nature and society theory *Society and the Environment* Michael Carolan, 2018-05-15 *Society and the Environment* examines today's environmental controversies within a socio-organizational context. After outlining the contours of pragmatic environmentalism, Carolan considers the pressures that exist where ecology and society collide, such as population growth and its associated increased demands for food and energy. He also investigates how various ecological issues, such as climate change, are affecting our very own personal health. Finally, he drills into the social structural dynamics, including political economy and the international legal system, that create ongoing momentum for environmental ills. This interdisciplinary text features a three-part structure in each chapter that covers fast facts about the issue at hand, examines its wide-ranging implications, and offers balanced consideration of possible real-world solutions. New to this edition are Movement Matters boxes, which showcase grassroots movements that have affected legislation. Discussion questions and key terms enhance the text's usefulness, making *Society and the Environment* the perfect learning tool for courses on environmental sociology.

Science, Society and the Environment Michael Dove, Daniel Kammen, 2015-04-24 In an era when pressing environmental problems make collaboration across the divide between sciences and arts and humanities essential, this book presents the results of a collaborative analysis by an anthropologist and a physicist of four key junctures between science, society, and environment. The first focuses on the systemic bias in science in favour of studying esoteric subjects as distinct from the mundane subjects of everyday life; the second is a study of the fire climax grasslands of Southeast Asia, especially those dominated by *Imperata cylindrica* sword grass; the third reworks the idea of moral economy, applying it to relations between environment and society; and the fourth focuses on the evolution of the global discourse of the culpability and responsibility of climate change. The volume concludes with the insights of an interdisciplinary perspective for the natural and social science of sustainability. It argues that failures of conservation and development must be viewed systemically and that mundane topics are no less complex than the more esoteric subjects of science. The book addresses a current blind spot within the academic research community: too much focusing attention on the seemingly common and mundane beliefs and practices that ultimately play the central role in the human interaction with the environment. This book will benefit students and scholars from a number of different academic disciplines, including conservation and environment studies, development studies, studies of global environmental change, anthropology, geography, sociology, politics, and science and technology studies.

Local Environmental Change and Society in Africa M.A. Salih, 2012-12-06 The Organization for Social Science Research in Eastern and Southern Africa (OSSREA) is a network of social scientists in the sub-region established in 1980. Its main objectives are to encourage and promote interest to engage in collaborative research to facilitate scholarly exchange of ideas and publication between individuals and institutions engaged in the study and research in the social sciences. OSSREA also aims to promote the training of social scientists from the sub-region in the study of and research in the social sciences and to encourage establishment of institutions dedicated to this goal. In pursuance of and consistent with its objectives,

OSSREA established a fund to provide research grants and training fellowships to social scientists from the sub region Every year OSSREA offers on a competitive basis two limited types of research grants the first on topics related to the social sciences in general and the second on gender issues in particular The grants assist the social scientists to conduct field research in an eastern or southern African country society institutions sector or problem area The objectives of the social science competition are intended to encourage and promote upcoming scholars from the sub region to conduct research in the social economic political or other problems Moreover it aims to strengthen and raise the capacity of faculty members and students in field research and promote the subsequent availability of research findings for teaching as well as to inform individuals and institutions

Driessen, P. Glasbergen, 2013-04-17 This book can be regarded as a monograph on the debates and developments in Dutch environmental policy It has been written with a specific perspective in mind First and foremost the line of approach we have taken was from a multidisciplinary social science point of view The trend in environmental policy is looked at from the angle of sociology policy studies and political science Secondly all analyses depart from the paradigm shift concept This particular paradigm shift is based on the fact that a radical change has taken shape over the years in the way environmental issues are handled Previously environmental policy had always been characterised by a top down approach in which government determined the actual objectives of policy and assumed that it could win over business non governmental organisations and citizens to act in line with those objectives

There was also a great deal of faith in the technical solutions to environmental issues Today s environmental policy is based on a totally different philosophy Environmental objectives are now reached in association with business non governmental organisations and citizens These actors are also involved in bringing environmental policy into practice In other words the implementation of policy has a more interactive nature New relationships emerge between government the market and civil society and policy discourses also become integrated The environmental interest is more often weighed against the economic interests the spatial development and against social justice
