The Yearbook of the National Society for the Study of Education , 1918 The ... Yearbook of the National Society for the Study of Education National Society for the Study of Education, 1919 International Organization in the Anarchical Society Tonny Brems Knudsen, Cornelia Navari, 2018-05-23 This book takes up one of the key theoretical challenges in the English School s conceptual framework namely the nature of the institutions of international society It theorizes their nature through an analysis of the relationship of primary and secondary levels of institutional formation so far largely ignored in English

School theorizing and provides case studies to illuminate the theory Hitherto the School has largely failed to study secondary institutions such as international organizations and regimes as autonomous objects of analysis seeing them as mere materializations of primary institutions Building on legal and constructivist arguments about the constitutive character of institutions it demonstrates how primary institutions frame secondary organizations and regimes but also how secondary institutions construct agencies with capacities that impinge upon and can change primary institutions Based on legal and constructivist ideas it develops a theoretical model that sees primary and secondary institutions as shared understandings enmeshed in observable historical processes of constitution reproduction and regulation

Information Society Karamjit S. Gill, 2012-12-06 Human centredness A Challenge to Post industrial Europe The key power in industrial society has been linked to the possession of capital and factory In the information society it could be rather different If one accepts that that the key power in the information society will be linked not so much to the ownership of information but to human creativity nourished by that information the productive force of today and tomorrow could be more and more the human brain Making use of one's intelligence is always accompanied by positive emotion which in turn further activates the intelligence But unfortunately under present conditions workers of all levels live in fear anxiety and stress rather than desire and motivation The question of basic human ecology quality of life is therefore a major strategic factor It is precisely the opposite to the mechanisms of exclusion that currently dominate our society exclusion of young people through joblessness but also exclusion through technology as with the helplessness of older people or the poorly educated confronted with ticket dispensing machines or other automats This is not idle theorizing it corresponds to concrete facts It is for example how some observers interpret the crisis at IBM Because its programs were less human friendly it was shaken to its foundations by Apple and Microsoft though it seems since to have learnt its lesson

Copyright Law in the Digital Society Tanya Aplin, 2005-08-30 Multimedia technology is a key component of the Digital Society This book comprehensively examines the extent to which copyright and database right protect multimedia works It does so from the perspective of UK law but with due attention being paid to EU law international treaties and comparative developments in other jurisdictions such as Australia and the U S The central argument of the book is that the copyright and database right regimes are for the most part flexible enough to meet the challenges presented by multimedia As a result it is neither necessary nor desirable to introduce separate copyright protection or sui generis protection for multimedia works This important and original new work will be essential reading for any lawyer engaged in advising on IP matters relating to the new media industries and scholars and students working in intellectual property and computer law

Magic and Medieval Society Anne Lawrence-Mathers, Carolina Escobar-Vargas, 2014-05-30 Magic and Medieval Society presents a thematic approach to the topic of magic and sorcery in Western Europe between the eleventh and the fifteenth century It aims to provide readers with the conceptual and documentary tools to reach informed conclusions as to the existence nature importance and uses of magic

in medieval society Contrary to some previous approaches the authors argue that magic is inextricably connected to other areas of cultural practice and was found across medieval society Therefore the book is arranged thematically covering topics such as the use of magic at medieval courts at universities and within the medieval Church itself Each chapter and theme is supported by additional documents diagrams and images to allow readers to examine the evidence side by side with the discussions in the chapters and to come to informed conclusions on the issues This book puts forward the argument that the witch craze was not a medieval phenomenon but rather the product of the Renaissance and the Reformation and demonstrates how the components for the early modern prosecution of witches were put into place This new Seminar Study is supported by a comprehensive documents section chronology who's who and black and white plate section It offers a concise and thought provoking introduction for students of medieval history
