compromise in the past and today.

Studying Societies and Cultures Lawrence A. Kuznar, Stephen K. Sanderson, 2015-12-03. A thought-provoking, stimulating volume on the past, present, and future of cultural materialism that is both laudatory of Harris' research strategy and critical of it. Paul Shankman, University of Colorado. One of the most important anthropologists of all time, Marvin Harris was influential worldwide as the founder of cultural materialism. This book accessibly analyzes Harris's theories and their important legacies today. The chapters explore cultural materialism's epistemology and its relation to rational choice theory, Darwinian social science, and population pressures. The authors assess recent attempts to extend and reformulate cultural materialism and highlight cross-cultural archaeological and ethnographic applications of cultural materialism today.

A New Dictionary of the Social Sciences G. Mitchell, 2017-07-05. Designed especially to meet the needs of beginners in all the social sciences, *A New Dictionary of the Social Sciences* follows its highly successful distinguished predecessor initially issued as *A Dictionary of Sociology* first published in 1968. Many of the entries have been revised and updated to keep abreast of the proliferation in the vocabulary of the social sciences. The volume remains an excellent single source for definitions in social research. The entries include social psychological terms, terms in social and cultural anthropology, terms common to political science, social administration, and social work. In the choice of words, a generous definition of social science was employed, making the dictionary a very useful reference source for all beginners in the social sciences. Some terms are explained quite briefly, while others are given lengthy treatment according to the further assumptions that some sociological terms can imply. Thus, long entries are given on words such as authority, consensus, phenomenology, role, social stratification, structuralism, whereas short and succinct entries suffice for words such as agnate, eidolon, or mores. A number of short biographical sketches are also included. The contributors are all scholars working in universities, predominantly in the United Kingdom and the United States. More than a glossary, *A New Dictionary of the Social Sciences* helps the student understand some of the theoretical considerations underlying the use of sociological terms, as well as something of their history, and therefore resembles an encyclopaedia in its scope and depth of information.

Engineering, Social Sciences, and the Humanities Steen Hyldgaard Christensen, Anders Buch, Eddie

Conlon, Christelle Didier, Carl Mitcham, Mike Murphy, 2023-01-16 This book presents a critical examination of conversations between engineering social sciences and the humanities asking whether their conversations have come of age These conversations are important because ultimately their outcome have real world consequences in engineering education and practice and for the social and material world we inhabit Taken together the 21 chapters provide scholarly argued responses to the following questions Why are these conversations important for engineering for social sciences and for the humanities Are there key places in practice in the curriculum and in institutions where these conversations can develop best What are the barriers to successful conversations What proposals can be made for deepening these conversations for the future How would we know that the conversations have come of age and who gets to decide The book appeals to scholarly audiences that come together through their work in engineering education and practice The chapters of the book probes and access the meetings and conversations and they explore new avenues for strengthening dialogues that transcend narrow disciplinary confines and divisions The volume offers a rich collection of descriptive resources and theoretical tools that will be useful for researchers of engineering practices and for those aiming to reshape the engineering lifeworld through new policies The book depicts the current state of the art of the most visible SSH contributions to shaping engineering practices as well as a map of research gaps and policy problems that still need to be explored Dr Ir Lavinia Marin TU Delft Electrical Engineering and Philosophy
