Sociocybernetics Complexity Autopoiesis And Observation Of Social Systems:

Sociocybernetics Rudolf F. Geyer, Johannes van der Zouwen, 2001-01-30 In an effort to shed light on recent developments in sociocybernetic research this volume represents recent and advanced thinking in this rapidly developing field The authors address the core problems in social science caused by increasing societal complexity and analyze the inadequacy of many of the methodological tools still used for grappling with nonlinear self organizing systems Together the 18 contributors propose elements of a new methodology based on sociocybernetic principles aimed at describing and explaining the growth of societal complexity the contribution of autopoiesis of societal subunits to more societal complexity and the new simulation based methodology needed to observe complex social systems This unique volume contributes to a greater understanding of sociocybernetics and its uses as a method for researching modern problems of increasing complexity and interdependence The first part of the book deals with increasing societal complexity and contains chapters on its overall development the complexity of brain environment interaction loops organizational change the development of human values and the increasing interpenetration of societal subsystems The second part concentrates on a current issue in sociocybernetics autopoiesis or self production The chapters included in Part II concentrate on embodied cognition on the applicability of autopoiesis to business firms on its roots in Aristotelian philosophy and on the possibility of societal control and steering in democratic societies Part III more focused on methodology discusses the difficulties inherent in observing complex social systems The chapters deal with the problems of cross cultural comparative research simulation of the evolution of social systems longitudinal simulation of education systems and the methodological difficulties associated with analyzing the unexpected complexities of mutually interacting nonlinear systems *Systemics of Emergence* Gianfranco Minati, Eliano

Aultman,2006-08-18 In this collection of essays the authors don t argue with those attributes deemed to be the essence of professionalism in medicine Instead they ask questions of the discourse from which they arise how the specialized language of academic medicine disciplines has defined organized contained and made seemingly immutable a group of attitudes values and behaviors subsumed under the label professional or professionalism This collection aims to be a critical text one that questions the profession s beliefs about the nature of its work and how such beliefs are enacted or not in medical education particularly as they fuel the professionalism discourse The Ashgate Research Companion to Planning Theory Patsy Healey,2016-11-03 At a time of potentially radical changes in the ways in which humans interact with their environments through financial environmental and or social crises the raison d tre of spatial planning faces significant conceptual and empirical challenges This Companion presents a multidimensional collection of critical narratives of conceptual challenges for spatial planning The authors draw on various disciplinary traditions and theoretical frames to explore different ways of conceptualising spatial planning and the challenges it faces Through problematising planning itself the values which underpin planning and theory practice relations contributions make visible the limits of established planning theories and illustrate how by thinking about new issues or about issues in new ways spatial planning might be advanced both theoretically and practically There cannot be definitive answers to the conceptual challenges posed but the authors in this collection provoke critical questions and debates over important issues for spatial planning and its future A key question is not so much what planning theory is but what might planning theory do in times of uncertainty and complexity An underlying rationale is that planning theory and practice are intrinsically connected The Companion is presented in three linked parts issues which arise from an interactive understanding of the relations between planning ideas and the political institutional contexts in which such ideas are put to work key concepts in current theorising

from mainly poststructuralist perspectives and what discussion on complexity may offer planning theory and practice

Is Law Computable? Simon Deakin, Christopher Markou, 2020-11-26 What does computable law mean for the autonomy authority and legitimacy of the legal system Are we witnessing a shift from Rule of Law to a new Rule of Technology Should we even build these things in the first place This unique volume collects original papers by a group of leading international scholars to address some of the fascinating questions raised by the encroachment of Artificial Intelligence AI into more aspects of legal process administration and culture Weighing near term benefits against the longer term and potentially path dependent implications of replacing human legal authority with computational systems this volume pushes back against the more uncritical accounts of AI in law and the eagerness of scholars governments and LegalTech developers to overlook the more fundamental and perhaps bigger picture ramifications of computable law With contributions by Simon Deakin Christopher Markou Mireille Hildebrandt Roger Brownsword Sylvie Delacroix Lyria Bennet Moses Ryan Abbott Jennifer Cobbe Lily Hands John Morison Alex Sarch and Dilan Thampapillai as well as a foreword from Frank Pasquale

The International Legal Regime of Areas beyond National Jurisdiction Erik J. Molenaar, Alex G. Oude Elferink, 2010-02-08 States and entrepreneurs are becoming increasingly interested in the economic potential of ocean areas beyond the national jurisdiction of coastal States namely the high seas and the Area This has led to growing support within the international community to enhance the international legal regime for those areas among other things to protect and preserve the environment and biodiversity However the current debate in international fora indicates that States have widely different interpretations on key aspects of this regime For instance what implications do the principles contained in the United Nations Convention on the Law of the Sea have for the governance and regulation of these areas how is access to natural resources best regulated how are benefits derived from these areas to be distributed and which specific institutional frameworks should be employed in the management of areas beyond national jurisdiction This work intends to contribute to a better understanding of the international law aspects of the ongoing debate on current and future international governance and regulation of areas beyond national jurisdiction To this end four specific topics are examined principles and objectives of the legal regime institutional arrangements for the legal regime entitlements to marine living resources and compliance with international regulations
